Peace Vision This book challenges the dominant scholarly notion that the Qur ' n must be interpreted through the medieval commentaries shaped by the biography of the prophet Muhammad, arguing instead that the text is best read in light of Christian and Jewish scripture. The Qur ' n, in its use of allusions, depends on the Biblical knowledge of its audience. However, medieval Muslim commentators, working in a context of religious rivalry, developed stories that separate Qur ' n and Bible, which this book brings back together. In a series of studies involving the devil, Adam, Abraham, Jonah, Mary, and Muhammad among others, Reynolds shows how modern translators of the Qur ' n have followed medieval Muslim commentary and demonstrates how an appreciation of the Qur ' n ' s Biblical subtext uncovers the richness of the Qur ' n ' s discourse. Presenting unique interpretations of 13 different sections of the Qur ' n based on studies of earlier Jewish and Christian literature, the author substantially re-evaluates Muslim exegetical literature. Thus The Qur ' n and Its Biblical Subtext, a work based on a profound regard for the Qur ' n ' s literary structure and rhetorical strategy, poses a substantial challenge to the standard scholarship of Qur ' nic Studies. With an approach that bridges early Christian history and Islamic origins, the book will appeal not only to students of the Qur ' an but of the Bible, religious studies

and Islamic history.

This book contains a summary of The Bible The Quran and Science 2014 of Dr. Maurice Bucaille, The biography of prophet Muhammad (pbuh), An Islamic prayer book according to Quran and Sunnah, and last but not least is that this book also contains "The Qur'an & Modern Science: Compatible or Incompatible? 2014"

by Dr. Zakir Naik and Mr.Faisal Fahim.
This is an A to Z book on Islam, Quran, Bible, Torah, Science And it also includes the Islamic prayer book with a biography of the prophet. This book seeks to spiritually unite by highlighting similarities in the texts. It sheds new light and dispels many preconceived ideas in separating what belongs to Revelation from what is the product of error or human interpretation. (The Qur'an & Modern Science: Compatible or Incompatible?) Ever since the dawn of human life on this planet, Man has always sought to

understand Nature, his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'an, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains

Divine guidance for all humankind. Since the message of the Qur'an is believed to be for all times, it should be relevant to every age. Does the Qur'an pass this test? In this booklet, I intend to give an objective analysis of the Muslim belief regarding the Divine origin of the Qur'an, in the light of established scientific discoveries. There was a time, in the history of world civilization, when 'miracles', or what was perceived to be a miracle, took precedence over human reason and logic. But how do we define the term 'miracle'? A miracle is anything that takes place out of the normal course of life and for which humankind has no explanation. However, we must be careful before we accept something as a miracle. An article in 'The Times of India', Mumbai, in 1993 reported that 'a saint' by the name 'Baba Pilot' claimed to have stayed continuously submerged under water in a tank for three consecutive days and nights. However, when reporters wanted to examine the base of the tank of water where he claimed to have performed this 'miraculous' feat, he refused to let them do so. He argued by asking as to how one could examine the womb of a mother that gives birth to a child. The 'Baba' was hiding something. It as a gimmick simply to gain publicity.

Modern Science: Compatible or Incompatible?
Routledge
This excellent and extremely popular work is an examination of the holy scriptures in light of modern knowledge. When speaking of the Quran, the author says, "Why should we be surprised at the Islamic view of science when we know that, for Islam, religion and science have always been considered twin sisters. From the very beginning, Islam directed people to cultivate science."

At the end of a five-year journey to find out what religious Americans think about science, Ecklund and Scheitle emerge with the real story of the relationship between science and religion in American culture. Based on the most comprehensive survey ever d one- representing

a range of religious traditions and faith positions- Religion vs. Science is a story that is more nuanced and complex than the media and pundits would lead us to believe. The way religious Americans approach science is shaped by two fundamental questions: What does science mean for the existence and activity of God? What does science mean for the sacredness of humanity? How these questions play out as individual believers think about science both challenges stereotypes and highlights the real tensions between religion and science. Ecklund and Scheitle interrogate the widespread myths that religious people dislike science and scientists and deny scientific theories. Religion vs. Science is a definitive statement on a timely, popular subject. Rather than a highly conceptual approach to historical debates, philosophies, or personal opinions, Ecklund and Scheitle give readers a facts-on-the-ground, empirical look at what religious Americans really understand and think

about science.

