way of life lurks behind our self-serious stories."—Oliver Burkeman, New York Times Book Review A remarkable exploration of the therapeutic relationship, Dr. Mark Epstein reflects on one year's worth of therapy sessions with his patients to observe how his training in Western psychotherapy and his equally long investigation into Buddhism, in tandem, led to greater awareness—for his patients, and for himself For years, Dr. Mark Epstein kept his beliefs as a Buddhist separate from his work as a psychiatrist. Content to use his training in mindfulness as a private resource, he trusted that the Buddhist influence could, and should, remain invisible. But as he became more forthcoming with his patients about his personal spiritual leanings, he was surprised to learn how many were eager to learn more. The divisions between the psychological, emotional, and the spiritual, he soon realized, were not as distinct as one might think. In *The Zen of Therapy*, Dr. Epstein reflects on a year's worth of selected sessions with his patients and observes how, in the incidental details of a given hour, his Buddhist background influences the way he works. Meditation and psychotherapy each encourage a willingness to face life's difficulties with courage that can be hard to otherwise muster, and in this cross-section of life in his office, he emphasizes how therapy, an element of Western medicine, can in fact be considered a two-person meditation. Mindfulness, too, much like a good therapist, can "hold" our awareness for us—and allow us to come to our senses and find inner peace. Throughout this deeply personal inquiry, one which weaves together the wisdom of two worlds, Dr. Epstein illuminates the therapy relationship as spiritual friendship, and reveals how a therapist can help patients cultivate the sense

that there is something magical, something wonderful, and something to trust running through our lives, no matter how fraught they have been or might become. For when we realize how readily we have misinterpreted our selves, when we stop clinging to our falsely conceived constructs, when we touch the ground of being, we come home.

STEVEN PINKER 'From entrepreneurs to athletes, and world leaders to entertainers, this is a fascinating collection of interviews with some of the world's most influential individuals.'

EDWARD STOURTON Since 2007, entrepreneur and philanthropist Vikas Shah has been on a mission to interview the people shaping our century. Including conversations with Nobel prizewinners, business leaders, politicians, artists and Olympians, he has been in the privileged position of questioning the minds that matter on the big issues that concern us all. We often talk of war and conflict, the economy, culture, technology and revolutions as if they are something other than us. But all these things are a product of us — of our ideas, our dreams and our fears. We live in fast-moving and extraordinary times, and the changes we're experiencing now, in these first decades of the twenty-first century, feel particularly poignant as decisions are made that will inform our existence for years to come. What started out as a personal interest in the mechanisms that inform our views of the world, and a passion for

understanding, has grown into a phenomenal compilation of once-in-a-lifetime conversations. In this incredible collection, Shah shares some of his most emotive and insightful interviews to date. Chapters include: Chapter 1. On Identity: Who We Are Chapter 2. On Culture: The Context of Humanity Chapter 3. On Leadership: Bringing Humanity Together Chapter 4. On Entrepreneurship: The Creators and the Makers Chapter 5. On Discrimination and Injustice: Them and Us Chapter 6. On Conflict: War, Peace and Justice Chapter 7. Using years of research and interviews with adventure sports athletes, the New York Times best-selling author of *Abundance* and *A Small, Fury Prayer* attempts to unlock the secrets to ultimate human performance and the state of consciousness called "flow." 25,000 first printing. Inside the Mental Game Hay House, Inc  
The Sunday Times Bestseller 'Really brilliant and just crammed with wisdom and insight. It will genuinely make a difference to me and the way I think about myself.' Stephen Fry — 'Everyone says they want to be happy. But that's much more easily said than done. What does being happy actually mean? And how do you even know when you feel it? In *Happy* Derren Brown explores changing concepts of happiness - from the surprisingly modern wisdom of the Stoics and Epicureans in classical times right up until today, when the self-help industry has attempted to claim happiness as its own. He shows how many of self-help's suggested routes to happiness and success - such as positive thinking, self-belief and setting goals - can be disastrous to follow and, indeed, actually cause anxiety. *Happy* aims to reclaim happiness and to enable us to appreciate the good things in life, in all their transient glory. By taking control of the stories we tell ourselves, by remembering that 'everything's fine' even when it might not feel that way, we can allow ourselves to flourish and to live more happily. — What readers are saying: \*\*\*\*\* 'Immensely positive and life-affirming' \*\*\*\*\* 'This is the blue print to a good life' \*\*\*\*\* 'Thought provoking and potentially life-

