A burial chamber beneath the Palace of the Popes in Avignon. A 2,000-year-old skeleton. A conspiracy that will shake the foundations of the world. Here lie the bones of Jesus of Nazareth.

*The Bone Thief* Harper Collins

'If you like Kathy Reichs, you'll like Jefferson Bass' The Times. Miranda Lovelady, Dr Bill Brockton's protégé, is spending the summer helping excavate a newly discovered chamber beneath the spectacular Palace of the Popes in Avignon, France. There she discovers a stone chest inscribed with a stunning claim: inside lie the bones of none other than Jesus of Nazareth. Faced with the case of the millennium, Miranda summons Brockton for help proving or refuting the claim.

Both scientists are sceptical - after all, fake relics abounded during the Middle Ages - but the evidence for authenticity soon grows. Brockton and Miranda link the bones to the haunting image on the Shroud of Turin, revered by millions as the burial cloth of Christ and a laboratory test finds that the bones are 2,000 years old. The finding triggers a deadly tug of war between the anthropologists, the Vatican and a deadly zealot who hopes to use the bones to bring about the Second Coming . . . and trigger the end of time.

" Fans of the forensics-oriented novels of such mystery writers as Kathy Reichs and Patricia Cornwell...not to mention television series like CSI: Crime Scene Investigation, will make an eager audience for this one. " —Booklist On a patch of land in the Tennessee hills, human corpses decompose in the open air, aided by insects, bacteria, and birds, unhindered by coffins or mausoleums. This is Bill Bass ' s " Body Farm, " where nature takes its course as bodies buried in shallow graves, submerged in water, or locked in car trunks serve the needs of science and the cause of justice. In *Death ' s Acre*, Bass invites readers on an unprecedented journey behind the gates of the Body Farm where he revolutionized forensic anthropology. A master scientist and an engaging storyteller, Bass reveals his most intriguing cases for the first time. He revisits the Lindbergh kidnapping and murder, explores the mystery of a headless corpse whose identity astonished police, divulges

how the telltale traces of an insect sent a murderous grandfather to death row—and much more. INCLUDES PHOTOGRAPHS

The Bones of Avignon Hachette UK

Jefferson Bass's Cut to the Bone, the long-awaited prequel to his New York Times bestselling mystery series, turns the clock back to reveal the Body Farm's creation—and Dr. Bill Brockton's deadly duel with a serial killer. In the summer of 1992, Arkansas Governor Bill Clinton and Tennessee Senator Albert Gore begin their long-shot campaign to win the White House. In the sweltering hills of Knoxville at the University of Tennessee, Dr. Bill Brockton, the bright, ambitious young head of the Anthropology Department, launches an unusual—some would call it macabre—research facility, unlike any other in existence. Brockton is determined to revolutionize the study of forensics to help law enforcement better solve crime. But his plans are derailed by a chilling murder that leaves the scientist reeling from a sense of *déjà vu*. Followed by another. And then another: bodies that bear eerie resemblances to cases from Brockton's past. But as the body count rises, the victims' fatal injuries grow more and more distinctive—a spiral of death that holds dark implications for Brockton...and everyone he holds dear.

"The forensic thriller meets a formidable slice of history....A riveting mystery with an intricately emotional conclusion." —Washington Post

Bones of Betrayal is the fourth heart-racing "Body Farm" thriller from the world's top forensic anthropologist. Kathy Reichs calls author Jefferson Bass, "the real deal," and his hero Bill Brockton has already taken his rightful place alongside Patricia Cornwell's Kay Scarpetta and the investigators on TV's "C.S.I." In Bones of Betrayal, a hideous murder has links that connect it to World War Two's Manhattan Project and the development of the atomic bomb—adding a fascinating historical element that enriches an already superior crime series.

