The victory of Richard Nixon

in the US presidential
election of 1968 swung on an
"October Surprise"— a
treasonous plot engineered by
key figures in the Republican
Party to keep the South
Vietnamese government away
from peace talks in Paris,
costing thousands of American
lives. There is growing
evidence that the CIA was
deeply involved in illegal

domestic operations targeting
Daniel Ellsberg, and in the
Watergate break-ins during
Nixon's 1972 campaign, which
ultimately led to his
downfall. CIA Director
Richard Helms' relationship
with Watergate burglar E.
Howard Hunt was much closer
than previously disclosed and
the CIA agent inside the plot
was sent on a double agent

mission by American intelligence after he got out of prison. Drawing on newly-declassified files and previously-unpublished documents, *Dirty Tricks* debunks the myths around Watergate and deepens our understanding of the “dirty tricks” that undermined democracy during the Nixon years and destroyed public trust in politics during the seventies. These scandals turn on the covert action of two powerful interest groups—the senior CIA officers around Helms, and the key advisers around Nixon – in this chilling story of political espionage and deception.

Post-Nationalist American Studies seeks to revise the cultural nationalism and celebratory American exceptionalism that tended to dominate American studies in the Cold War era, adopting a less insular, more transnational approach to the subject.

The Making of Modern America, introduces students to the cultural, social and political paths the United States has traveled from the end of WWII to the present day. While deftly cataloguing the sweeping changes and major events in America from “Dewey Defeats Truman” through the election of our first black President, this newly updated edition never loses touch with that American history taking place at the level of the people. This edition details not just the United States’ rich cultural history, but elegantly repositions it as integral to our understanding of any portion of this country’s past. Donaldson provides a factual foundation for students and then pushes them to interpret those facts, framing the discussions essential to any complete study of American history. *The Making of Modern America, Second Edition* is updated to include: —A new chapter titled “The Second Bush and Obama: From the War on Terrorism to the Audacity of Hope” updating readers on the calamitous end to President George W. Bush’s second term, the Obama administration’s first term challenges and the Great Recession. —Newly revised readings each profiling an historical event, speech or figure—Lee Harvey Oswald to Bill Gates to Condoleeza Rice— at the conclusion of each chapter.

In a world where the notion of home is more traumatizing than it is comforting, artists are using this literal and figurative space to reframe human responses to trauma. Building on the scholarship of key art historians and theorists such as Judith Butler and Mieke Bal, Claudette Lauzon embarks upon a transnational analysis of contemporary artists who challenge the assumption that ‘ home ’ is a stable site of belonging. Lauzon ’ s boundary-breaking discussion of artists including Krzysztof Wodiczko, Sanitago Sierra, Doris Salcedo, and Yto Barrada posits that contemporary art offers a unique set of responses to questions of home and belonging in an increasingly unwelcoming world. From the legacies of Colombia ’ s ‘ dirty war ’ to migrant North African workers crossing the Mediterranean, *The Unmaking of Home in Contemporary Art* bears witness to the suffering of others whose overriding notion of home reveals the universality of human

vulnerability and the limits of empathy.

Discover America 's secrets in this second of two volumes of the young readers ' edition of The Untold History of the United States, from Academy Award – winning director Oliver Stone and Peter Kuznick, adapted by Eric Singer. There is history as we know it. And there is history we should have known. Complete with poignant photos and little-known but vitally important stories, this second of two volumes traces how people around the world responded to the United States 's rise as a superpower from the end of World War II through an increasingly tense Cold War and, eventually, to the brink of nuclear annihilation during the Cuban Missile Crisis. This is not the kind of history taught in schools or normally presented on television or in popular movies. This riveting young readers volume challenges prevailing orthodoxies to reveal uncomfortable realities about the US role in heightening Cold War tensions. It also humanizes the experiences of diverse people, at home and abroad, who yearned for a more just, equal, and compassionate world. This volume will come as a breath of fresh air for students, teachers, and budding young historians hungry for different perspectives—which makes it a crucial counterpoint to today 's history textbooks. Adapted by high school and university educator

Eric S. Singer from the bestselling book and companion to the documentary The Untold History of the United States by Academy Award – winning director Oliver Stone and renowned historian Peter Kuznick, this volume gives young readers a powerful and provocative look at the US role in the Cold War. It also provides a blueprint for those concerned with shaping a better and more equitable future for people across the world.

