This paper seeks to use the alcohol drinking experience as a mirror to view how the different theoretical perspectives are applied in the society. Thus the paper will analyze the social role played by alcohol drinking and the social significance of the places where the drinking takes place. This observational analysis will be benchmarked on the different sociology theories that have been accomplished in class.

Alcoholism from a social learning theory perspective

Past research show that alcoholics that stopped drinking on their own had higher self-efficiency compared to those that relapse (Vaillant 1995; as cited in Bandura, 2004). Those with high self-efficacy are less inclined to relapse and abuse alcohol in stressful situations (Marlatt & Gordon, 1980; as cited Florentine & Hillhouse, 2003).
