Because of the design of our minds. That is Justin Barrett's simple answer to the question of his title. With rich evidence from cognitive science but without technical language, psychologist Barrett shows that belief in God is an almost inevitable consequence of the kind of minds we have. Most of what we believe comes from mental tools working

below our conscious awareness. And what we believe consciously is in large part driven by these unconscious beliefs. Barrett demonstrates that beliefs in gods match up well with these automatic assumptions; beliefs in an all-knowing, all-powerful God match up even better. Barrett goes on to explain why beliefs like religious beliefs are so widespread and why it is very difficult for our minds to think without them. Anyone who wants a concise, clear, and scientific explanation of why anyone would believe in God should pick up Barrett's book. **Orthodoxy and Heresy in**

Throughout history, secret societies have played a crucial role in shaping events that have created our world. Only an inner circle of power elite know the full extent of the influence of the conspiracy. It is Paris, 1772, and Sigismundo Celine knows he is destined to play an important part in this history-behind-history. The masons, the English nobility, the Jacobites, the Rosicrucians, the ruling clique of pre-Revolution France: these are but a few of the factions involved in the machinations and intrigue in which Sigismundo has become enmeshed. Thrown into the Bastille, shot at, assaulted by assassins, tortured, and brutally interrogated, he knows only what he is and what he must do to become the one spoken of in the old texts. But what he

doesn't know could kill him: the secret powers of Maria, the Italian beauty who has become an English Lady; the Irish fisherman, Moon, who stumbles across the inner workings of an unsuspected cult; and the question they keep asking: the identity of The Widow's Son.

Religion and Morality addresses central issues arising from religion's relation to morality. Part I offers a sympathetic but critical appraisal of the claim that features of morality provide evidence for the truth of religious belief. Part II examines divine command theories, objections to them, and positive arguments in their support. Part III explores tensions between human morality, as ordinarily understood, and religious requirements by discussing such issues as the conflict between Buddhist and Christian pacifism and requirements of justice, whether 'virtue' without a love of God is really a vice, whether the God of the Abrahamic religions could require us to do something that seems clearly immoral, and the ambiguous relations between religious mysticism and moral behavior. Covering a broad range of topics, this book draws on both historical and contemporary literature,

and explores afresh central issues of morality and religion offering new insights for students, academics and the general reader interested in philosophy and religion.

John Perry Barlow 's wild ride with the Grateful Dead was just part of a Zelig-like life that took him from a childhood as ranching royalty in Wyoming to membership in the Internet Hall of Fame as a digital free speech advocate. Mother American Night is the wild, funny, heartbreaking, and often unbelievable (yet completely true) story of an American icon. Born into a powerful Wyoming political family, John Perry Barlow wrote the lyrics for thirty Grateful Dead songs while also running his family 's cattle ranch. He hung out in Andy Warhol 's Factory, went on a date with the Dalai Lama 's sister, and accidentally shot Bob Weir in the face on the eve of his own wedding. As a favor to Jacqueline Kennedy Onassis, Barlow mentored a young JFK Jr. and the two then became lifelong friends. Despite being a freely self-confessed acidhead, he served as Dick Cheney 's campaign manager during Cheney 's first run for Congress. And after befriending a legendary early group of computer hackers known as the Legion of Doom, Barlow became a

renowned internet guru who then cofounded the groundbreaking Electronic Frontier Foundation. His résumé only hints of the richness of a life lived on the edge. Blessed with an incredible sense of humor and a unique voice, Barlow was a born storyteller in the tradition of Mark Twain and Will Rogers. Through intimate portraits of friends and acquaintances from Bob Weir and Jerry Garcia to Timothy Leary and Steve Jobs, *Mother American Night* traces the generational passage by which the counterculture became the culture, and it shows why learning to accept love may be the hardest thing we ever ask of ourselves.

