In this beautifully illustrated and closely argued book, a completely updated and much expanded third edition of his magisterial survey, Curl describes in lively and stimulating prose the numerous revivals of the Egyptian style from Antiquity to the present day. Drawing on a wealth of sources, his pioneering and definitive work analyzes the remarkable and persistent influence of Ancient Egyptian culture on the West. The author deftly develops his argument that the civilization of Ancient Egypt is central, rather than peripheral, to the development of much of Western architecture, art, design, and religion. Curl examines: the persistence of Egyptian

motifs in design from Graeco-Roman Antiquity, through the Medieval, Baroque, and Neo-Classical periods rise of Egyptology in the nineteenth and twentieth-century manifestations of Egyptianisms prompted by the discovery of Tutankhamun ' s tomb various aspects of Egyptianizing tendencies in the Art Deco style and afterwards. For students of art, architectural and ancient history, and those interested in western European culture generally, this book will be an inspiring and invaluable addition to the available literature.

What happened when one of today's best-loved food writers had a change of appetite? Here are the dishes that Diana Henry created when she started to crave a different kind of diet - less meat and heavy food, more vegetable-, fish-, and grain-based dishes - often inspired by the food of the Middle East and Far East, but also drawing on cuisines from Georgia to Scandinavia. In her year of good eating, Diana lost weight, but this was about much more than weight loss - lead by taste, it was about discovering a healthier, fresher way of eating. From a Cambodian salad of shrimps, grapefruit, toasted coconut, and mint or North African mackerel with cumin to blood orange and cardamom

sorbet, the magical dishes in this book are bursting with flavor, with goodness and with color. Peppering the recipes is Diana's inimitable writing on everything from the miracle of broth to the great carbohydrate debate. Above all, this is about opening up our palates to new possibilities. There is no austerity here, simply fabulous food that nourishes body and soul.

**Places Through the Body** Faber & Faber

One of the world's preeminent restaurant critics takes on the giants of haute cuisine, one tasting menu at a time, in this fascinating and riotous look at the business and pleasure of fine dining.

*The Deliberate Dumbing Down of America* Manchester University Press

This exciting collection opens up many new conversations on BodyPlace and introduces new theories of embodied places and the placing of bodies. Extensive introductory and concluding sections guide students through the key debates and themes. *Places Through the Body* draws on a wide range of contemporary examples and creative ideas to address such topics as: \* How racist ideologies are embedded in modern architectural discourse and practice \* How urban spaces make bodies disabled \* How the seemingly virtual worlds of knowledge and technology are embodied \* How gyms enable women body builders to make new kinds of bodies \* How male bodies are placed onto the silver screen \* New kinds of femininity Here geographers, architects, anthropologists, artists, film theorists, theorists of cultural studies and psycho-analysis

work alongside each other to make clear connections between bodies and places.

Marc Basset has a well-deserved reputation as a pitiless restaurant critic. When he writes a devastating review of a celebrated restaurant, the chef commits suicide, roasting himself in his own fan-assisted oven, with Basset's review pasted to the door. Suddenly Basset is moved to do something he has never done before: apologize. Startled by the widow's forgiveness and absolution, he feels unexpectedly euphoric. In an effort to maintain this newfound state of bliss, he decides to gorge himself on contrition by apologizing to every person he has ever done wrong. And that's just the beginning. After a series of virtuoso expressions of regret, word of Basset's mollifying power spreads, and he is tapped to become Chief Apologist for the United Nations. His job is to travel the globe in his own Gulfstream V private jet, apologizing for everything from colonialism through exploitation to slavery. It is a role that brings him fame, wealth, and access to a lot of very good chocolate. But in a world overdosing on emotion, does Marc Basset really have the stomach to become the sorriest man in history? Built of delicate layers of heinous crime, forgiveness, and outrageous gastronomy, Jay Rayner's hilarious new novel is an arch comedy of modern appetite and etiquette.

Britain's culinary Moses brings us the new foodie rules to live by, celebrating what and how we eat The Ten Commandments may have had a lot going for them, but they don't offer those of us located in the 21st Century much in the way of guidance when it comes to our relationship with our food. And Lord knows we need it. Enter our new culinary Moses, the legendary restaurant critic Jay Rayner, with a new set of hand-tooled commandments for this food-obsessed age. He deals once and for all with questions like whether it is ever okay to covet thy neighbour's oxen (it is), eating with your hands (very important indeed) and if you should cut off the fat (no). Combining reportage and anecdotes with recipes worthy of adoration, Jay Rayner brings us the new foodie rules to live by.