#### My Vietnam War Harper Collins

There is no scientist in the world like Dr. Bill Bass. A pioneer in forensic anthropology, Bass created the world's first laboratory dedicated to the study of human decomposition—three acres of land on a hillside in Tennessee where human bodies are left to the elements. His research at "the Body Farm" has revolutionized forensic science, helping police crack cold cases and pinpoint time of death. But during a forensics career that spans half a century, Bass and his work have ranged far beyond the gates of the Body Farm. In this riveting book, the bone sleuth explores the rise of modern forensic science, using fascinating cases from his career to take readers into the real world of C.S.I. Some of Bill Bass's cases rely on the simplest of tools and techniques, such as reassembling—from battered torsos and a stack of severed limbs—eleven people hurled skyward by an

explosion at an illegal fireworks factory. Other cases hinge on sophisticated techniques Bass could not have imagined when he began his career: harnessing scanning electron microscopy to detect trace elements in knife wounds; and extracting DNA from a long-buried corpse, only to find that the female murder victim may have been mistakenly identified a quarter-century before. In Beyond the Body Farm, readers will follow Bass as he explores the depths of an East Tennessee lake with a twenty-first-century sonar system, in a quest for an airplane that disappeared with two people on board thirty-five years ago; see Bass exhume fifties pop star "the Big Bopper" to determine what injuries he suffered in the plane crash that killed three rock and roll legends on "the day the music died"; and join Bass as he works to decipher an ancient Persian death scene nearly three thousand years old. Witty and engaging, Bass dissects the methods used by homicide investigators every day, leading readers on an extraordinary journey into the high-tech science that it takes to crack a case.

"If you like Kathy Reichs, you'll like Jefferson Bass" The Times. Dr Bill Brockton is hard at work on a troubling new case. A young man's battered body has been found in nearby Chattanooga, and it's up to the talented Dr Brockton to assemble pieces of the forensic puzzle. Brockton is brought into the case by the rising star of the state's medical examiners, Jess Carter. Just as they are on the verge of breaking the case open, events take a terrifying turn. Brockton has recreated the Chattanooga death scene at the Body Farm, but a killer tampers with it in a shocking way: placing another corpse at the setting, putting Brockton's career and life in jeopardy. Soon Brockton himself is accused of the horrific new crime and the once beloved professor becomes an outcast. As the net around him tightens, Brockton must use all his forensic skills to prove his own innocence... before he ends up behind bars with some of the very killers he's helped to convict.

In the most suspenseful installment of the New York Times bestselling Body Farm series to date, forensic anthropologist Dr. Bill Brockton investigates a bizarre murder—and confronts a deadly enemy he thought he'd put behind bars for good. Forensic anthropologist Bill Brockton has spent twenty-five years solving brutal murders—but none so bizarre and merciless as his latest case: A ravaged set of skeletal remains is found chained to a tree on a remote mountainside. As Brockton and his assistant Miranda dig deeper, they uncover warning signs of a deadly eruption of hatred and violence. But the shocking case is only the beginning of Brockton's trials. Mid-case, the unthinkable happens: The deadliest criminal Brockton has ever foiled—the sadistic serial killer Nick Satterfield—escapes from prison, bent on vengeance. But simply killing Brockton isn't enough. Satterfield wants to make him suffer first, by destroying everything he holds dear: Brockton's son, daughter-in-law, grandsons; even Miranda, his longtime graduate assistant, now on the verge of completing her Ph.D. and launching a forensic career of her own. The dangers from all directions force Brockton to question two things on which he's based his entire career—the justice system, and the quality of mercy—and to wonder: can the two co-exist? If not, which will Brockton choose in his ultimate moment of truth?

Song of the Wings Coloring Book Harper Collins

Dead Souls (Russian:

*Мёртвые души*) is a novel by Nikolai Gogol, first published in 1842, and widely regarded as an exemplar of 19th-century Russian literature. The novel chronicles the travels and adventures of Pavel Ivanovich Chichikov (Russian:

*Чичиков*) and the people whom he encounters. These people are typical of the Russian middle-class of the time. Gogol himself saw it as an "epic poem in prose", and within the book as a "novel in verse". Despite supposedly completing the trilogy's second part, Gogol destroyed it shortly before his death.

Although the novel ends in mid-sentence (like Sterne's *Sentimental Journey*), it is usually regarded as complete in the extant form.

Harper Collins

Brain injury plunged Lia into a world of distortion and chaos, where her own thoughts and senses could no longer be trusted. Searching for medical help, she found doubt and manipulation instead. *But I'm Not Depressed* is a bleak but ultimately hopeful tale, and a slap in the face to the culture of psychobabble.
