"This outstanding study spans four rich civilizations in ancient Mexico, from 1500 B.C. to the Spanish conquest soon after A.D.1500: The "Olmecs," hunters and farmers who worshipped the man-jaguar and became the first great carvers in stone and jade. The culture of "Teotihuacan," with its sumptuous palaces and gigantic Pyramids of the Sun and the Moon. The "Toltec" dynasty, whose temples, wreathed with carvings of predatory beasts, serpents and warriors, testify to a new militaristic phase in Mexican history. The "Aztecs," fierce empire-builders whose gods demanded complex rituals and the blood of human sacrifice. Writing for students, travellers and non-specialists, Nigel Davies puts these fascinating cultures into historical context. Drawing on the latest research, he discusses their arts, beliefs and customs, and their changing economic and political conditions, to build up a vivid picture of life in the kingdoms of ancient Mexico." --provided by Goodreads.

Providing an original overview covering nearly 4,000 years of history, the book includes

approximately 350 works reproduced in lush colour illustrations: a large selection of pre-Columbian treasures, masterpieces dating from the colonial era and striking modern paintings and sculptures from the first half of the 20th century, many reproduced here for the first time. The book is divided into three sections: the mythologies and rituals of ancient Andean civilizations; their perpetuation, concealment, or hybridisation with Catholicism during the 18th and 19th centuries; and the rediscovery of Peruvian popular traditions and faiths in the 20th century, mainly due to the popular Indigenist movement.

E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time,

and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

In the architecture of Rudolf Steiner's great cosmological temple, this extraordinary course of lectures on spiritual beings forms the central pillar, taking its place with other important texts such as the fourth chapter of *An Outline of Esoteric Science* (CW 13); *The Spiritual Hierarchies and the Physical World* (CW 136); and *Inner Experiences of Evolution* (CW 132). These works outline a revolutionary angelological cosmology and lie at the heart of Steiner's mission to transform our understanding of the world by offering a new, non-dual, phenomenological path to a contemporary divine-spiritual-physical cosmology that is

angelological and theophanic. Steiner's approach is "contemporary" in that, being continuous with the most ancient understanding of the cosmos, he also discovers it for himself, through his own experience and consciousness, and expresses it in his own words with a logic and language appropriate to our time. Thus, he teaches us, his readers, to do the same. According to Rudolf Steiner, the world is made up of "beings." This includes the very ground of the world itself, the "Father being." His cosmology or angelology is personal, and it is known in relationship. Therefore, he presents it in terms of conditions and acts of consciousness and in relation to the divine spiritual beings whose conditions and activities they are. The spiritual world is always a world of beings. The twin realizations go together—that "I am an 'I'" and that "reality is comprised of other 'I' beings. Cosmology is angelology. Spiritual beings define all experience of reality.

How to Survive 2012 McFarland

Kinship, religion, and economy were not "natural" to humans, nor to species of apes that had to survive on the African savanna. Society from its very beginnings involved an uneasy necessity that often stood in conflict with humans' ape ancestry; these tensions only grew along with later, more complex—eventually colossal—sociocultural systems. The ape in us was not extinguished, nor obviated, by culture; indeed, our ancestry continues to place pressures on individuals and their sociocultural creations. Not just an exercise in history, this pathbreaking book dispels many myths about the beginning of society to gain new understandings of the many pressures on societies today.

