This revised and updated edition of *Care of the Mentally Disordered Offender in the Community* provides a comprehensive, evidence-based guide to theory and practice. The social and clinical context within which mental health care is provided to offenders in community settings has changed significantly in recent years. An increasing proportion of all mental health care is provided in the community and our knowledge of the links between violence and mental illness has advanced. Existing psychological and pharmacological treatments have been refined and new treatments have been introduced. Epidemiological and intervention-based research has evaluated these changes and suggested new avenues for clinical development. Over three sections, the second edition of *Care of the Mentally Disordered Offender in the Community* explores the key areas of the field. Part 1 describes the social, administrative and clinical context within which care is now given. Part 2 discusses treatment and the evaluation of violence risk when determining the most appropriate treatment. Part 3 explores psychiatric services and their relationship with other agencies. The text has been updated to cover recent developments in theory and practice. New chapters have been added that cover US provision for people with mental disorders leaving prison, the community management of sexual offenders, the relationship between care and coercion and the treatment of personality disorders. Written by a global team of experts, the book provides critical insights into the social, clinical, and institutional aspects of an increasingly important part of psychiatric community care.

In this fundamentally important work, Professor Brendan Kelly explores the background to Irish psychiatry in the nineteenth and early twentieth centuries, charting its progress and development. Using detailed case studies from the original records, the author examines some of the more unusual treatments explored and the history behind them. What emerges is a collection of piercing, untold stories of crime and illness, drama and tragedy. They are filled with a sense of the powerlessness of those detained and the dedicated – and sometimes misguided – enthusiasm of those

trying to help. This book sheds important light on the foundations for the treatment of mental illness in Ireland.

Farm Animals and Farm Crops Springer Nature

An updating of virtue ethics for modern pastors and the souls they care for, this book proposes innovations for the craft of ministry in the theology of grace—how virtues radiate to tame strife and other destructive behaviors. It presents a comprehensive alternative to the top-down proclamations of “biblical counseling” approaches that try to impart, from an eclectic biblicist lens, cognitive authorities for consequential change. Instead, Christ’s bottom-up practice of virtues heals and fulfills by focusing on neighbor first and subordinating the ego’s strategic considerations—more graciously spreading God’s will in ministry through participatory and experiential knowledge. Virtuous pastoral ministries integrate the common grace of humanist learning to address the range of the care seeker’s contemporary context—her upbringing, struggles, and affiliations. This book presents more the “how” than the “what” of pastoral theology: more how the dance of mutuality and chivalry enters the spiritual flow of healing metaphysical grace than the “what” of right “belief.” Even so, pastoral care from the virtue ethical approach inevitably reconsiders “vending machine” theologies, destructive doctrinal boundaries, and context-lite biblicisms. This presentation introduces how virtue ethics apply to ministry, the household, individual trauma and addictions, and the contemporary political and cultural arena.

How can we plan, organize, distribute, and offer care in ways that treat both those who need it and those who provide it with dignity and respect? Using the example of residential services, *Troubling Care: Critical Perspectives on Research and Practices* investigates the fractures in our care systems and challenges how caring work is understood in social policy, in academic theory, and among health care providers. In this era defined by government cutbacks and a narrowing sense of collective responsibility, long-term residential care for the elderly and disabled is being undervalued and undermined. A result of a seven-year interdisciplinary research project-in-progress, this book draws together the work of fourteen leading health researchers, including sociologists, medical practitioners, social workers, policy researchers, cultural theorists, and historians. Using a feminist political economy lens, these scholars explore and challenge the theories, work organization, practices, and state-society relations that have come to shape long-term care. *Troubling Care* offers critical perspectives on the often disquieting arena of care provision and proposes alternatives for thinking about and meeting the needs of some of our most vulnerable citizens in ways that go beyond residential care. This book seeks to bridge not only the gaps between disciplines, but also those between theory and practice. Features: takes an interdisciplinary approach, making this work appropriate for courses in a variety of disciplines including sociology, medicine, social work, health policy, cultural studies, and political economy includes the work of fourteen leading health researchers, including sociologists, medical practitioners, social workers, policy researchers, cultural theorists, and historians bridges the gap between theory and practice by incorporating both theoretical research and specific case examples

