From the author of the New York Times bestseller *Fish in a Tree* comes a compelling story about perspective and learning to love the family you have. Delsie loves tracking the weather--lately, though, it seems the squalls are in her own life. She's always lived with her kindhearted Grammy, but now she's looking at their life with new eyes and wishing she could have a "regular family." Delsie observes other changes in the

air, too--the most painful being a friend who's outgrown her. Luckily, she has neighbors with strong shoulders to support her, and Ronan, a new friend who is caring and courageous but also troubled by the losses he's endured. As Ronan and Delsie traipse around Cape Cod on their adventures, they both learn what it means to be angry versus sad, broken versus whole, and abandoned versus loved. And that, together, they can weather any storm. The Weirdo Routledge

Things Fall Apart is the first of three
novels in Chinua Achebe's critically
acclaimed African Trilogy. It is a
classic narrative about Africa's
cataclysmic encounter with Europe as
it establishes a colonial presence on
the continent. Told through the
fictional experiences of Okonkwo, a
wealthy and fearless Igbo warrior of
Umuofia in the late 1800s, Things Fall
Apart explores one man's futile
resistance to the devaluing of his Igbo
traditions by British political
and religious forces and his despair as
his community capitulates to the
powerful new order. With more than
20 million copies sold and translated

into fifty-seven languages, Things Fall
Apart provides one of the most
illuminating and permanent monuments
to African experience. Achebe does
not only capture life in a pre-colonial
African village, he conveys the
tragedy of the loss of that world while
broadening our understanding of our
contemporary realities.

"In some respects, Palmer & Cay was
too good to be true—a great place to
work with snowballing success. Good
leadership, talented personnel,
personal freedom, and generous
compensation contributed to the
overall success of The Ship. This is a
story not of evil wrongdoing, but of
runaway egos, greed, and the lack of
entrepreneurial skill or knowledge to

lead the company forward. Those egos were willing to bet everything on an unproven scheme and ride The Ship to the bottom, if allowed." For years, Palmer & Cay, a small but highly successful commercial insurance-brokerage firm, was a name synonymous with unbeatable talent, honest work, and a soaring drive to exceed all expectations. Everyone—employees, customers, and peers alike—wanted to climb aboard "The Ship" and be a part of the ride to success. Things could not have been looking better, until in 2003, when a sudden and unexpected change in management took a turn for the worse, and piece by piece dismantled everything that the 135-year-old company stood for. "Scuttled: The Sinking of the Palmer Cay" tells the full story from the perspective of insider Ron Collins, former senior vice president of Palmer & Cay's flagship department, and evaluates the roots of the poor decision-making that would eventually devastate other companies across the nation. From start to finish, Collins provides acute and heartfelt insight into what businesses need to succeed,

and what will ultimately make them sink.

Ten years later, they're still

talking about the weather! Kate Fox, the social anthropologist who put the quirks and hidden conditions of the English under a microscope, is back with more biting insights about the nature of Englishness. This updated and revised edition of *Watching the English* - which over the last decade has become the unofficial guidebook to the English national character - features new and fresh insights on the unwritten rules and foibles of "squaddies," bikers, horse-riders, and more. Fox revisits a strange and fascinating culture, governed by complex sets of unspoken rules and bizarre codes of behavior. She demystifies the peculiar cultural rules that baffle us: the rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid pantomime rule. Class anxiety tests. The roots of English self-mockery and many more. An international bestseller, *Watching the English* is a biting, affectionate, insightful and often hilarious look at the English and their society. This book provides an introduction to the mathematical and algorithmic foundations of data science, including machine learning, high-dimensional geometry, and analysis of large networks. Topics include the counterintuitive nature of data in high dimensions, important linear algebraic techniques such as

singular value decomposition, the theory of random walks and Markov chains, the fundamentals of and important algorithms for machine learning, algorithms and analysis for clustering, probabilistic models for large networks, representation learning including topic modelling and non-negative matrix factorization, wavelets and compressed sensing. Important probabilistic techniques are developed including the law of large numbers, tail inequalities, analysis of random projections, generalization guarantees in machine learning, and moment methods for analysis of phase transitions in large random graphs. Additionally, important structural and complexity measures are discussed such as matrix norms and VC-dimension. This book is suitable for both undergraduate and graduate courses in the design and analysis of algorithms for data. Seriously Good Software Vintage
