When you have
a fraction that
looks like this:
 $9/7$, simply
divide the
numerator by
the denominator
(divide the top
number by the
bottom
number).
Instead of
writing your
remainder as r
2, turn it into a
fraction by
putting the
remainder over
the divisor (7).
Now, your
answer is $1 \frac{2}{7}$.

Fractions on a number line (video) | Khan Academy So when we're talking about a fraction, $1/5$, it's not just talking about, hey, what part of a pizza pie have I eaten or something

like that. This is actually a number. This is a number. And we can actually plot it on the number line. Now you might say, OK, well, that's fair about $1/5$. But what about all these other slashes?

Calculator Use. Use this fraction calculator for adding, subtracting, multiplying and dividing fractions. Answers are fractions in lowest terms or mixed numbers in reduced form.

Input proper or improper fractions, select the math sign and click Calculate. This is a fraction calculator with steps shown in the solution.
