The Answers For Fraction Location

It is usually best to show an answer using the simplest fraction ($\frac{1}{2}$ in this case). That is called Simplifying, or Reducing the Fraction Numerator / Denominator. We call the top number the

Numerator, it is the number of parts we have. We call the bottom number the Denominator, it is the number of parts the whole is divided into.

Fractions - Math Goodies

To solve a fraction multiplication question in math, line up the 2 fractions next to each other.

Multiply the top of the left fraction by the top of the right fraction and write that answer

on top, then multiply the bottom of each fraction and write that answer on the bottom. Simplify the new fraction as much as possible.

- Proper fractions represent quantities less than 1.
- An improper fraction is a fraction in which the numerator is larger than or equal to the denominator.
- Any

number over itself equals 1. • Any number over 1 equals the number. • Fractions are called equivalent fractions if they represent the same quantity.

Simplifying Fractions | Math Goodies

Clear of fractions as follows: Multiply both sides of the equation -- every term -- by the LCM of denominators. Each denominator will then divide into its

multiple. We will then have an equation without fractions. The LCM of 3 and 5 is 15. Therefore, multiply both sides of the equation by 15.
