The Coast of Utopia, Part I McGraw Hill Professional

In 2005, J.C. Hallman came across a scientific paper about "Pleistocene Rewilding," a peculiar idea from conservation biology that suggested repopulating bereft ecosystems with endangered "megafauna." The plan sounded utterly utopian, but Hallman liked the idea as much as the scientists did—perhaps because he had grown up on a street called Utopia Road in a master-planned community in Southern California. Pleistocene Rewilding rekindled in him a longstanding fascination with utopian ideas, and he went on to spend three weeks at the world's oldest "intentional community," sail on the first ship where it's possible to own "real estate," train at the world's largest civilian combat-school, and tour a \$30 billion megacity built from scratch on an artificial island off the coast of Korea. In *Utopia* explores the history of utopian literature and thought in the narrative context of the real-life fruits of that history.

In Pursuit of Utopia Rowman & Littlefield

This book integrates class, environmental, and political analysis to uncover the history of clearcutting in the Douglas fir forests of B.C., Washington, and Oregon between 1880 and 1965. Part I focuses on the mode of production, analyzing the technological and managerial structures of worker and resource exploitation from the perspective of current trends in labour process research. Rajala argues that operators sought to neutralize the variable forest environment by emulating the factory model of work organization. The introduction of steam-powered overhead logging methods provided industry with a rudimentary factory regime by 1930, accompanied by productivity gains and diminished workplace autonomy for loggers. After a Depression-inspired turn to selective logging with caterpillar tractors timber capital continued its refinement of clearcutting technologies in the post-war period, achieving complete mechanization of yarding

with the automatic grapple. Driving this process of innovation was a concept of industrial efficiency that responded to changing environmental conditions, product and labour markets, but sought to advance operators' class interests by routinizing production. The managerial component of the factory regime took shape in accordance with the principles of the early 20th century scientific management movement. Requiring expertise in the organization of an expanded, technologically sophisticated exploitation process, operators presided over the establishment of logging engineering programs in the region's universities. Graduates introduced rational planning procedures to coastal logging, contributing to a rate of deforestation that generated a corporate call for technical forestry expertise after 1930. Industrial foresters then emerged from the universities to provide firms with data needed for long-range investment decisions in land acquisition and management. Part II constitutes an environmental and political history of clearcutting. This reconstructs the process of scientific research concerning the factory regime's impact on the ecology of the Douglas fir forest, assessing how knowledge was utilized in the regulation of cutting practices. Analysis of business-government relations in British Columbia, Washington and Oregon suggests that the reliance of those client states on revenues generated by timber capital encouraged a pattern of regulation that served corporate rather than social and ecological ends.

With a writing career spanning over half a century and encompassing media as diverse as conferences, radio, journalism, fiction, theatre, film, and television, Tom Stoppard is probably the most prolific and significant living British dramatist. The critical essays in this volume celebrating Stoppard's 75th birthday address many facets of Stoppard's work, both the well-known, such as Rosencrantz and Guildenstern are Dead and Shakespeare in Love, as well as the relatively critically neglected, including his novel Lord Malquist and Mr. Moon and his short stories, "The Story," "Life, Times: Fragments," and "Reunion." The essays presented here analyze plays such as Arcadia, The Invention of Love, The Real Thing, and Jumpers, Stoppard's film adaptation of J. G. Ballard's Empire of the Sun, his television adaptation of Ford Madox Ford's Parade's End, and his stage adaptations of Chekhov's plays Ivanov, The Seagull, and The Cherry Orchard, as well as his own theatrical trilogy on Russian history, The Coast of Utopia (Voyage, Shipwreck, and Salvage). Also included is an interview with Tom Stoppard on the 16 November 1982 debut of his play The Real Thing at Strand Theatre, London, and a detailed account of the Stoppard holdings in the Harry Ransom Center at the University of Texas at Austin. From his fascination with Shakespeare and other historical figures (and time periods) to his exploration of the connection between poetic creativity and scholarship to his predilection for word play, verbal ambiguity and use of anachronism, Stoppard's work is at once insightful and wry, thought-provoking and entertaining, earnest and facetious. The critical essays in this volume hope to do justice to the brilliant complexity that is Tom Stoppard's body of work.

