Student Workbook for use with The Art of Public Speaking Samaira Book Publishers A veteran journalist discovers an ancient system of speech techniques for overcoming the fear of public speaking—and reveals how they can profoundly change our lives. In 2010, award-winning journalist John Bowe learned that his cousin Bill, a longtime extreme recluse living in his parents' basement, had, at the age of fifty-nine, overcome a lifetime of shyness and isolation—and gotten happily married. Bill credited his turnaround to Toastmasters, the world's largest organization devoted to teaching the art of public speaking. Fascinated by the possibility that speech training could foster the kind of psychological well-being more commonly sought through psychiatric treatment, and intrigued by the notion that words can serve as medicine, Bowe set out to discover the origins of speech training—and to learn for himself how to speak better in public. From the birth of democracy in Ancient Greece until two centuries ago, education meant, in addition to reading and writing, years of learning specific, easily taught language techniques for interacting with others. Nowadays, absent such education, the average American speaks 16,000 to 20,000 words every day, but 74 percent of us suffer from speech anxiety. As he joins Toastmasters and learns, step-by-step, to successfully overcome his own speech anxiety, Bowe muses upon our record levels of loneliness, social isolation, and political divisiveness. What would it mean for Americans to learn once again the simple art of talking to one another? Bowe shows that learning to speak in public means more than giving a decent speech without nervousness (or a total meltdown). Learning to connect with others bestows upon us an enhanced sense of freedom, power, and belonging.

The efficiency of a book is like that of a man, in one important respect: its attitude toward its subject is the first source of its power. A book may be full of good ideas well expressed, but if its writer views his subject from the wrong angle even his excellent advice may prove to be ineffective. This book stands or falls by its authors' attitude toward its subject. If the best way to teach oneself or others to speak effectively in public is to fill the mind with rules, and to set up fixed standards for the interpretation of thought, the utterance of language, the making of gestures, and all the rest, then this book will be limited in value to such stray ideas throughout its pages as may prove helpful to the reader-as an effort to enforce a group of principles it must be reckoned a failure, because it is then untrue. It is of some importance, therefore, to those who take up this volume with open mind that they should see clearly at the out-start what is the thought that at once underlies and is builded through this structure. In plain words it is this: Training in public speaking is not a matter of externals-primarily; it is not a matter of imitation-fundamentally; it is not a matter of conformity to standards-at all. Public speaking is public utterance, public issuance, of the man himself; therefore the first thing both in time and in importance is that the man should be and think and feel things that are worthy of being given forth. Unless there be something of value within, no tricks of training can

ever make of the talker anything more than a machine-albeit a highly perfected machine-for the delivery of other men's goods. So self-development is fundamental in our plan. The second principle lies close to the first: The man must enthrone his will to rule over his thought, his feelings, and all his physical powers, so that the outer self may give perfect, unhampered expression to the inner. It is futile, we assert, to lay down systems of rules for voice culture, intonation, gesture, and what not, unless these two principles of having something to say and making the will sovereign have at least begun to make themselves felt in the life.
