Iconic, tough-but-tender Boston PI Spenser delves into the black-market art scene to investigate a decades-long unsolved crime of dangerous proportions The heist was legendary, still talked about twenty years after the priceless paintings disappeared from one of Boston's premier art museums. Most thought the art was lost forever, buried deep, sold off overseas, or, worse, destroyed as incriminating evidence. But when paint chips from the most valuable piece stolen, Gentlemen in Black, by a Spanish master, arrives at the desk of a Boston journalist, the museum finds hope and enlists Spenser's help. Soon the cold art case thrusts Spenser into the shady world of black market art dealers, aged Mafia bosses, and old vendettas. A five-million-dollar-reward by the museum's top benefactor, an aged, unlikable Boston socialite, sets Spenser and pals Vinnie Morris and Hawk onto a trail of hidden secrets, jailhouse confessions, murder, and double crosses. Set against the high-society art scene and the lowlife back alleys of Boston, this is classic Spenser doing what he does best.

Mystical experience is not really understood in our modern Western culture, but we have a rich history and tradition that can be traced from remote ages to the present day. It is a phenomenon common to all religions and races, differing in manifestation, but sharing a similar foundation#8212the realization from personal experience that all things are interdependent, that the source is One. The mystical experience is often brief, immediate, maybe mysterious#8212a last experience that rbings all-embracing emotion (love) into the bounds of concrete reality. Bruno Borchert brings mysticism into sharp focus by exploring ideas and concepts from world religions and explaining Christian mystics in history, in perspective, and through art. He takes us from Zoroaster to European alchemists, explores the Hellenistic world, the feminine world-view, and the experience of God shard by saints and well-known mystics such as St. Theresa and St. Francis. Modern approaches explored by psychologists like Jung and Maslow, and the contemporary search for mystical love make this a necessary book for people who want to understand the spiritual path.

INTERIOR LIGHTS expresses a philosophy of interior self and a defense of metaphysical reality. The bulk of the book is composed of "trechos" (Port.), literary passages that contain the author's personal and philosophical meditations. Issues addressed include: what is a soul?, interior development through writing, bourgeois reality, metaphysical reality, and independent spirituality. From the book's preface, "Certain states of mind are required for a reader to gain something from this work. These are: 1) The ability to read slowly in order to reflect on unfamiliar or impolitic ideas, and 2) A sense of being at odds with society. The reader must feel the need to separate himself in some way from the world in which he lives. It is not for those who wish only to strengthen their position in it. 3) Most important of all, a reader must have a 'metaphysical sensibility'. He or she must be aware that the material world is not all that there is and that there is a dimension of reality not experienced in our daily object-oriented existence." "INTERIOR LIGHTS is essential reading for writers, publishers, literary agents, and all those interested in development of self through the writing process." -M. Dreisbach, Ph.D., CSU Professor Emeritus of Education "Your books are vivid and full of ideas. I quite agree with you that the world is in need of art and not historical scholars.... One can doubt everything but if one writes, one must be secretly a fanatic of one's mind." - E.M. Cioran "Richard Schain is a member of a small but significant group of 'independent' philosophers working outside of academic philosophy. I believe that his writings serve as powerful testimony to the value of the life of the mind, and the perennial urgency of the questions of metaphysics." - Geoffrey Klempner, D. Phil., Director of Studies, International Society for Philosophers; Editor, Philosophy Pathways

