Stanley Robinson is always an event and Red Moon doesn't disappoint' - Independent 'Sci-fi fans will love the detail and the optimism about humanity's future in space' - Wall Street Journal IT IS THIRTY YEARS FROM NOW, AND WE HAVE COLONISED THE MOON. American Fred Fredericks is making his first trip, his purpose to install a communications system for China's Lunar Science Foundation. But hours after his arrival he witnesses a murder and is forced into hiding. It is also the first visit for celebrity

travel reporter Ta Shu. He has contacts and influence, but he too will find that the moon can be a perilous place for any traveller. Finally, there is Chan Qi. She is the daughter of the Minister of Finance, and without doubt a person of interest to those in power. She is on the moon for reasons of her own, but when she attempts to return to China in secret, the events that unfold will change everything - on the moon, and on Earth. Red Moon is a magnificent novel of space exploration and political revolution from New York Times bestselling

George Fergusson is one of them--he works as a trek guide for "Take You Higher, Ltd.", leading groups of tourists into the back country and occasionally assisting on serious climbs.	George "Fred" Fredericks is another--a tall, easy-going American who converted to Buddhism while in college. He visited Nepal one year and never went home. The adventures started when George and Fred got together over the capture of a Yeti--an abominable snowman--by a scientific expedition. The thought of such a wild and mysterious creature in captivity--in prison--was too much for them to bear. And in freeing the Yeti, a great partnership was born. George and Freds will go on to greater heights as they explore the mysteries of Nepal, from Shangri-La to Kathmandu's governmental bureaucracy, in <i>Escape from Kathmandu</i> by	Kim Stanley Robinson.
