The Robots of Dawn Spectra

Isaac Asimov's renowned Foundation Trilogy pioneered many of the familiar themes of modern science fiction and shaped many of its best writers. With the permission and blessing of the Asimov estate, the epic saga left unfinished by the Grand Master himself now continues with this second masterful volume. With Hari Seldon on trial for treason, the Galactic Empire's long-anticipated migration to Star's End is about to begin. But the mission's brilliant robot leader, R. Daneel Olivaw, has discovered a potential enemy far deadlier--and closer--than he ever imagined. One of his own kind. A freak accident erases the basic commandments in humanoid robot Lodovik Trema's positronic brain. Now Lodovic's service to humankind is no longer bound by destiny, but by will. To ensure his loyalty, Daneel has Lodovic secretly reprogrammed. But can he be trusted? Now, other robots are beginning to question their mission--and Daneel's strategy. And stirrings of rebellion, too, are infecting their human counterparts. Among them is a young woman with awesome psychic abilities, a reluctant leader with the power to join man and robot in a quest for common freedom or mutual destruction. The Foundation Saga Continues Read Gregory Benford's Foundation's Fear, the first novel in this bold new series and Secret Foundation, the concluding volume from David Brin.

The Robot Novels Voyager

The development of robot technology to a state of perfection by future civilizations is explored in nine science fiction stories.

The Caves of Steel Tor Books

Isaac Asimov concludes that we are not alone! Using the most up-to-date astronomical research as the backdrop for speculation, Asimov confronts the possibilities of other-worldly life head-on in Extraterrestrial Civilizations. In what will surely become one of the most provocative books ever written on the possibilities of life elsewhere in the universe, the incomparable Isaac Asimov provides chilling, hopeful, and exciting new insights. Here is astounding speculation about where the next giant step for mankind will take us. . . . Praise for Extraterrestrial Civilizations "[Isaac] Asimov holds our attention as he builds a meticulous case. We are not alone. It's just a matter of time until we know for sure."—Miami Herald "Intriguing"—Publishers Weekly

Chimera Del Rey

After a few early glitches in their relationship, Sammy and his 'bro-bot' E are now best friends. In fact, E is such a valued member of the family that the other electronic members of the House of Robots are feeling sorely unappreciated. And when Sammy's inventor mom becomes distracted by a top-secret project, the robots soon begin to fall into disrepair. Cue a robot revolt, with the droids wreaking harmless havoc in the house! Armed with pranks

like glue in the shampoo bottles and flying toast missiles, the robots demand to be cared for. It's up to Sammy and his disabled sister Maddie to keep the peace until his mom reveals her secret project... and why it was worth the wait.

The Robot Novels Turtleback

A millennium into the future two advances have altered the course of human history: the colonization of the Galaxy and the creation of the positronic brain. Isaac Asimov's Robot novels chronicle the unlikely partnership between a New York City detective and a humanoid robot who must learn to work together. Detective Elijah Baiey is called to the Spacer world Aurora to solve a bizarre case of roboticide. The prime suspect is a gifted roboticist who had the means, the motive, and the opportunity to commit the crime. There's only one catch: Baley and his positronic partner, R. Daneel Olivaw, must prove the man innocent. For in a case of political intrigue and love between woman and robot gone tragically wrong, there's more at stake than simple justice. This time Baley's career, his life, and Earth's right to pioneer the Galaxy lie in the delicate balance.

The Robot Collection Fawcett

Science fiction at its sense-of-wonder best. A wild chase through the billion worlds of the Tenth Millennium in search of a mythical weapon that could save civilization—or doom it! A DROID AND HIS BOY, ON A SEARCH FOR A LEGENDARY WEAPON Daslakh is an AI with a problem. Its favorite human, a young man named Zee, is in love with a woman who never existed—and he will scour the Solar System to find her. But in the Tenth Millennium, a billion worlds circle the Sun—everything from terraformed planets to artificial habitats, home to a quadrillion beings. Daslakh's nicely settled life gets more complicated when Zee helps a woman named Adya escape a gang of crooks. This gets the pair caught up in the hunt for the Godel Trigger, a legendary weapon left over from an ancient war between humans and machines—which could spell the end of civilization. In their search, they face a criminal cat and her henchmen, a paranoid supermind with a giant laser, the greatest thief in history, and a woman who might actually be Zee's lost love. It's up to Daslakh to save civilization, keep Zee's love life on the right track—and make sure that nobody discovers the real secret of the Godel Trigger. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for the work of James L. Cambias: "Beautifully written, with a story that captures the imagination the way SF should." —Booklist, starred review "An engaging nail-biter that is exciting, fun and a satisfying read." —The

Qwillery ' " An impressive debut by a gifted writer. " —Publishers Weekly, starred review " An exceptionally thoughtful, searching and intriguing debut. " —Kirkus, starred review " James Cambias will be one of the century's major names in hard science fiction. " —Robert J. Sawyer, Hugo Award – winning author of Red Planet Blues " Fast-paced, pure quill hard science fiction. . . . Cambias delivers adroit plot pivots that keep the suspense coming. " —Gregory Benford, Nebula Award-winning author of Timescape Asimov's Mysteries Del Rey