In Tom Stoppard's Plays: Patterns of Plenitude and Parsimony Nigel Purse assesses the complete canon of Tom Stoppard's works on a thematic basis. He explains that, amongst the plenitude of chaotic comedy, wordplay and intellectual ping-pong of Stoppard's plays, the principle of parsimony that is Occam's razor lies at the heart of his works. He identifies key patterns in theme – ethics and duality – and method – Stoppard's stage debates and his dramatic vehicles – as well as in theatrical devices. Quoting extensively from all Stoppard's published works, many of his interviews and also unpublished material Nigel Purse arrives at a comprehensive and unique appraisal of Stoppard's plays.

Tom Stoppard's magnificent trilogy, *The Coast of Utopia*, was the most keenly awaited and successful drama of 2007. Now Stoppard's crowning achievement (David Cote, *Time Out New York*) has been collected in one volume, with an introduction by the author, and includes the definitive text used during Lincoln Center's recent celebrated run. *The Coast of Utopia* comprises three sequential plays that chronicle the story of a group of friends who come of age under the Tsarist autocracy of Nicholas I, and for whom the term intelligentsia was coined. Among them are the anarchist Michael Bakunin, who was to challenge Marx for the soul of the masses; Ivan Turgenev, author of some of the most enduring works in Russian literature; the brilliant, erratic young critic Vissarion Belinsky; and Alexander Herzen, a nobleman's son and the first self-proclaimed socialist in Russia, who becomes the main focus of this drama of politics, love, loss, and betrayal. In *The Coast of Utopia*, Stoppard presents an inspired examination of the struggle between romantic anarchy, utopian idealism, and practical reformation in what *The New York Times* calls brilliant, sprawling . . . a rich pageant.

During the Great Depression, the Los Angeles area was rife with radical movements. Although many observers thought their ideas unworkable, even dangerous, Southern Californians voted for them by the tens of thousands. This book asks why. To find answers, author Errol Wayne Stevens takes readers through the history of such movements as the Utopian Society, Dr. Francis Townsend's old-age revolving pension plan, Upton Sinclair's End Poverty in California gubernatorial campaign, and Retirement Life Payments, known as Ham and Eggs. The book also examines the Los Angeles Communists and the free-market capitalists, both quasi-religious movements with large followings, as well as the self-help cooperatives, a spontaneous upsurge of neighbors who came together to help one another in a time of desperate need. As to these movements' extraordinary popularity, Stevens finds the standard explanations unpersuasive. He debunks the idea that naïve, unsophisticated Southern Californians, living aimless, empty lives, suffering from ennui, and longing for community, readily supported charismatic leaders who promised a way out of the Great Depression. In Stevens's telling, Southern Californians supported these movements because they spoke to their needs. Fearful or desperate, some elderly and hopeless, Angelenos cared less about the programs' feasibility than about their promise of relief. As one Ham and Eggs supporter succinctly explained: "It may be a racket and maybe it won't work more than a couple of weeks, but that will be \$60 more than I ever got before for one vote." Finding parallels between past and present, readers might wonder why people remain loyal to programs that prove unrealistic, or why voters continue to support leaders who reveal, time and again, their ignorance or dishonesty. In its illumination of a troubled time in American history not so long

ago, this book offers insight into our own.

Many people who work on Broadway keep scrapbooks of their experiences, with photos, signed posters, ticket stubs, and of course Playbills. Playbill Books has expanded this idea into an annual project that is becoming a Broadway institution: *The Playbill Broadway Yearbook*. Taking the form of a school

yearbook, the third edition is packed with photos and memorabilia from the 2006-2007 Broadway season. The new edition includes chapters on all 67 Broadway shows that ran during the season - new shows like *Curtains* and *Spring Awakening* as well as long-running ones like *Wicked*. In addition to headshots of all the actors who appeared in *Playbill*, the book has photos of producers, writers, designers, stage managers, stagehands, musicians - even ushers. The *Playbill Broadway Yearbook* also has a correspondent on each production to report on inside information: opening-night gifts, who got the Gypsy Robe, daily rituals, celebrity visits, memorable ad-libs, and more. Correspondents range from dressers and stage doormen to stage managers, dancers, featured players, and even stars of the shows.
