The Italian Boy Hodder & Stoughton

By 1950, an estimated 50,000 people had been deemed 'defective' by the government and detained for life under the 1913 Mental Deficiency Act. Their 'crimes' were various: women with children born outside of wedlock; rebellious teenagers caught shoplifting; those with learning disorders, speech impediments and chronic illnesses who had struggled in school; and, of course, those who were simply 'different'. Forcibly removed from their families and confined to a shadow world of specialist facilities in the countryside, they were hidden away and forgotten about - out of sight, out of mind. Through painstaking archival research, Sarah Wise pieces together the lives irrevocably changed by this devastating legislation and provides a compelling study of how early 20th-century attitudes to class, gender and disability have continued to shape social policy.

A new edition of this award-winning modern classic, with an introduction by Tayari Jones (An American Marriage), an excerpt from the never before seen follow-up, and discussion guide. Pakersfield, Georgia, 1958: Thirteen-year-old Tangy Mae Quinn is the sixth of ten fatherless siblings. She is the darkest-skinned among them and therefore the ugliest in her mother, Rozelle's, estimation, but she's also the brightest. Rozelle—beautiful, charismatic, and light-skinned—exercises a violent hold over her children. Fearing abandonment, she pulls them from school at the age of twelve and sends them to earn their keep for the household, whether in domestic service, in the fields, or at "the farmhouse" on the edge of town, where Rozelle beds local men for money. But Tangy Mae has been selected to be part of the first integrated class at a nearby white high school. She has a chance to change her life, but can she break from Rozelle's grasp without ruinous—even fatal—consequences?

Critical Essays on Arthur Morrison and the East End Random House

The phenomenon of false allegations of mental illness is as old as our first interactions as human beings. Every one of us has described some other person as crazy or insane, and most all of us have had periods, moments at least, of madness. But it took the confluence of the law and medical science, mad—doctors, alienists, priests and barristers, to raise the matter to a level of "science," capable of being used by conniving relatives, "designing families" and scheming neighbors to destroy people who found themselves in the way, people whose removal could provide their survivors with money or property or other less frivolous benefits. Girl Interrupted in only a recent

example. And reversing this sort of diagnosis and incarceration became increasingly more difficult, as even the most temperate attempt to leave these "homes" or "hospitals" was deemed "crazy." Kept in a madhouse, one became a little mad, as Jack Nicholson and Ken Kesey explain in *One Flew Over the Cuckoo's Nest*. In this sadly terrifying, emotionally moving, and occasionally hilarious book, twelve cases of contested lunacy are offered as examples of the shifting arguments regarding what constituted sanity and insanity. They offer unique insight into the fears of sexuality, inherited madness, greed and fraud, until public feeling shifted and turned against the rising alienists who would challenge liberty and freedom of people who were perhaps simply "difficult," but were turned into victims of this unscrupulous trade. This fascinating book is filled with stories almost impossible to believe but wildly engaging, a book one will not soon forget.

Ordinary Lives, Death, and Social Class focuses on the evolution of the Dublin City Coroner's Court and on Dr Louis A. Byrne's first two years in office. Wrapping itself around the 1901 census, the study uses gender, power, and blame as analytical frameworks to examine what inquests can tell us about the impact of urban living from lifecycle and class perspectives. Coroners' inquests are a combination of eyewitness testimony, expert medico-legal language, detailed minutiae of people, places, and occupational identities pinned to a moment in time. Thus they have a simultaneous capacity to reveal histories from both above and below. Rich in geographical, socio-economic, cultural, class, and medical detail, these records collated in a liminal setting about the hour of death bear incredible witness to what has often been termed 'ordinary lives'. The subjects of Dr Byrne's court were among the poorest in Ireland and, apart from common medical causes problems linked to lower socio-economic groups, this volume covers preventable cases of workplace accidents, neglect, domestic abuse, and homicide.

In October 2005 Canongate launched a competition with *The Times* to find an artist to illustrate Yann Martel's international bestseller. From thousands of entries, Croatian artist Tomislav Torjanac was chosen as the illustrator for this new edition of *Life of Pi*. Now readers can enjoy this extraordinary tale with his glorious colour illustrations.