The Encyclopaedia fills a gap in both the

history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks, with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures, but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology, and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science, and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort, and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries, dealing with both scientific and philosophical issues, to the extent that this work does. xi

PERSONAL NOTE FROM THE EDITOR
LOST CITIES & ANCIENT MYSTERIES OF THE SOUTHWEST

Springer Nature
For centuries the strange, exotic civilizations of the Aztecs, Mayas and Incas flowered in total separation from the rest of mankind. Then explorers stumbled on great pyramids and temples hidden in the forests of Guatemala and Yucatan, and fortress cities high up in the Andes, to find 'things

that have never been heard or seen before, or even dreamed about' (Bernal Diaz). In *The Ancient Sun Kingdoms of the Americas*, first published in 1960, Victor von Hagen describes the history and cultures of each of these early civilizations, drawing on a lifetime's experience of their sites, archeology and artifacts. His detailed knowledge of their institutions, economic structures and religious practices enables him to reconstruct the pattern of their daily life, and to explore their distinctive achievements in, for example, engineering, commerce and communications. The account is illustrated throughout with numerous photographs, line-drawings, and reproductions from original prints. 'The Ancient Sun Kingdoms of the Americas vividly fulfils the author's aim "to take these people out of the flow of the purely archaeological and put them back into the human stream of life".' —Daily Telegraph

This book traces the origin of the legend of El Dorado and the various expeditions that set out to locate that mysterious land of untold wealth in South America. Motivated by both fanciful rumors of a golden city ruled by a man who coated himself daily with gold dust, and the more practical allure of a region abundant in cinnamon trees (a spice that was worth its weight in gold to Europeans), many conquistadors convinced themselves that another native empire awaited their conquest. These quests for fortune and glory would lead to an encounter with fierce female warriors who were believed to be the Amazons of ancient Greek lore, and the discovery of the mighty river later named for the legendary Amazon tribe. The first half of this book details the lesser-known accounts of German interest in locating the wealth of a golden kingdom called Xerira and an elusive passage at Venezuela's Lake Maracaibo which supposedly led to the Pacific Ocean. The second section focuses on the various Spanish efforts to discover El Dorado, each of which was eventually doomed to despair,

disappointment, and death.

The examination of four great civilizations that existed before Columbus's arrival in North America offers evidence of sustained contact between the Old and New Worlds • Describes the cultural splendor, political might, and incredibly advanced technology of these precursors to our modern age • Shows that North America's first civilization, the Adena, was sparked by ancient Kelts from Western Europe and explores links between Hopewell Mound Builders and prehistoric Japanese seafarers Before Rome ruled the Classical World, gleaming stone pyramids stood amid smoking iron foundries from North America's Atlantic seaboard to the Mississippi River. On its east bank, across from today's St. Louis, Missouri, flourished a walled city more populous than London was one thousand years ago, with a pyramid larger--at its base--than Egypt's Great Pyramid. During the 12th century, hydraulic engineers laid out a massive irrigation network spanning the American Southwest that, if laid end to end, would stretch from Phoenix, Arizona, to the Canadian border. On a scale to match, they built a five-mile-wide dam from ten million cubic yards of rock.

While Europe stumbled through the Dark Ages, a metropolis of weirdly shaped, multistory superstructures, precisely aligned to the sun and moon, sprawled across the New Mexico Desert. Who was responsible for such colossal achievements? Where did their mysterious builders come from, and what became of them? These are some of the questions investigated by Frank Joseph in his examination of ancient influences at work on our continent. He reveals that modern civilization is not the first to arise in North America but was preceded instead by four high cultures that rose and fell over the past three thousand years: the Adena, Hopewell, Mississippian, and Anasazi-Hohokam. How they achieved greatness and why they vanished so completely are the intriguing enigmas explored by this unconventional prehistory of our country, *Advanced Civilizations of Prehistoric America*.

Join George and Mary Ayers in the late seventies when South America was a little rougher and a little wilder, for an incredible journey through Peru, the Amazon, Chile, and Bolivia. Fusing together details scoured from their personal journals, photos, and letters home, Buzzards and Bananas captures the essence of everything from the mundane and sometimes humorous moments of day-to-day travel to the emotional strains on relationships; from the excitement of a midnight Federales raid on their Amazon riverboat to the desperation and horrors of military rule. Along the way they spend time with remarkable people: an Argentine couple in love fleeing for their lives; a young man in Santiago whispering about the cruelty of government; a desperate American imprisoned in Bolivia and anthropologist Maria Reiche, the guardian of Peru's Nazca desert mystery. Buzzards and Bananas is more than a simple travelogue. George narrates his journey with enduring enthusiasm and heartfelt honesty bringing alive for us the reality of the times and places through which he travelled in a way seldom seen by those who have visited these South American countries.

