China's immersion in the world economy and trading system is a continued source of great interest throughout the globe. The book is divided into three parts, the first being an overview of the Chinese investment environment and the development of foreign direct investment (FDI) over the last twenty years. The second part then goes on to focus specifically on the characteristics of European companies

involved in FDI into China. The third part looks at different management aspects of EU invested enterprises within China, using newly acquired data. This comprehensive overview of European direct investment in China will be of great interest to both students and academics in the fields of Chinese Economics and Business, Organisational Theory and the Theory of the Firm. The concluding business and policy implications of the book will also make it very useful to professionals and policy-makers.

Strategy and Management of

Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An

analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

The study of music in commercials is well-suited for exploring the persuasive impact that music has beyond the ability to entertain, edify, and purify its audience. This book focuses on music in commercials from an interpretive text analytical perspective, answering hitherto neglected questions: What characterizes

music in commercials compared to other commercial music and other music on TV? How does music in commercials relate to music ' outside ' the universe of commercials? How and what can music in commercials signify? Author Nicolai Graakjær sets a new benchmark for the international scholarly study of music on television and its pervading influence on consumer choice.