New York Times Bestseller Rosie may seem quiet during the day, but at night she's a brilliant inventor of gizmos and gadgets who dreams of becoming a great

engineer. When her great-great-aunt Rose (Rosie the Riveter) comes for a visit and mentions her one unfinished goal—to fly—Rosie sets to work building a contraption to make her aunt's dream come true. But when her contraption doesn't fly but rather hovers for a moment and then crashes, Rosie deems the invention a failure. On the contrary, Aunt Rose insists that Rosie's contraption was a raging success: you can only truly fail, she explains, if you quit. S. Lewis's book brings together Lewis's legendary radio broadcast talks in which he set out simply "to explain and defend the belief that has been common to nearly all Christians at all times". Historia Discordia Touchstone Utilizing contemporary scholarship on secularization, individualism, and consumer capitalism, this book explores religious movements founded in the West which are intentionally fictional: Discordianism, the Church of All Worlds, the Church of the SubGenius, and Jediism. Their continued appeal and success, principally in America but gaining wider audience through the 1980s and 1990s, is chiefly as a result of underground publishing and the internet. This book deals

with immensely popular subject matter: Jediism developed from George Lucas' Star Wars films; the Church of the Flying Spaghetti Monster, founded by 26-year-old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools; Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students. The Church of All Worlds' focus on Gaia theology and environmental issues makes it a popular focus of attention. The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late/post-modern religious forms, including the use of fiction as part of a bricolage for spirituality, identity-formation, and personal orientation.

Video slideshows are available here, including "Heretical Visionary Sacraments amongst the Ecclesiastical Elite" and "Melusina of Plaincourault." It was mainly only the European urban centers that converted to Christianity, and often more for political or commercial interests, than as a matter of faith. The old religions persisted in the villages or pagani, from which the term Paganism arose. The Christians built their sanctuaries upon the pagan sites, expropriating their numinous past, assimilating the symbolism of the former deities, and commonly incorporating the actual architectural remnants. The wisdom of those deposed gods and their rites persisted in less objectionable forms -- disguised to delude the censors -- as country festivals and quaint tales often about the fairy folk, who coexisted with this world and could be accessed by magical procedures that perpetuated half-remembered methods of authentic ancient shamanism. Such shamanism always involved pharmaceutical expertise. Mircea Eliade was mistaken in concluding that drugs were characteristic only of the late and decadent stages of a religion. Rock paintings of the greatest antiquity and his own abundant citations indicate that, instead, a pharmacological Eucharist was the norm; and Eliade was himself about to reverse his stance shortly before his death. Encoded in tales

seemingly as simple as Snow White with her poisoned red and white apple are themes traceable back to the great epics of Homer and the Mesopotamian Gilgamesh. These patterns of shamanic empowerment lurk also in the histories of the leading families of Europe, who could not completely divest themselves of the former religious basis for their right to rule, but instead they embraced, Christianized, and buried it in sanctified graves, as was the case with the great fairy Melusina, whose eighth abominable son, called Horrible, was murdered. A number of churches involved in the Albigensian heresy claim his body was laid to rest beneath them.

Many of our questions about religion, says renowned anthropologist Pascal Boyer, are no longer mysteries. We are beginning to know how to answer questions such as "Why do people have religion?" Using findings from anthropology, cognitive science, linguistics, and evolutionary biology, Religion Explained shows how this aspect of human consciousness is increasingly

admissible to coherent, naturalistic explanation. This brilliant and controversial book gives readers the first scientific explanation for what religious feeling is really about, what it consists of, and where it comes from.

High Weirdness by Mail Basic Books

The growth of science and a correspondingly scientific way of looking at evidence have for the last three centuries slowly been gaining ground over religious explanations of the cosmos and mankind's place in it. However, not only is secularism now under renewed attack from religious fundamentalism, but it has also been widely claimed that the scientific evidence itself points strongly to a universe deliberately fine-tuned for life to evolve in it. In addition, certain aspects of human life, like consciousness and the ability to recognise the existence of universal moral standards, seem completely resistant to evolutionary explanation. In this book Colin Howson analyses in detail the evidence which is claimed to support belief in God's existence and argues that the claim is not well-founded. Moreover, there is very compelling evidence that an all-powerful, all-knowing God not only does not exist but cannot exist, a conclusion both surprising and provocative.

Everything is here to help those who are already atheists better understand the logic of their lives and see Atheism's social and political implications. Those who are not yet atheists will be helped by this scientist's common-sense analysis of the so-called 'proofs of God' to see the irrationality, indeed, the meaninglessness of god-beliefs. What is belief? What is knowledge? As Pilate is alleged to have asked, "What is truth"? Understandable and clear answers to all these questions are given by a seasoned anthropologist who has been able to see around the blinders imposed by Judaeo-Christian cultures.