Mankind is at best a sorry herd of Panurgian sheep, following blindly the leader that happens to suit it at the moment. The majority, at any rate, hates to think for itself, and ignores the tremendous problems of man's inner nature. "Old times" are just like "modern times"; nothing is changed as to magical practices except that they have become still more esoteric and arcane, and that the caution of the adepts increases in proportion to the traveller's curiosity. Magic is indissolubly blended with the Religion of every country and is inseparable from its origin. It is as impossible for History to name the time when it was not, as that of the epoch when it sprang into existence, unless the doctrines preserved by the Initiates are taken into consideration. Modern society, on the authority of some men of Science, calls Magic charlatanry. Still, the whole ancient world, with its Scholars and Philosophers, its Sages and Prophets, believed in it. Where is the country in which it was not practiced? At what age was it banished, even from our own country? In the New World as in the Old Country (the latter far younger than the former), the Science of Sciences was known and practiced from the remotest antiquity. The Mexicans had their Initiates, their Priest-Hierophants and Magicians, and their crypts of Initiation. The Mexican pyramids are those of Egypt, built according to the same secret canon of proportion as those of the Pharaohs, and the Aztecs appear to have derived their civilization and religion in more than one way from the same source as the Egyptians and, before these, the Indians. Among all these three peoples arcane Natural Philosophy, or Magic, was cultivated to the highest degree. Herodotus knew that the real purpose of the pyramid was very different from that which he assigns to it. Were it not for his religious scruples, he might have added that, externally, it symbolized the creative principle of nature, and illustrated also the principles of geometry, mathematics, astrology, and astronomy. Internally, it was a majestic fane, in whose sombre recesses were performed the Mysteries, and whose walls had often witnessed the initiation-scenes of members of the royal family. The porphyry sarcophagus, which Professor Piazzi Smyth, Astronomer-Royal of Scotland, degrades into a corn-bin, was the baptismal font, upon emerging from which, the neophyte was "born again," and became an adept. Democritus applied himself to discover the method by which the Theurgists could produce them; in a word, his philosophy brought him to the conclusion that Magic was entirely confined to the application and the imitation of the laws and the works of nature. The true Theosophist knows indubitably that the Secret Doctrine of the East contains the Alpha and the Omega of Universal Science; that in its obscure texts, under the luxuriant, though perhaps too exuberant, growth of allegorical Symbolism, lie concealed the corner- and the key-stones of all ancient and modern knowledge. That Stone, brought down by the Divine Builder, is now rejected by the too-human workman, and this because, in his lethal materiality, man has lost every recollection, not only of his holy childhood, but of his very adolescence, when he was one of the Builders himself; when "the morning stars sang together, and the Sons of God shouted for joy," after they had laid the measures for the foundations of the earth — to use the deeply significant and poetical language of Job, the Arabian Initiate. But those who are still able to make room in their innermost selves for the Divine Ray, and who accept, therefore, the data of the Secret Sciences in good faith and humility, they know well that it is in this Stone that remains buried the absolute in Philosophy, which is the key to all those dark problems of Life and Death, some of which, at any rate, may find an explanation in these volumes. Like an immense boa constrictor, Error, in every shape, encircles mankind, trying to smother in her deadly coils every aspiration towards truth and light. But Error is powerful only on the surface, prevented as she is by Occult Nature from going any deeper; for the same Occult Nature encircles the whole globe, in every direction, leaving not even the darkest corner unvisited. And, whether by phenomenon or miracle, by spirit-hook or bishop's crook, Occultism must win the day, before the present era reaches Shani's (Saturn's) triple septenary" of the Western Cycle in Europe, in other words — before the end of the twenty-first century AD. People laugh at Magic! Men of Science, Physiologists and Biologists, deride the potency and even the belief in the existence of what is called in vulgar parlance "Sorcery" and "Black Magic." The archaeologists have their Stonehenge in England with its thousands of secrets, and its twin-brother Carnac of Brittany, and yet there is not one of them who even suspects what has been going on in its crypts, and its mysterious nooks and corners, for the last century. More than that, they do not even know of the existence of such "magic halls" in their Stonehenge, where curious scenes are taking place, whenever there is a new convert in view. The conscience of the Roman Catholic priest is most likely at peace. He works personally for no selfish purpose, but with the object of "saving a soul" from "eternal damnation." In his view, if Magic there be in it, it is holy, meritorious and divine Magic. Such is the power of blind faith. Hence, when we are assured by trustworthy and respectable persons of high social standing, and unimpeachable character, that there are many well-organized societies among the Roman Catholic priests which, under the pretext and cover of Modern Spiritualism and mediumship, hold séances for the purposes of conversion by suggestion, directly and at a distance. [1] The Adept of the "Left Hand" throws a spell without ceremony and by his sole disapproval, upon those with whose conduct he is dissatisfied, and whom he thinks it necessary to punish; he casts a spell, even by his pardon, over those who do him injury, and the enemies of Initiates never long enjoy impunity for their wrong-doing. The executioners of martyrs always perish miserably; and the Adepts are the martyrs of Intelligence. Providence seems to despise those who despise them, and puts to death those who would seek to prevent them from living. The legend of the Wandering Jew is the popular poetry of this arcanum. A people had sent a sage to crucifixion; that people had bidden him "Move on!" when he tried to rest for one moment. Well! that people will become subject, henceforth, to a similar condemnation; it will become entirely proscribed, and for long centuries it will be bidden "Move on! move on!" finding neither rest nor pity. Our modern Symbolist is superlatively clever only at detecting phallic worship and sexual emblems even where