For more than 200 years, Gainesville, Georgia, has been the trading and business center for Northeast Georgia's mountain region. Its character dictated by rugged mountain terrain and independent, self-reliant people, Gainesville entertains a unique history quite different from the traditional plantation culture of the American South. Celebrated within these pages are the people and places of this "Queen City of the Mountains." With images culled primarily from the Hall County Library and the Archives of the State of Georgia, Gainesville: 1900-2000 captures the memories of the twentieth century on the eve of the millennium. From its days as the "Great Health Resort of the South" to its transition into a metropolitan community, Gainesville has experienced enormous growth and change. Included in this collection are images of the

disastrous 1936 tornado that swept through the city, the mills that were active in the early 1900s, and the poultry industry that became a dominant economic force in Gainesville. Residents will delight in the early photographs of the town square that reflect a simpler way of life.

The Final Report of the Select Committee on Presidential Campaign Activities, United States Senate, Pursuant to S. Res. 60, February 7, 1973 Univ. Press of Mississippi
The US intelligence community as it

currently exists has been deeply influenced by the press. Although considered a vital overseer of intelligence activity, the press and its validity is often questioned, even by the current presidential administration. But dating back to its creation in 1947, the US Central Intelligence Agency (CIA) has benefited from relationships with members of the US press to garner public support for its activities, defend itself from its failures, and promote US interests around the world. Many reporters, editors, and publishers were willing and even eager to work with the agency, especially at the height of the Cold War. That relationship began to change by the 1960s when the press began to challenge the CIA and expose many of its questionable activities. Respected publications went from studiously ignoring the CIA's activities to reporting on the Bay of Pigs, CIA pacification programs in Vietnam, the CIA's war in Laos, and its efforts to use US student groups and a variety of other non-government organizations as Cold War tools. This reporting prompted the first major congressional investigation of the CIA in December 1974. In *The Rising Clamor:*

The American Press, the Central Intelligence Agency, and the Cold War, David P. Hadley explores the relationships that developed between the CIA and the press, its evolution over time, and its practical impact from the creation of the CIA to the first major congressional investigations of its activities in 1975 – 76 by the Church and Pike committees. Drawing on a combination of archival research, declassified documents, and more than 2,000 news articles, Hadley provides a balanced and considered account of the different actors in the press and CIA relationships, how their collaboration helped define public expectations of what role intelligence should play in the US government, and what an intelligence agency should be able to do.

Fewer Americans were captured or missing during the Vietnam War than in any previous major military conflict in U.S. history. Yet despite their small numbers, American POWs inspired an outpouring of concern that slowly eroded support for the war. Michael J. Allen reveals how wartime loss transformed U.S. politics well before, and long after, the war's official end. Throughout the war's last years

and in the decades since, Allen argues, the effort to recover lost warriors was as much a means to establish responsibility for their loss as it was a search for answers about their fate. Though millions of Americans and Vietnamese took part in that effort, POW and MIA families and activists dominated it. Insisting that the war was not over "until the last man comes home," this small, determined group turned the unprecedented accounting effort against those they blamed for their suffering. Allen demonstrates that POW/MIA activism prolonged the hostility between the United States and Vietnam even as the search for the missing became the basis for closer ties between the two countries in the 1990s. Equally important, he explains, POW/MIA families' disdain for the antiwar left and contempt for federal authority fueled the conservative ascendancy after 1968. Mixing political, cultural, and diplomatic history, *Until the Last Man Comes Home* presents the full and lasting impact of the Vietnam War in ways that are both familiar and surprising.

Highly Recommended by Dr. J. Hindman, School of Education, College of William & Mary What was it like living in a small sleepy Southern town when the war suddenly arrived on the doorstep 150 years ago? These are the stories of residents from various walks of life, and the struggles they face as the Union's Peninsula Campaign deploys forces to Fort Monroe, engages just east of

Williamsburg, then continues, ' On to Richmond!' as their battle cry went. For example, -William & Mary students, like Thomas Barlow, face life-changing decisions: to return home, or enlist with his classmates? Some of them would become heroes, but many more casualties. -Slaves, like W.B. Nelson, must decide as well: should he remain with his master or runaway? While some remain, many become ' contrabands, ' and later freedmen, and ' colored troops. ' -Politicians, like Benjamin Butler of Boston, are given the rank of Major General despite the lack of any military experience, while General George B. McClellan, who despised President Lincoln and Washington politics, later runs for national office. Neither transformation is particularly successful. "

-Williamsburg residents, like shopkeeper William W. Vest and family must decide between fleeing as refugees, or staying, like William Peachy, lawyer, to endure Federal occupation. -Williamsburg's women, like Letitia Tyler Semple, lead efforts to improve soldier medical care, opening their homes to thousands of wounded. Others, like Mary Payne, persevere to be at her husband's bedside, while Miss Margaret Durfey falls in love with her patient. Post-Nationalist American Studies Univ of California Press

