The Sign of the Beaver Simon and Schuster  
E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an

enhanced edition of a timeless account of human history.

*Golden Son* Houghton Mifflin Harcourt

*Daughter of the Forest* is a testimony to an incredible author's talent, a first novel and the beginning of a trilogy like no other: a mixture of history and fantasy, myth and magic, legend and love. Lord Colum of Sevenwaters is blessed with six sons: Liam, a natural leader; Diarmid, with his passion for adventure; twins Cormack and Conor, each with a different calling; rebellious Finbar, grown old before his time by his gift of the Sight; and the young, compassionate Padriac. But it is Sorcha, the seventh child and only daughter, who alone is destined to defend her family and protect her land from the Britons and the clan known as Northwoods. For her father has been bewitched, and her brothers bound by a spell that only Sorcha can lift. To reclaim the lives of her brothers, Sorcha leaves the only safe place she has ever known, and embarks on a journey filled with pain, loss, and terror. When she is kidnapped by enemy forces and taken to a foreign land, it seems that there will be no way for her to break the spell that condemns all that she loves. But magic knows no boundaries, and Sorcha will have to choose between the life she has always known and a love that comes only once. Juliet Marillier is a rare talent, a writer who can imbue her characters and her story with such warmth, such heart, that no reader can come away from her work untouched. *Shen of the Sea* Simon and Schuster

A "smart and surprising" (Booklist) "expansive history" (Publishers Weekly) detailing the role that wood and trees have played in our global ecosystem—including human evolution and the rise and fall of empires—in

the bestselling tradition of Yuval Harari's *Sapiens* and Mark Kurlansky's *Salt*. As the dominant species on Earth, humans have made astonishing progress since our ancestors came down from the trees. But how did the descendants of small primates manage to walk upright, become top predators, and populate the world? How were humans able to develop civilizations and produce a globalized economy? Now, in *The Age of Wood*, Roland Ennos shows for the first time that the key to our success has been our relationship with wood. "A lively history of biology, mechanics, and culture that stretches back 60 million years" (Nature) *The Age of Wood* reinterprets human history and shows how our ability to exploit wood's unique properties has profoundly shaped our bodies and minds, societies, and lives. Ennos takes us on a sweeping journey from Southeast Asia and West Africa where great apes swing among the trees, build nests, and fashion tools; to East Africa where hunter-gatherers collected their food; to the structural design of wooden temples in China and Japan; and to Northern England, where archaeologists trace how coal enabled humans to build an industrial world. Addressing the effects of industrialization—including the use of fossil fuels and other energy-intensive materials to replace timber—*The Age of Wood* not only shows the essential role that trees play in the history and evolution of human existence, but also argues that for the benefit of our planet we must return to more traditional ways of growing, using, and understanding trees. A brilliant blend of recent research and existing scientific knowledge, this is an "excellent, thorough history in an age of our increasingly fraught relationships with natural resources" (Kirkus Reviews, starred review).

**The Footprints of God** Tor Books

With this first masterly volume in an epic reimagining of the Trojan War, David Gemmell has written an ageless drama of brave deeds and fierce battles, of honor and treachery, of love won and lost. He is a man of many names. Some call him the Golden One; others, the Lord of the Silver Bow. To the Dardanians, he is Prince Aeneas. But to his friends, he is Helikaon. Strong, fast, quick of mind, he is a bold warrior, hated by his enemies, feared even by his Trojan allies. For there is a darkness at the heart of the Golden One, a savagery that, once awakened, can be appeased only with blood. Argurios the Mykene is a peerless fighter, a man of unbending principles and unbreakable will. Like all of the Mykene

warriors, he lives to conquer and to kill. Dispatched by King Agamemnon to scout the defenses of the golden city of Troy, he is Helikaon's sworn enemy. Andromache is a priestess of Thera betrothed against her will to Hektor, prince of Troy. Scornful of tradition, skilled in the arts of war, and passionate in the ways of her order, Andromache vows to love whom she pleases and to live as she desires. Now fate is about to thrust these three together—and, from the sparks of passionate love and hate, ignite a fire that will engulf the world.

The occasion of forty years of teaching at Amherst by William H. Pritchard, the renowned critic of Frost, Jarrell, and many others, has generated a remarkable collection of essays by former students, colleagues, and friends. The essays themselves are a spectrum of contemporary, criticism, ranging from classroom memoirs to analytic essay-in-criticism to assessment of the state of academic letters today. These contributions, a tribute, by reason of their very range, are a salute to the breadth of William Pritchard's circle of literary acquaintance. Under Criticism demonstrates

the fine persistence in certain manners of approach and habits of focus that go, among that circle, under the name of criticism. Drawing foremost on their engagement with the literature before them, Christopher Ricks, Helen Vendler, Patricia Meyer Spacks, Neil Hertz, David Ferry, Paul Alpers, Joseph Epstein, and Frank Lentricchia -- as well as fifteen other critics and men and women of letters -- reinforce Professor Pritchard's prescription that in order to have a hearing, the critic needs to keep listening.

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century." —Columbus Dispatch At the heart of

this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor." —The New York Times "When Julian Jaynes...speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis." —John Updike, The New Yorker "He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior." —American Journal of Psychiatry

American Military History provides the United States Army-in-particular, its young officers, NCOs, and cadets—with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the

organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war—global war—was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.
