Claudio Monteverdi (1567-1643) was the first important composer of opera. This innovative study by one of the foremost experts on Monteverdi and seventeenth-century opera examines the composer's celebrated final works—*Il ritorno d'Ulisse* (1640) and *L'incoronazione di Poppea* (1642)—from a new perspective. Ellen Rosand considers these works as not

merely a pair but constituents of a have swirled around trio, a Venetian trilogy that, Rosand argues, properly includes a third opera, *Le nozze d'Enea* (1641). Although its music has not survived, its chronological placement between the other two operas opens new prospects for better understanding all three, both in their specifically Venetian context and as the creations of an old master. A thorough review of manuscript and printed sources of *Ritorno* and *Poppea*, in conjunction with those of their erstwhile silent companion, offers new possibilities for resolving the questions of authenticity that

In the mid-1870s, the experimental therapy of lamb blood transfusion spread like an epidemic across Europe and the USA. Doctors tried it as a cure for tuberculosis, pellagra and anemia; proposed it as a means to reanimate seemingly dead soldiers on the battlefield. It was a contested therapy because it meant crossing boundaries and challenging taboos. Was the

transfusion of lamb blood into desperately sick humans really defensible? The book takes the reader on a journey into hospital wards and lunatic asylums, physiological laboratories and 19th century wars. It presents a fascinating story of medical knowledge, ambitions and concerns - a story that provides lessons for current debates on the morality of medical experimentation and care.