none were ever meant. But for the true student of Occult Lore, White or Divine Magic could no more exist in Nature without its counterpart Black Magic, than day without night, whether these be of twelve hours or of six months' duration. For him everything in that Nature has an occult — a bright and a night-side to it. True, Left-hand Magic has lost its name, and along with it its rights to recognition. But its practice is in daily use; and its progeny, "magnetic influence," "power of oratory," "irresistible fascination," "whole audiences subdued and held as though under a spell," are terms recognized and used by all, generally meaningless though they now are. The real truth is that Magic is still in full sway amidst mankind, however blind the latter to its silent presence and influence on its members, however ignorant society may be, and remain, to its daily and hourly beneficent and maleficent effects. The world is full of such unconscious magicians — in politics as well as in daily life, in the Church as in the strongholds of Free-Thought. Most of those magicians are "sorcerers" unhappily, not metaphorically but in sober reality, by reason of their inherent selfishness, their revengeful natures, their envy and malice. The true student of Magic, well aware of the truth, looks on in pity, and, if he be wise, keeps silent. For every effort made by him to remove the universal cecity is only repaid with ingratitude, slander, and often curses, which, unable to reach him, will react on those who wish him evil. Lies and calumny — the latter a teething lie, adding actual bites to empty harmless falsehoods — become his lot, and thus the well-wisher is soon torn to pieces, as a reward for his benevolent desire to enlighten. "Strange Brew" is the title of a 1967 hit song from Cream's album Disraeli Gears, which featured the most psychedelic cover art ever. The song is what postmodern scholars, influenced by Fredric Jameson, would call a pastiche: its lyrics combine images of love, witchcraft, and getting stoned with a note-for-note rendition of Albert King's traditional blues song "Oh Pretty Woman." The song's title is a metaphor suggesting that words and music can mix to become a kind of magic potion. Strange Brew: Metaphors of Magic and Science in Rock Music traces the evolution of psychedelic music from its roots in rock and roll and the blues to its influence on popular music today, shows how metaphor is used to create the effects of songs and their lyrics, and explores how words and music came together as both a cause and effect of the cultural revolution of the nineteen-sixties.

Beginning in the late '60s, hundreds of thousands of Westerners descended upon India, disciples of a cultural revolution that proclaimed that the magic and mystery missing from their lives was to be found in the East. An Indian writer who has also lived in England and the United

States, Gita Mehta was ideally placed to observe the spectacle of European and American "pilgrims" interacting with their hosts. When she finally recorded her razor sharp observations in *Karma Cola*, the book became an instant classic for describing, in merciless detail, what happens when the traditions of an ancient and longlived society are turned into commodities and sold to those who don't understand them. In the dazzling prose that has become her trademark, Mehta skewers the entire Spectrum of seekers: The Beatles, homeless students, Hollywood rich kids in detox, British guilt-trippers, and more. In doing so, she also reveals the devastating byproducts that the Westerners brought to the villages of rural India -- high anxiety and drug addiction among them. Brilliantly irreverent, *Karma Cola* displays Gita Mehta's gift for weaving old and new, common and bizarre, history and current events into a seamless and colorful narrative that is at once witty, shocking, and poignant.
