THE REAL AMITYVILLE HORROR: The True Story Behind The Brutal DeFeo Murders

Settled in an affluent neighborhood in Long Island, New York is the one of the most infamous houses in all of America, or perhaps the world. The house with the iconic double-windows, white siding, and chimney at 112 Ocean Avenue is the home to the one of the most horrific family massacres in history, as well as an infamous haunting hoax. The haunting of the Amityville house is much more prominently known than the murders that took place in the same house. The Amityville or DeFeo family murders committed by Ronald "Butch" DeFeo Jr. have gone down in both true crime and pop culture history. The book and the subsequent horror film series about the case continue to fascinate and fear audiences years later. Both cases are clouded in unreliable testimony, profiteering, admitted fabrication, and greed. This is the real story of what

happened at Amityville, and the events leading up to this horrific crime.

Scary Cases in Otolaryngology follows a case-based approach that focuses on potential pitfalls, decision analysis, mistakes, and "near

misses" in the management of patients with head and neck disorders. This is an invaluable resource for otolaryngologists as it presents difficult cases and builds a discussion around clinical management, prevention, and the legal and ethical aspects of those cases. Current and future professionals in otolaryngology can analyze their own methodologies as well as the work of their peers to continually promote a safer and healthier environment for their patients. Scary Cases in Otolaryngology is an extension of the annual Scary Cases Conference held by the Boston University School of Medicine. The conference began in 2011 and aims to improve patient safety by addressing complex and controversial cases that involve increased risk, complications, and unfavorable outcomes. The cases in the text have been selected from previous conference

presentations. This exciting and unique book addresses questions such as Did you make a wrong diagnosis before arriving at the correct one? Do you believe that you did everything correctly and the outcome was still unsatisfactory? Did a patient have a serious condition that was difficult to diagnose? Were there major complications? Did you have a difficult ethical dilemma? Were you required to treat a condition beyond your expertise? This innovative text includes clinical information on cases provided by faculty from top medical schools along with their narratives on what they learned. Contributors also include experts in medical malpractice and malpractice liability insurance. Practicing otolaryngologists, otolaryngology residents, malpractice attorneys, law students, otolaryngology nurse practitioners and primary care physicians will benefit from

the examples in these "scary cases."

Horror intends to create an eerie and frightening atmosphere for the reader. Prevalent elements include ghosts, demons, vampires, werewolves, ghouls, the Devil, witches, monsters, dystopian and apocalyptic worlds, serial killers, cannibalism, psychopaths, cults, dark magic, Satanism, the

macabre, gore, and torture. “The oldest and strongest emotion of mankind is fear, and the oldest and strongest kind of fear is fear of the unknown. These facts few psychologists will dispute, and their admitted truth must establish for all time the genuineness and dignity of the weirdly horrible tale as a literary form... As may naturally be expected of a form so closely connected with primal emotion, the horror-tale is as old as human thought and speech themselves”. H. P.
