In THE LIMIT, Michael Cannell tells the enthralling story of Phil Hill—a lowly California mechanic who would become the first American-born driver to win the Grand Prix—and, on the fiftieth anniversary of his triumph, brings to life a vanished world of glamour, valor, and daring. With the pacing and vivid description of a novel, THE LIMIT charts the journey that brought Hill from dusty California lots racing midget cars into the ranks of a singular breed of men, competing with daredevils for glory on Grand Prix tracks across Europe. Facing death at every turn, these men rounded circuits at well over 150 mph in an era before seat belts or roll bars—an era when drivers were “crushed, burned, and beheaded with unnerving regularity.” From the stink of grease-smothered pits to the long anxious nights in lonely European hotels, from the tense camaraderie of teammates to the trembling suspense of photo finishes, THE LIMIT captures the 1961 season that would mark the high point of Hill's career. It brings readers up close to the remarkable men who surrounded Hill on the circuit—men like Hill's teammate and rival, the soign   and cool-headed German count Wolfgang Von Trips (nicknamed “Count Von Crash”), and Enzo Ferrari, the reclusive and monomaniacal padrone of the Ferrari racing empire. Race by race, THE LIMIT carries readers to its riveting and startling climax—the final contest that would decide it all, one of the deadliest in Grand Prix history.

After twenty years of SAS operations Bob Shepherd retired to work as an advisor on the international commercial security circuit. Then 9/11 happened and Bob found himself back in war zones on assignments far more perilous than anything he had encountered in the SAS: from ferrying journalists across firing lines in the West Bank and Gaza to travelling to the heart of Osama bin Laden's Afghan lair. As the war on terror escalated, Bob contended with increasingly sophisticated insurgents. But the most disturbing development he witnessed was much closer to home; namely The Circuit's rise from a niche business staffed by top veterans into an unregulated, billion dollar industry that too often places profits above lives...

One of the most influential living psychologists looks at the history of his life and discipline, and paints a much brighter future for everyone. When Martin E. P. Seligman first encountered psychology in the 1960s, the field was devoted to eliminating misery: it was the science of how past trauma creates present symptoms. Today, thanks in large part to Seligman's Positive Psychology movement, it is ever more focused not on what cripples life, but on what makes life worth living—with profound consequences for our mental health. In this wise and eloquent memoir, spanning the most transformative years in the history of modern psychology, Seligman recounts how he learned to study optimism—including a life-changing conversation with his five-year-old daughter. He tells the human stories behind some of his major findings, like CAVE, an analytical tool that predicts election outcomes (with shocking accuracy) based on the language used in campaign speeches, the international spread of Positive Education, the launch of the US Army's huge resilience program, and the canonical studies that birthed the theory of learned helplessness—which he now reveals was incorrect. And he writes at length for the first time about his own battles with depression at a young age. In The Hope Circuit, Seligman makes a compelling and deeply personal case for the importance of virtues like hope, gratitude, and wisdom for our mental health. You will walk away from this book not just educated but deeply enriched.

A sociologist and former fashion model takes readers inside the elite global party circuit of "models and bottles" to reveal how beautiful young women are used to boost the status of men. Million-dollar birthday parties, megayachts on the French Riviera, and \$40,000 bottles of champagne. In today's New Gilded Age, the world's moneyed classes have taken conspicuous consumption to new extremes. In *Very Important People*, sociologist, author, and former fashion model Ashley Mears takes readers inside the exclusive global nightclub and party circuit—from New York City and the Hamptons to Miami and Saint-Tropez—to reveal the intricate economy of beauty, status, and money that lies behind these spectacular displays of wealth and leisure. Mears spent eighteen months in this world of "models and bottles" to write this captivating, sometimes funny, sometimes heartbreaking narrative. She describes how clubs and restaurants pay promoters to recruit beautiful young women to their venues in order to attract men and get them to spend huge sums in the ritual of bottle service. These

"girls" enhance the status of the men and enrich club owners, exchanging their bodily capital for as little as free drinks and a chance to party with men who are rich or aspire to be. Though they are priceless assets in the party circuit, these women are regarded as worthless as long-term relationship prospects, and their bodies are constantly assessed against men's money. A story of extreme gender inequality in a seductive world, Very Important People unveils troubling realities behind moneyed leisure in an age of record economic disparity.