A social narrative documents the close ties between chemical weapons development and peaceful applications in insect warfare, discussing the role of chemists and chemistry in military history and the changing

attitude of war departments toward chemists. The American Press, the Central Intelligence Agency, and the Cold War The Cold War Comes to Main Street America in 1950 This volume compares films from the late Cold War era with films of the same genre, or of similar themes, from the post-Cold War era, paying particular attention to shifts in narrative that reflect changes in American culture, attitudes, and ideas. It explains how the absence of the Cold War has changed the way we understand and interpret film.

The first book to look at wilderness in the northeastern US, Wilderness Comes Home features a new approach based on ecological reserve design to protect biological diversity, rewilding and restoring lands to wilderness, and embedding wilderness in a landscape of sustainably managed farmland and forestland. It addresses major theoretical and practical aspects of this important issue -- whether, why, and how to reestablish wilderness areas in the Northeast. Although Western wilderness models already exist for undeveloped areas, Eastern models are still evolving. Protection and social management are being urged not for the "forest primeval" but for recovering

areas, in which returning species such as moose and peregrine falcons roam over new growth softwoods and hardwoods, interspersed with the stone walls that once marked field boundaries.

One of the most significant industrial states in the country, with a powerful radical tradition, Pennsylvania was, by the early 1950s, the scene of some of the fiercest anti-Communist activism in the United States. Philip Jenkins examines the political and social impact of the Cold War across the state, tracing the Red Scare's reverberations in party politics, the labor movement, ethnic organizations, schools and universities, and religious organizations. Among Jenkins's most provocative findings is the revelation that, although their absolute numbers were not large, Communists were very well positioned in crucial Pennsylvania regions and constituencies, particularly in labor unions, the educational system, and major ethnic organizations. Instead of focusing on Pennsylvania's right-wing politicians (the sort represented nationally by Senator

Joseph McCarthy), Jenkins emphasizes the anti-Communist activities of liberal politicians, labor leaders, and ethnic community figures who were terrified of Communist encroachments on their respective power bases. He also stresses the deep roots of the state's militant anti-Communism, which can be traced back at least into the 1930s.

4000 Bowls of Rice: A Prisoner of War Comes Home Routledge

In this unique book, Peter Alexander Meyers leads us through the social processes by which shock incites terror, terror invites war, war invokes emergency, and emergency supports unchecked power. He then reveals how the domestic political culture created by the Cold War has driven these developments forward since 9/11, contending that our failure to acknowledge that this Cold War continues today is precisely what makes it so dangerous. With eloquence and urgency Meyers argues that the mantra of our time— “ everything changed on 9/11! ” —is false and pernicious. By contrast, *Civic War and the Corruption of the Citizen* provides a novel account of long-term transformations in the citizen ' s experience of war, the constitution of political powers, and public uses of communication, and from that firm historical basis explains how a convergence of these social facts became the pretext for unprecedented opportunism and irresponsibility

after 9/11. Where others have observed that our rights are under attack, Meyers digs deeper and finds that today “ government by the people ” itself is at risk. Sparkling with historical and philosophical insight, this is a dramatic diagnosis of the American political scene that at once makes clear the new position of the citizen and the necessity for active citizenship if democracy is to endure.

Washington's Battle Against America's Veterans AudioGO

Hundreds of memoirs, novels, plays, and movies have been devoted to the American war in Vietnam. In spite of the great variety of media, political perspectives and the degrees of seriousness with which the war has been treated, Katherine Kinney argues that the vast majority of these works share a single story: that of Americans killing Americans in Vietnam. *Friendly Fire*, in this instance, refers not merely to a tragic error of war, it also refers to America's war with itself during the Vietnam years. Starting from this point, this book considers the concept of "friendly fire" from multiple vantage points, and portrays the Vietnam age as a crucible where America's cohesive image of itself is shattered--pitting soldiers against superiors, doves against hawks, feminism against patriarchy, racial fear against racial tolerance. Through the use of extensive evidence from the film and popular fiction of Vietnam (e.g. Kovic's *Born on the Fourth of July*, Didion's *Democracy*, O'Brien's *Going After Cacciato*, Rabe's *Sticks and Bones and Streamers*), Kinney draws a powerful

picture of a nation politically, culturally, and socially divided, and a war that has been memorialized as a contested site of art, media, politics, and ideology.