Taming the Beloved Beast Routledge

In her ground-breaking new study, Katie Bugyis offers a new history of communities of Benedictine nuns in England from 900 to 1225. By applying innovative paleographical, codicological, and textual analyses to their surviving liturgical books, Bugyis recovers a treasure trove of unexamined evidence for understanding these women's lives and the liturgical and pastoral ministries they performed. She examines the duties and responsibilities of their chief monastic officers--abbesses, prioresses, cantors, and sacristans--highlighting three of the ministries vital to their practice--liturgically reading the gospel, hearing confessions, and offering intercessory prayers for others. Where previous scholarship has argued that the various reforms of the central Middle Ages effectively relegated nuns to complete dependency on the sacramental ministrations of priests, Bugyis shows that, in fact, these women continued to exercise primary control over their spiritual care. Essential to this argument is the discovery that the production of the liturgical books used in these communities was carried out by female scribes, copyists, correctors, and creators of texts, attesting to the agency and creativity that nuns exercised in the care they extended to themselves and those who sought their hospitality, counsel, instruction, healing, forgiveness, and intercession.

Why health care reform must tackle the escalating cost of medical technology Technological innovation is deeply woven into the fabric of American culture, and is no less a basic feature of American health care. Medical technology saves lives and relieves suffering, and is enormously popular with the public, profitable for doctors, and a source of great wealth for industry. Yet its costs are rising at a dangerously unsustainable rate. The control of technology costs poses a

terrible ethical and policy dilemma. How can we deny people what they may need to live and flourish? Yet is it not also harmful to let rising costs strangle our health care system, eventually harming everyone? In *Taming the Beloved Beast*, esteemed medical ethicist Daniel Callahan confronts this dilemma head-on. He argues that we can't escape it by organizational changes alone. Nothing less than a fundamental transformation of our thinking about health care is needed to achieve lasting and economically sustainable reform. The technology bubble, he contends, is beginning to burst. Callahan weighs the ethical arguments for and against limiting the use of medical technologies, and he argues that reining in health care costs requires us to change entrenched values about progress and technological innovation. *Taming the Beloved Beast* shows that the cost crisis is as great as that of the uninsured. Only a government-regulated universal health care system can offer the hope of managing technology and making it affordable for all.

Health Care in Canada examines the challenges faced by the Canadian health care system, a subject of much public debate. In this book Katherine Fierlbeck provides an in-depth discussion of how health care decisions are shaped by politics and why there is so much disagreement over how to fix the system. Many Canadians point to health care as a source of national pride; others are highly critical of the system's shortcomings and call for major reform. Yet meaningful debate cannot occur without an understanding of how the system actually operates. In this overview, Fierlbeck outlines the basic framework of the health care system with reference to specific areas such as administration and governance, public health, human resources, drugs and drug policy, and mental health. She also discusses alternative models in other countries such as Britain, the United States, and France. As health care becomes increasingly complex, it is crucial that Canadians have a solid grasp of the main issues within both the policy and political environments. With its balanced and accessible assessment of the main political and theoretical debates, *Health Care in Canada* is an essential guide for anyone with a stake in Canada's health system.