Almon Fackrell ". . . And other sheep I have, which are not of this fold: them also I must bring, and they shall hear my voice . . ." (John 10:14-16) The Bible, being the most revered book of the Christians, along with the collected treasures of Mayan and Aztec antiquities, testifies: *Jesus Christ Visited Ancient America*. Being an enthusiast of Bible versions, and after visiting the Aztec and Mayan ruins in Mexico, Almon Fackrell was prompted to have this study and reveal the parallels of Christian belief and Ancient America's religion. With it, Almon Fackrell was able to account for 276 similarities, which prove that Israelites were in Ancient America! Discover for yourself the facts that have been written both in the Bible and the Popol Vuh. About the Author Almon Fackrell was born in Pingree, Idaho and raised in Arimo, Idaho. In 1953, he was drafted into the U.S. Army and was assigned to a Special Weapons Detachment in New Mexico at Sandia Base, Holloman Air Force Base and White Sands Proving Grounds. He attended the University of New Mexico and graduated at Sandia Corporation Engineering Trade School in Albuquerque. After thirty-seven years of drafting, designing, and engineering in the Aerospace Industry, he retired as a senior support engineer from Parker Hannifin Corporation in Irvine, California.

The Voynich Codex is one the most fascinating and bizarre manuscripts in the world. The manuscript (potentially equivalent to 232 pages), or more properly a codex, consists of many foldout pages. It has been divided by previous researchers into sections known as Herbal/Botanical/Pharmacology; Balenological/Biological; Cosmology; one page known as The Rosette; and a final Recipe section. All the sections contain text in an unknown writing system, yet to be deciphered. Cryptological analyses by modern computer programs nevertheless have determined that the language is real and not a hoax, as has been suggested by some. Despite the fact that this

codex is largely an herbal, the interpreters of this manuscript with two exceptions, have not been botanists. To this end, our recent research suggests that the Voynich is a 16th century codex associated with indigenous Indians of Nueva España educated in schools established by the Spanish. This is a breakthrough in Voynich studies. We are convinced that the Voynich codex is a document produced by Aztec descendants that has been unfiltered through Spanish editors. The flora of New Spain is vast, and the medicinal and culinary herbs used by the Aztecs were equally as copious. Even though it is our hypothesis that the Voynich Codex was written as a private herbal in 16th century New Spain, many of these herbs have relevance today because they or closely related species have been noted to be medicinal or have culinary value. The Voynich Codex has an estimated 359 illustration of plants (phytomorphs), 131 in the Herbal Section (large images) and 228 in the Pharmaceutical Section (small images of plant parts). In our book “Unraveling of the Voynich Codex”, to be published by Springer this summer, Tucker and Janick have partially identified species in the Herbal Section. In this proposed work, all of the plants of the Herbal Section will be identified along with those plants of the Pharmacology Section where identification is feasible. Each plant identification will include subdivisions to include descriptors (formal botanical identification), names in English, Spanish, and Mesoamerican names where known, ecology and range, and properties (medicinal and culinary) of these and related species. Photographs of the phytomorphs and contemporary plants will be included. These identifications represent hard evidence that the Voynich Codex is a 16th Century Mexican manuscript. Exploring the herbs of the Aztecs through the Voynich Codex will be a seminal work for all Voynich researchers and also of interest to a wider audience in medicinal and culinary herbs, artists, and historians. In summary, our new book project *Flora of the Voynich Codex* will provide a photo-illustrated guide to complete the botanical evidence related to the Voynich Codex, one of the most valuable historic texts of the 16th century.