The A Circuit Penguin

Winner of the 2019 PEN/ESPN Award for Literary Sports Writing “The Circuit is the best sports book I’ve read in years, maybe ever.” –Rich Cohen, author of The Chicago Cubs and Monsters “As sports writing goes, The Circuit is unusual in the very best way. Rowan Ricardo Phillips writes with such fluidity, and packs the book with bursts of brilliance. This is a compulsively readable guide to one truly Homeric year of professional tennis.” –John Green, author of The Fault in Our Stars An energetic, lyrical, genre-defying account of the 2017 tennis season. In The Circuit: A Tennis Odyssey, the award-winning poet–and Paris Review sports columnist–Rowan Ricardo Phillips chronicles 2017 as seen through the unique prism of its pivotal, revelatory, and historic tennis season. The annual tennis schedule is a rarity in professional sports in that it encapsulates the calendar year. And like the year, it’s divided into four seasons, each marked by a final tournament: the Grand Slams. Phillips charts the year from winter’s Australian Open, where Roger Federer and Rafael Nadal renewed their rivalry in a match for the ages, to fall’s U.S. Open. Along the way, Phillips paints a new, vibrant portrait of tennis, one that captures not only the emotions, nerves, and ruthless tactics of the point-by-point game but also the quicksilver movement of victory and defeat on the tour, placing that sense of upheaval within a broader cultural and social context. Tennis has long been thought of as an escapist spectacle: a bucolic, separate bauble of life. The Circuit will convince you that you don’t leave the world behind as you watch tennis–you bring it with you.

**Story of My Life** Turtleback

Dyson has become a byword for high-performing products, technology, design, and invention. Now, James Dyson, the inventor and entrepreneur who made it all happen, tells his remarkable and inspirational story in Invention: A Life, “one of the year’s most relevant and revelatory business books” (The Wall Street Journal). Famously, over a four-year period, James Dyson made 5,127 prototypes of the cyclonic vacuum cleaner that would transform the way houses are cleaned around the world. In devoting all his resources to iteratively setbacks came hard-fought success. His products—including vacuum cleaners, hair dryer and hair stylers, and fans and purifiers—are not only revolutionary technologies, but design classics. This was a legacy of his time studying at the Royal College of Art in the 1960s, when he was inspired by some of the most famous artists, designers, and inventors of the era, as well as his engineering heroes such as Frank Whittle and Alex Issigonis. In Invention: A Life, Dyson reveals how he came to set up his own company and led it to become one of the most inventive technology companies in the world. It is a compelling and dramatic tale, with many obstacles overcome. Dyson has always looked to the future, even setting up his own university to help provide the next generation of engineers and designers. For, as he says, “everything changes all the time, so experience is of little use.” Whether you are someone who has an idea for a better product, an aspiring entrepreneur, whether you appreciate great design or a page-turning read, Invention: A Life is an “entertaining and inspiring memoir” (Kirkus Reviews, starred review) that offers motivation, hope, and much more.

The author of Say Her Name shares a deeply personal memoir of grieving the loss of his wife—and confronting the troubled city where she grew up. Five years after his wife’s untimely death, Francisco Goldman decided to overcome his fear of driving in Mexico City. The widower and award-winning writer wanted to symbolize his love and enduring grief by fully embracing his late wife’s childhood home and the city that came to mean so much to them. The Interior Circuit is Goldman’s chronicle of his personal and political awakening to the nuances of this unique city as he learns to navigate the “circuito interior,” a network of highway-like roads that crisscross the traffic-plagued city. Many regard Mexico’s capital—then known as the “DF” or Distrito Federal—as a haven from the many social ills and violence that wracks the rest of the country. Goldman’s account reveals the more complicated truth. As Mexico’s narco war raged on and the Institutional Revolutionary Party (the PRI) returned to power in the summer 2012 elections, the DF’s special apartness came under threat. When organized crime-related violence and death erupt in the summer of 2013, Goldman sets out to try to understand the new challenges facing the city. Part travelogue, part memoir, and part political reportage, The Interior Circuit “is so sneakily brilliant it’s hard to put into words. . . . It is also, in the finest sense, a book that creates its own form” (Los Angeles Times).