Createspace Independent Publishing Platform Do you yearn to build a closer and more meaningful relationship with your Creator? Do you seek to know the true Message and Wisdom of

Islam? The work I present here for your consumption is more than a book; a collection of words meant to deliver glad tidings, to educate, and to perhaps warn. It is a work driven by what I intend to be a sound and powerful Message. This message invites readers to think freely and broaden their minds; to contemplate and seek their own truth. This passage advises people, never to blindly follow any religion without first reflecting upon the faith in question and reasoning its true meaning. Beyond all manner of faith and feeling, one must use their intellect to

discover the truth behind all faiths. This passage is intended to draw and empower the sincere seeker of truth; the one that questions, reflects and ponders his or her life's purpose and questions his/her future and direction. Islam, for example, is one faith that is misunderstood and misrepresented by many. Before one forms an opinion of Islam, one should question the thoroughness and truthfulness of his or her existing knowledge of this controversial religion. The ultimate purpose of this message is to facilitate a fresh new

dimension of thinking that will enable one to realize the ultimate importance of his or her existence in this universe; to help one understand his/her divine relationship with his/her creator. The faith of Islam is beneficial only to people that are sincere in seeking guidance, misguiding those who are not sincere and honest in their spiritual quests; who reject divine guidance and spiritual truth. The Promised Messiah(as) wrote Fountain of Christianity in March 1906, in response to the book Yansbi-ul-Islam, in which a Christian gentleman has tried to prove that the Holy Quran does not contain any new teachings and that the Holy Prophet(sa) merely copied the narratives from past scriptures-God forbid. The Promised Messiah(as) responded to this objection, first, by raising serious doubts about the authenticity of the

Christian Gospels, and then went on to show how the Holy Quran is a unique and peerless book, how so many of its prophecies have been fulfilled, and how its blessings live on to this day. In this small book, the author also argues against the doctrines of Trinity and Atonement held by present-day Christians, and shows that these beliefs have nothing to do with the teachings of Jesus(as) himself. The second part of the book, or Epilogue, consists of a profound thesis on the meaning of true salvation. The Promised Messiah(as) describes salvation

as "The abiding peace and happiness which man, by his very nature, hungers and thirsts for, and which is achieved through personal love and recognition of God, and through a perfect relationship with Him."

Islamic Books
Countless juristic works have been composed on the Hajj and the Umrah--the major and minor Islamic pilgrimage to Mecca--with meticulous attention to the proper manner of performing their rites in keeping with the relevant legal rulings derived from

the Qur'an and the Prophetic Sunnah. Far fewer works, however, have been devoted to the inner meanings of these rituals and the spiritual benefit and significance they hold for the pilgrim. Approaching the topic through an etymological and historical analysis of the words used to describe the pilgrimage rites, and tracing the semantic links among relevant terms as they appear in the Jewish, Christian, and Islamic scriptures, this insightful and fascinating study seeks to unlock some of the mysteries hidden within the Hajj rituals. In so doing, it shows that,

far from being mere re-enactments of stories from antiquity and their exoteric meanings, these rites function as symbols of inner realities, both earthly and heavenly, and as stages in the pilgrim's spiritual journey from death to resurrection and hence, to spiritual enlightenment. The Bible, the Qur'an, and Science Kazi Publications A complete Dawah book for everyone. A book for all Muslims and all Non-Muslims. This book is based on facts, evidences and it provides all

references Early History of the Children of Israel Steerforth Qur'anic Hermeneutics argues for the importance of understanding the polysemous nature of the words in the Qur'an and outlines a new method of Qur'anic exegesis called intertextual polysemy. By interweaving science, history and religious studies, Abdulla Galadari introduces a linguistic approach which draws on neuropsychology. This book features examples of intertextual polysemy within the Qur'an, as well as between the Qur'an

and the Bible. It provides examples that intimately engage with Christological concepts of the Gospels, in addition to examples of allegorical interpretation through inner-Qur'anic allusions. Galadari reveals how new creative insights are possible, and argues that the Qur'an did not come to denounce the Gospel – which is one of the stumbling blocks between Islam and Christianity – but only to interpret it in its own words.
