Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Claudio Monteverdi (1567-1643) was the first important composer of opera. This innovative study by one of the foremost experts on Monteverdi and

seventeenth-century opera examines the composer's celebrated final works—*Ritorno d'Ulisse* (1640) and *L'incoronazione di Poppea* (1642)—from a new perspective. Ellen Rosand considers these works as not merely a pair but constituents of a trio, a Venetian trilogy that, Rosand argues, properly includes a third opera, *Le nozze d'Enea* (1641). Although its music has not survived, its chronological placement between the other two operas opens new prospects for better understanding all three, both in their specifically Venetian context and as the creations of an old master. A thorough review of manuscript and printed sources of *Ritorno* and *Poppea*, in conjunction with those of their erstwhile silent companion, offers new possibilities for resolving the questions of authenticity that have swirled around Monteverdi's last operas since their discovery in the late nineteenth century. *Le nozze d'Enea* also helps to explain the striking differences between the other two, casting new light on their contrasting moral ethos: the conflict between a world of emotional propriety and restraint and one of hedonistic abandon.