Go-go is the conga drum-inflected black popular music that emerged in Washington, D.C., during the 1970s. The guitarist Chuck Brown, the "Godfather of Go-Go," created the music by mixing sounds borrowed from church and the blues with the funk and flavor that he picked up playing for a local Latino band. Born in the inner city, amid the charred ruins of the 1968 race riots, go-go generated a distinct culture and an economy of independent, almost exclusively black-owned businesses that sold tickets to shows and recordings of live go-gos. At the peak of its popularity, in the 1980s, go-go could be heard around the capital every night of the week, on college campuses and in crumbling historic theaters, hole-in-the-wall nightclubs, backyards, and city parks. *Go-Go Live* is a social history of black Washington told through its go-go music and culture. Encompassing dance moves, nightclubs, and fashion, as well as the voices of artists, fans, business owners, and politicians, Natalie Hopkinson's Washington-based narrative reflects the broader history of race in urban America in the second half of the twentieth century and the early twenty-first. In the 1990s, the middle class that had left the city for the suburbs in the postwar years began to return. Gentrification drove up property values and pushed go-go into D.C.'s suburbs. The *Chocolate City* is in decline, but its heart, D.C.'s distinctive go-go musical culture, continues to beat. On any given night, there's live go-go in the D.C. metro area.

In Victorian London, filth was everywhere: horse traffic filled the streets with dung, household rubbish went uncollected, cesspools brimmed with "night soil," graveyards teemed with rotting corpses, the air itself was choked with smoke. In this intimately visceral book, Lee Jackson guides us through the underbelly of the Victorian metropolis, introducing us to the men and women who struggled to stem a rising tide of pollution and dirt, and the forces that opposed them. Through thematic chapters, Jackson describes how Victorian reformers met with both triumph and disaster. Full of individual stories and overlooked details—from the dustmen who grew rich from recycling, to the peculiar history of the public toilet—this riveting book gives us a fresh insight into the minutiae of daily life and the wider challenges posed by the unprecedented growth of the Victorian capital.

Life Forever

Disease and crime are increasingly conflated in the contemporary world. News reports proclaim "epidemics" of crime, while politicians denounce terrorism as a lethal pathological threat. Recent years have even witnessed the development of a new subfield, "epidemiological criminology," which merges public health with criminal justice to provide analytical tools for criminal justice practitioners and health care professionals. Little attention, however, has been paid to the historical contexts of these disease and crime equations, or to the historical continuities and discontinuities between contemporary invocations of crime as disease and the emergence of criminology, epidemiology, and public health in the second half of the nineteenth century. When, how and why did this pathologization of crime and criminalization of disease come about? This volume addresses these critical questions, exploring the discursive construction of crime and disease across a range of geographical and historical settings.

In a novel as warm and embracing as a family kitchen, Barbara O'Neal explores the poignant, sometimes complex relationships between mothers and daughters—and the healing magic of homemade bread. Professional baker Ramona Gallagher is a master of an art that has sustained her through the most turbulent times, including a baby at fifteen and an endless family feud. But now Ramona's bakery threatens to crumble around her. Literally. She's one water-heater disaster away from losing her grandmother's rambling Victorian and everything she's worked so hard to build. When Ramona's soldier son-in-law is wounded in Afghanistan, her daughter, Sophia, races overseas to be at his side, leaving Ramona as the only suitable guardian for Sophia's thirteen-year-old stepdaughter, Katie. Heartbroken, Katie feels that she's being dumped again—this time on the doorstep of a woman out of practice with mothering. Ramona relies upon a special set of tools—patience, persistence, and the reliability of a good recipe—when rebellious Katie arrives. And as she relives her own history of difficult choices, Ramona shares her love of baking with the troubled girl. Slowly, Katie begins to find self-acceptance and a place to call home. And when a man from her past returns to offer a second chance at love, Ramona discovers that even the best recipe tastes better when you add time, care, and a few secret ingredients of your own. **BONUS:** This edition includes an excerpt from Barbara O'Neal's *The All You Can Dream Buffet*.

Ordinary Lives, Death, and Social Class Bodley Head Childrens

Neighbours, Distrust, and the State overturns many of our ideas about how the poorer working class lived together, and thought about each other, from the mid-nineteenth to the mid-twentieth century. The reality was quite different to what has been the accepted historical belief; that of an unbreakable solidarity between neighbours against 'outsiders', particularly in rejecting any interference by government in their lives and communities. But the views of women and others who were less powerful in these neighbourhoods have often been ignored. This study shows the diversity of opinion-and tensions and fears-that existed. In fact, many of the poor wanted the authorities to have a bigger role, particularly to deal with neighbourhood problems and the personal failings and untrustworthiness of those they saw around them. Many people also just wanted better provision of services by the state. As well as being a direct challenge to much that has been written about this issue, this study is also timely because of its contemporary political relevance. Many of the points it makes are important to challenge the idea that comprehending a 'lost' solidarity of working-class neighbourhoods is the only way to understand current political developments in those areas. It looks at issues such as: relationships with the police; friendly societies; housing; compulsory education; and the extent to which Labour politicians did or did not represent the views of the poor.
