Since its original landmark publication in 1980, *A People's History of the United States* has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the, workplace. Known for its lively, clear prose as well as its scholarly research, *A People's History* is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, *A People's History of the United States*, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new after, word by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This chapter provides an overview of research examining gender role conflict, namely, the stress resulting from proscribed normative gender roles within and across diverse groups in the United States. Attention is given to the challenges related to the intersection of gender with other social identities, and emphasis is placed on the issues arising from gender roles in combination with stigmatized identities. Implications of gender role conflict for the psychological assessment and treatment of African Americans, Asian Americans, Latinas/os, and Native Americans are presented. Specific recommendations are suggested for future gender role conflict research with culturally diverse populations.

While conventional wisdom points to the Arab-Israeli War of 1967 as the gateway for the founding of the first Arab American national political organization, such advocacy in fact began with the Syrian nationalist movement, which emerged from immigration trends at the turn of the last century. Bringing this long-neglected history to life, *The Making of Arab Americans* overturns the notion of an Arab population that was too diverse to share common goals. Tracing the forgotten histories of the Free Syria Society, the New Syria Party, the Arab National League, and the Institute of Arab American Affairs, the book restores a timely aspect of our understanding of an area (then called Syria) that comprises modern-day Syria, Lebanon, Jordan, Israel, and Palestine. Hani Bawardi examines the numerous Arab American political advocacy organizations that thrived before World War I, showing how they influenced Syrian and Arab nationalism. He further offers an in-depth analysis exploring how World War II helped introduce a new Arab American identity as priorities shifted and the quest for assimilation intensified. In addition, the book enriches our understanding of the years leading to the Cold War by tracing both the Arab National League's transition to the Institute of Arab American Affairs and new campaigns to enhance mutual understanding between the United States and the Middle East. Illustrated with a wealth of previously unpublished photographs and manuscripts, *The Making of Arab Americans* provides crucial insight for contemporary dialogues.

This dissertation offers a history of Indian removal as a political issue from the War of 1812 to the signing of the Indian Removal Act in 1830. Its central argument is that federal removal policy emerged and evolved due to a precise and largely unforeseen sequence of events. Drawing on Indian treaties, journals of negotiations, minutes of cabinet meetings, Congressional debates, personal memoirs, and a variety of other sources, the dissertation charts and elucidates the evolution of United States Indian policy from a diplomatic to a domestic concern. One of the central themes of the dissertation is how most white statesmen gradually, once Anglo-American dominion was established east of the Mississippi River after the War of 1812, abandoned long-held notions of "assimilation" and instead viewed the American Indian communities as the quintessential "other." Chapter 1 examines American-Indian relations at the outbreak of the War of 1812. It argues that the federal government's policy toward the Native Americans was both contradictory and incompatible with the nation's desire for western expansion. Chapter 2 describes the establishment of American hegemony in eastern North America during and immediately after the War of 1812. Chapter 3 considers the efforts of the James Monroe

administration to reform the contradictory modes of interacting with the Indians. It argues that these efforts were stymied by the determination of Georgia to remove all Indians from their state, which led to clashes between the federal government and the state over Indian affairs. Chapters 4 and 5 discuss the fraudulent Treaty of Indian Springs, conducted with the Creeks in 1825, and its aftermath. They argue that the controversy over the treaty and its subsequent annulment created a political environment in which removal came to be viewed by the majority of politicians as the only solution to the tensions both in the American government and in the southern borderlands. Chapter 6 argues that Andrew Jackson inherited an unofficial policy of Indian removal in 1829 and describes the efforts of his administration to codify removal as official policy. Chapter 7 delineates the debate over the removal bill in Congress and the subsequent vote.

#### A Different Mirror for Young People Pearson Scott Foresman

In a campaign for state or local office these days, you're as likely today to hear accusations that an opponent advanced Obamacare or supported Donald Trump as you are to hear about issues affecting the state or local community. This is because American political behavior has become substantially more nationalized. American voters are far more engaged with and knowledgeable about what's happening in Washington, DC, than in similar messages whether they are in the South, the Northeast, or the Midwest. Gone are the days when all politics was local. With *The Increasingly United States*, Daniel J. Hopkins explores this trend and its implications for the American political system. The change is significant in part because it works against a key rationale of America's federalist system, which was built on the assumption that citizens would be more strongly attached to their states and localities. It also has profound implications for how voters are represented. If voters are well informed about state politics, for example, the governor has an