The complete Shattered Destiny series. Follow Shar and Xarin on their galactic saga in this six-episode boxset. She ' s a loner. Always has been. She ' s fought to survive, tooth and nail. He ' s a prince of the Arterian Royal Family – the greatest power in the galaxy. They shouldn ' t meet. Their paths should never intersect. But they do. Because the Milky Way is on the verge of total war once more. Together, they can save everyone. If they are torn apart, all will fall. Inherit the Stars Spectra

The city is winched along tracks through a devastated land full of hostile tribes. Rails must be freshly laid ahead of the city and carefully removed in its wake. Rivers and mountains present nearly insurmountable challenges to the ingenuity of the city ' s engineers. But if the city does not move, it will fall farther and farther behind the " optimum " into the crushing gravitational field that has transformed life on Earth. The only alternative to progress is death. The secret directorate that governs the city makes sure that its inhabitants know nothing of this. Raised in common in cr è ches, nurtured on synthetic food, prevented above all from venturing outside the closed circuit of the city, they are carefully sheltered from the dire necessities that have come to define human existence. And yet the city is in crisis. The people are growing restive, the population is dwindling, and the rulers know that, for all their efforts, slowly but surely the city is slipping ever farther behind the optimum. Helward Mann is a member of the city ' s elite. Better than anyone, he knows how tenuous is the city ' s continued existence. But the world—he is about to discover—is infinitely stranger than the strange world he believes he knows so well.

The Complete Robot Odette C. Bell

Nightmarish machines have driven humanity into the depths of space. The survivors are forced to adapt to a planet filled with monsters.

The Naked Sun Penguin

Long ago, Gladia's robots Daneel and Giskard played a vital role in opening the worlds beyond the Solar system to Settlers from Earth. Now the conscience-stricken robots are faced with an even greater challenge. Either the sacred Three Laws of Robotics are in ruins - or a new, superior Law must be established to bring peace to the galaxy. With Madam Gladia

and D.G. Baley - the captain of the Settler traders and a descendant of the robots' friend Elijah Baley - Daneel and Giskard travel to the robot stronghold of Solaria...where they uncover a sinister Spacer plot to destroy Earth itself.

I, Robot Baen Books

For twenty thousand years, every observable phenomenon in the universe has been successfully explained by the Sarumpaet Rules: the laws governing the dynamics of the quantum graphs that underlie all the constituents of matter and the geometric structure of spacetime. Now Cass has stumbled on a set of quantum graphs that might comprise the fundamental particles of an entirely different kind of physics, and she has travelled three hundred and seventy light years to Mimosa Station, a remote experimental facility, in the hope of bringing this tantalising alternative to life. The " novo-vacuum " is predicted to begin decaying the instant it ' s created, but even a short-lived, microscopic speck could shed light on the origins of the universe, and test the Sarumpaet Rules more rigorously than ever before. Cass ' s experiment turns out to be more successful than anticipated: the novo-vacuum is more stable than the ordinary vacuum around it, and a region in which the new physics holds sway proceeds to expand out from Mimosa at half the speed of light. Six hundred years later, more than two thousand inhabited systems have been lost to the novo-vacuum. On the Rindler, a ship that has matched velocities with the encroaching border, people have come from throughout inhabited space to study the phenomenon. Most are Preservationists, hunting for a way to turn back the tide, but a few belong to another faction: Yielders, who believe that the challenge of adapting to survive on the far side of the border would reinvigorate a civilisation that has grown stale and insular. Tchicaya has come to the Rindler to join the Yielders, but when Mariama — a childhood friend whose example inspired him to abandon his own home world and traditions for a life of travel — arrives soon after, he is shocked to discover that she plans to help the Preservationists find a way to destroy the novo-vacuum. As a theoretical breakthrough leads to a sequence of experiments that begins to reveal the true richness of the world behind the border, tensions between the opposing factions grow. When a splinter group responds to these revelations with violent, unilateral action, Tchicaya and Mariama are forced into an uneasy alliance, and travel together through the border, balancing old and new loyalties against the fate of two incomparably different universes.

The Caves of Steel Voyager

The first volume of the autobiography of a prominent scientist and prolific author, covering the first thirty-four years of his life.

Caves of Steel Hachette UK

For sixteen-year-old Jane, life is a mystery she despairs of

ever mastering. She and her friends are the idle, pampered children of the privileged class, living in luxury on an Earth remade by natural disaster. Until Jane's life is changed forever by a chance encounter with a robot minstrel with auburn hair and silver skin, whose songs ignite in her a desperate and inexplicable passion. Jane is certain that Silver is more than just a machine built to please. And she will give up everything to prove it. So she escapes into the city's violent, decaying slums to embrace a love bordering on madness. Or is it something more? Has Jane glimpsed in Silver something no one else has dared to see - not even the robot or his creators? A love so perfect it must be destroyed, for no human could ever compete?

Schild ' s LadderNew York Review of Books

Dominic Flandry had a great future ahead of him as saviour of the civilised universe. In later years his talent for swift, decisive action would give him an intergalactic reputation. But at the age of nineteen and straight out of naval academy, he was just another raw ensign. The mighty Merseian Empire had sworn to wipe the Earth from the face of the universe. The attack had already been launched, but no one knew how or where the ravaging power of the savage green skinned aliens would strike. Only Ensign Flandry had the answer, in the form of a code which he might - or might not - be able to decipher. And so the Merseians were coming after Flandry with every weapon in their terrible arsenal. And just to make things worse, Earth's own armadas were after him too - for desertion, high treason and other assorted crimes. Even for a future saviour, times were looking pretty tough.
