This text introduces nursing students to the cognitive skills, or thought processes, required of professional nurses. Using a practical approach and a nursing process framework throughout, the book provides a bridge between the theory and the application of these skills. Cognitive skills are presented in a competency-based, clinically oriented format, with emphasis on teaching critical thinking. Chapters end with a workbook section, to provide students with real-world applications of what they have learned. Case studies and checklists throughout aid the student in applying content. The book is written at an accessible reading level.

A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was

just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, *Long Way Down* is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

The Bradley Method Husband-coached Childbirth

"Giving birth is the pivotal moment of a woman's life but it is often treated as a medical procedure, and not as a rite of passage. Birthing from Within offers parents engaging and memorable ways for pregnant women, and their partners, to activate personal, social and spiritual resources that will guide them through labour and afterwards. Many birth classes teach from the 'outside', from the perspective of the professional. Yet, knowledge of anatomy and the stages of labour can often seem irrelevant in the intensity of contraction. The pregnant woman needs to know about labour and birth from her own perspective, she needs to be prepared for birthing from within. Pam England offers a

method that allows a woman to fully understand her own strengths and resources. The self-discoveries made during pregnancy makes birth life-enhancing and empowers the future of the family. It is a multi-sensory and holistic approach that aims to make parents feel positively informed about what they are about to experience, confident about the birth of their child. Pain is an inevitable part of childbirth but Birthing from Within provides resources for building pain-coping confidence in parents. It gives detailed instructions on dealing with normal labour pain and when the humane use of drugs may be called for."--Cover.

The classic guide to an unmedicated childbirth, fully revised for the twenty-first century—with updated information and attractive new illustrations and photos throughout. For women birthing vaginally, 90% of Bradley births are drug-free! The Bradley Method®, used and praised by women for almost seventy years, prepares you for drug and surgery-free childbirth and puts you in control by providing the tools to navigate evidence-based care. Certified childbirth educator Susan McCutcheon, one of Dr. Bradley's first students, now makes this natural approach to childbirth more accessible than ever. You will learn:

- Exercises and nutrition to get your body ready for birthing
- To defuse fear by understanding all aspects of laboring
- How to involve your partner as a birth coach and a fully engaged participant
- What's driving the induction epidemic and how to avoid an unnecessary induction
- What's driving the cesarean surgery epidemic and how to reduce your risk
- How to get the information you need to make informed decisions about your birth

"The Bradley Method's simple objective, through relaxation, breathing, and visualization, is a birth free of the interventions frequently offered to women in the different stages of childbirth: fetal monitors, drug-induced labor, anesthesia, episiotomy, and Caesarean section. (Its) other defining feature, the husband's active participation in the delivery, is critical to this overall goal of an intervention-free birth." —Mothering