In this tart, tautly written, hilariously funny insider look at the restaurant business, Trevor White offers an impassioned, unbiased exposé of the world of dining out. From the most fashionable tables in New York, London, and Paris to local fast-food chains, he takes us behind the scenes and demonstrates that all too often we are being conned or cowed by overrated, egomaniacal chefs,

of a worthy eatery. A scathing attack on gourmet dogma, White's defiantly populist critique of today's restaurant culture redefines the dining room as a place in which people have the right to be satisfied rather than intimidated. Included, too, is a fascinating conversation between celebrity chef Anthony Bourdain and the author, where both reveal their respective viewpoints on the culinary world. Book jacket.

The Oyster House Siege Routledge

It's General Election night, 1983. The great and good have gathered in the Jermyn Street Oyster House in central London to celebrate the Tory victory. But when two masked gunmen burst through the door and take a group of diners hostage in the restaurant kitchen, none of them has any idea how hellish their night has just now become. As the hours tick by the terrified hostages grow increasingly aware that they are surrounded by glinting blades and trapped with a psychopath who can't wait to start using them. They may not be able to stand the heat, but there's little chance they'll ever get out of the kitchen.

Times of the Technoculture explores the social and cultural impact of new technologies, tracing the origins of the information society from the coming of the machine with the industrial revolution to the development of mass production techniques in the early twentieth century. The authors look at how the military has controlled the development of the information society, and consider the centrality of education in government attempts to create a knowledge society. Engaging in contemporary debates surrounding the internet, Robins and Webster question whether it can really offer us a new world of virtual communities, and suggest more radical alternatives to the corporate agenda of contemporary technologies.

In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to

covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

I have been a restaurant critic for over a decade, written reviews of well over 700 establishments, and if there is one thing I have learnt it is that people like reviews of bad restaurants. No, scratch that. They adore them, feast upon them like starving vultures who have spotted fly-blown carrion out in the bush. They claim otherwise, of course. Readers like to present themselves as private arbiters of taste; as people interested in the good stuff. I'm sure they are. I'm sure they really do care whether the steak was served au point as requested or whether the soufflé had achieved a certain ineffable lightness. And yet, when I compare dinner to bodily fluids, the room to an S & M chamber in Neasden (only without the glamour or class), and the bill to an act of grand larceny, why, then the baying crowd is truly happy. Don't believe me? Then why, presented with the chance to buy this ebook filled with accounts of twenty restaurants - their chefs, their owners, their poor benighted front of house staff - getting a complete stiffing courtesy of the sort of vitriolic bloody-curdling review which would make the victims call for their mummies, did you

Don't miss the first epic She-Ra and the Princesses of Power graphic novel, based on stories by showrunner Noelle Stevenson! Even after everything that's happened, the world outside the Horde's walls is still a strange one to Adora. Each day she's learning more about her growing powers as She-Ra, including something new: the ability to heal corrupted runestones.

Runestones are the magical source from which princesses like Frosta, Mermista, and Perfuma draw their power, but Glimmer knows of another runestone -- one with a dark past. Long ago a fire princess ruled the lands to

the west, until her thirst for power corrupted her, and led to the ruin of her kingdom. Glimmer thinks the lost fire runestone could give the Rebellion an edge in the fight against the Horde, but claiming this ancient power won't be easy... especially not when the Horde has their eyes set on the same prize. Don't miss this original graphic novel based on stories by She-Ra showrunner and New York Times bestselling author Noelle Stevenson, with script by Gigi D.G. and art by Paulina Ganucheau!

That the longstanding antagonism between science and religion is irreconcilable has been taken for granted. And in the wake of recent controversies over teaching intelligent design and the ethics of stem-cell research, the divide seems as unbridgeable as ever. In *Science vs. Religion*, Elaine Howard Ecklund investigates this unexamined assumption in the first systematic study of what scientists actually think and feel about religion. In the course of her research, Ecklund surveyed nearly 1,700 scientists and interviewed 275 of them. She finds that most of what we believe about the faith lives of elite scientists is wrong. Nearly 50 percent of them are religious. Many others are what she calls "spiritual entrepreneurs," seeking creative ways to work with the tensions between science and faith outside the constraints of traditional religion. The book centers around vivid portraits of 10 representative men and women working in the natural and social sciences at top American research universities. Ecklund's respondents run the gamut from Margaret, a chemist who teaches a Sunday-school class, to Arik, a physicist who chose not to believe in God well before he decided to become a scientist. Only a small

minority are actively hostile to religion. Ecklund reveals how scientists-believers and skeptics alike-are struggling to engage the increasing number of religious students in their classrooms and argues that many scientists are searching for "boundary pioneers" to cross the picket lines separating science and religion. With broad implications for education, science funding, and the thorny ethical questions surrounding stem-cell research, cloning, and other cutting-edge scientific endeavors, *Science vs. Religion* brings a welcome dose of reality to the science and religion debates.