The Complete Concordance to Shakspeare Being a Verbal Index to All the Passages in the Dramatic Works of the Poet by Mrs. Cowden Clarke Rutgers University Press

"What about the twenty-first century? Will we finally accept our responsibilities as guardians of planet Earth, the biological living trust, for the beneficiaries, the children of today, tomorrow, and beyond? Or, will it too be a century of lethal, economic struggle among the polarized positions of the supremely dysfunctional among us? Are they—once again—to be allowed to determine the legacy we, as a society, as a nation, bequeath those who follow us? The choice is ours, the adults of the world. How shall we choose?" So writes Chris Maser in this compelling study of three interactive spheres of the ecosystem: atmosphere (air), litho-hydrosphere (rock that comprises the restless continents and the water that surrounds them), and biosphere (all life sandwiched in between). Rich in detail and insightful analogies, *Earth in Our Care* addresses key issues including land-use policies, ecological restoration, forest management, local living, and sustainability thinking. Exploring our interconnectedness with the Earth, Maser examines today's problems and, more importantly, provides solutions for the future.

This book draws from the everyday experiences as well as the harsh realities confronting behavioral care providers on the frontline. The book recounts the stories and sometimes disturbing emotions of people whose lives have undergone sudden change or even drastic trauma; people whose feelings of comfort

and safety have been shattered by exposure to illness, abuse, death and bereavement. The perspectives and experiences of nurses, social care staff, patients, children and families are at the core of understanding the importance, challenges and therapeutic vitality of emotions. The 55 individuals on the frontline who took part in the interviews on which this study is based discuss the emotions associated with care in mental health, pediatric oncology, AIDS/HIV, as well as child protection and abuse, racism, refugee exile, poverty, and social exclusion. Their bravery, openness, and ability to communicate and share their emotions make this book possible. ?

Shakespeare and the Hunt is a book-length 2001 study of Shakespeare's works in relation to the culture of the hunt in Elizabethan and Jacobean society. The book explores topics generally unfamiliar to Shakespeareans, such as the variety of kinds of hunting in the period, the formal rituals of the hunt, the roles of Queen Elizabeth and King James as hunters, the practice of organized poaching, and the arguments both for and against hunting. Situating Shakespeare's works in this rich cultural context, Berry illuminates the plays from fresh angles. He explores, for example, the role of poaching in *The Merry Wives of Windsor*; the paradox of pastoral hunting in *As You Like It*; the intertwining of hunting and politics in *The Tempest*; and the gendered language of falconry in *The Taming of the Shrew*.

It's been said that health begins in the stomach. When digestion is not working properly, the whole body suffers. Skin rash, bad breath, headache, fatigue, overweight, and premature aging can all result from poor digestion—not to mention gastric disorders like heartburn, indigestion, and irritable bowel syndrome. But nearly half of digestive disorders can be averted with proper eating, exercise, stress management, and related lifestyle modifications. In *Natural Stomach Care*, gastroenterologist Anil Minocha, M.D., combines the wisdom of traditional Eastern healing with the advancements of conventional Western medicine to offer a wide range of easy-to-use, affordable, and effective at-home natural therapies that can strengthen digestion, keep the colon clean and the bowels moving, and improve overall health. In addition to recommendations for overall digestive health, Dr. Minocha provides remedies for a host of digestive complaints. Treatments include healing Chinese herbs, Ayurvedic medicine, yoga, tai chi, probiotics, vitamin and mineral supplements, colon-cleansing techniques, and lifestyle changes, making *Natural Stomach Care* an innovative, integrative approach to digestive health.

Custody, Care & Criminality John Wiley & Sons

This volume looks at how northern European governments of the eighteenth and nineteenth centuries coped with the needs of the poor, whilst balancing any new measures against the perceived negative effects of relief upon the moral wellbeing of the poor and issues of social stability. Taken together, the essays in this volume chart the varying responses of states, social classes and political theorists towards the great social and economic issue of the age, industrialisation. Its demands and effects undermined the capacity of the old poor relief arrangements to look after those people that the fits and starts of the industrialisation cycle itself turned into paupers. The result was a response that replaced the traditional principle of 'outdoor' relief, with a generally repressive system of 'indoor' relief that lasted until the rise of organised labour forced a more benign approach to the problems of poverty.
