## **The Penguin Book of Home Brewing and Winemaking** Penguin UK

The first Penguin anthology of Japanese haiku, in vivid new translations by Adam L. Kern. Now a global poetry, the haiku was originally a Japanese verse form that flourished from the sixteenth to nineteenth centuries. Although renowned for its brevity, usually running three lines long in seventeen syllables, and by its use of natural imagery to make Zen-like observations about reality, in fact the haiku is much more: it can be erotic, funny, crude and mischievous. Presenting over a thousand exemplars in vivid and engaging translations, this anthology offers an illuminating introduction to this widely celebrated, if misunderstood, art form. Adam L. Kern's new translations are accompanied here by the original Japanese and short commentaries on the poems, as well as an introduction and illustrations from the period.

most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use

practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

A Discovery of Witches Addison-Wesley

Longman

“Keeping Poultry And Rabbits On Scraps” is an extensively illustrated guide to keeping rabbits and chickens, with a special focus on doing so as cheaply as possible. The first half of the book explains how the maximum number of eggs can be obtained from the minimum amount of imported food,

while the second half aims to give practical instructions and tips. This book will appeal to those with an interest in low-cost poultry keeping. Contents include: “Poultry Farming”, “Cuniculture (Rabbit Farming)”, “Eggs From Scraps”, and “Keeping Rabbits on Scraps”. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new introduction on poultry farming.