The *Brave Athlete* solves the 13 most common mental conundrums athletes face in their everyday training and in races. You don't have one brain—you have three; your ancient Chimp brain that keeps you alive, your modern Professor brain that navigates the civilized world, and your Computer brain that accesses your memories and runs your habits (good and bad). They fight for control all the time and that's when bad things happen; you get crazy nervous before a race, you choke under pressure, you quit when the going gets tough, you make dumb mistakes, you worry about how you look. What if you could stop the thoughts and feelings you don't want? What if you could feel confident, suffer like a hero, and handle any stress? You can. The *Brave Athlete* from Dr. Simon Marshall and Lesley Paterson will help you take control of your brain so you can train harder, race faster, and better enjoy your sport. Dr. Marshall is a sport psychology expert who trains the brains of elite professional athletes. Paterson is a three-time world champion triathlete and coach. Together, they offer this innovative, brain training guide that is the first to draw from both clinical science and real-world experience with athletes. That means you won't find outdated "positive self-talk" or visualization gimmicks here. No, the set of cutting-edge mental skills revealed in *The Brave Athlete* actually work because they challenge the source of the thoughts and feelings you don't want. The *Brave Athlete* is packed with practical, evidence-based solutions to the most common mental challenges athletes face. Which of these sound like you? · Why do I have thoughts and feelings I don't want? · I wish I felt more like an athlete. · I don't think I can. · I don't achieve my goals. · Other athletes seem tougher, happier, and more badass than me. · I feel fat. · I don't cope well with injury. · People are worried about how much I exercise. · I don't like leaving my comfort zone. · When the going gets tough, the tough leave me behind. · I need to harden the f\*ck up. · I keep screwing up. · I don't handle pressure well. With *The Brave Athlete: Calm the F\*ck Down and Rise to the Occasion*, you can solve these problems to become mentally strong and make your brain your most powerful asset.

From the acclaimed author of A Fighter's Heart comes an "entertaining and enlightening" look inside the mental game of mixed martial arts fighting (Dave Doyle, Yahoo! Sports). In his acclaimed national bestseller, A Fighter's Heart, Sam Sheridan took readers with him into the dangerous world of professional fighting. From a muay Thai bout in Bangkok to Iowa, where he fought the toughest mixed martial arts stars, Sheridan threw himself into a quest to understand how and why we fight. In The

Fighter's Mind, Sheridan explores the mental discipline required of an elite fighter. In his training, Sheridan heard time and again (in Yogi Berra fashion) that "fighting is ninety percent mental, half the time." But what does this mean, exactly? To uncover the secrets of mental strength and success, Sheridan interviewed dozens of the world's most fascinating and dangerous men. He spoke with celebrated trainers Freddie Roach and Greg Jackson; champion fighters Randy Couture, Frank Shamrock, and Marcelo Garcia; ultrarunner David Horton; chess prodigy (and the inspiration for Searching for Bobby Fischer) turned tai chi expert Josh Waitzkin; and the legendary wrestler Dan Gable, among others. "Fantastic . . . One of the best MMA books I've ever read, and I've certainly read my fair share." —Eric O'Brien, "Way of the Warrior," ESPN radio "You don't have to care about fighting, or even know that MMA stands for mixed martial arts, to find insights into human behavior in Sam Sheridan's The Fighter's Mind." —David M. The ancient Toltecs believed that life as we perceive it is a dream. We each live in our own personal dream, and all of our dreams come together to make the Dream of the Planet. Problems arise when we forget that the dream is just a dream and fall victim to believing that we have no control over it. "The Mastery of Self" takes the Toltec philosophy of the Dream of the Planet and the personal dream and explains how a person can: Wake up Liberate themselves from illusory beliefs and stories Live with authenticity Once released, we can live as our true, authentic, loving self, not only in solitude and meditation, but in any place--at the grocery store, stuck in traffic, etc.--and in any situation or scenario that confronts us. #1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When Breath Becomes Air chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When Breath Becomes Air is an unforgettable, life-

affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

For years, Microsoft and other high-tech companies have been posing riddles and logic puzzles like these in their notoriously grueling job interviews. Now "puzzle interviews" have become a hot new trend in hiring. From Wall Street to Silicon Valley, employers are using tough and

tricky questions to gauge job candidates' intelligence, imagination, and problem-solving ability -- qualities needed to survive in today's hypercompetitive global marketplace. For the first time, William Poundstone reveals the toughest questions used at Microsoft and other Fortune 500 companies -- and supplies the answers. He traces the rise and controversial fall of employer-mandated IQ tests, the peculiar obsessions of Bill Gates (who plays jigsaw puzzles as a competitive sport), the sadistic mind games of Wall Street (which reportedly led one job seeker to smash a forty-third-story window), and the bizarre excesses of today's hiring managers (who may start off your interview with a box of Legos or a game of virtual Russian roulette). How Would You Move Mount Fuji? is an indispensable book for anyone in business. Managers seeking the most talented employees will learn to incorporate puzzle interviews in their search for the top candidates. Job seekers will discover how to tackle even the most brain-busting questions, and gain the advantage that could win the job of a lifetime. And anyone who has ever dreamed of going up against the best minds in business may discover that these puzzles are simply a lot of fun. Why are beer cans tapered on the end, anyway?
