This volume, first published in 1990, commemorates one of the most notable economic historians of his age. Professor W.H. Chaloner taught in the History Department of the University of Manchester from 1945 to 1981. He preferred the article to the book as the most appropriate vehicle of publishing the

results of his research. From 1938 to 1983 he wrote over 120 articles and prefaces, most of which appeared in historical journals and in the transactions of learned societies. These essays collected here cover a long period of time, from the Industrial Revolution to problems of the inter-war years in the twentieth century. They deal with a very wide range of topics, for Professor Chaloner was an authority on business, urban, transport, social and agricultural history.

In the first full-length economic history of pre-Confederation Nova Scotia, Julian Gwyn challenges the

popular myth that the British colony prospered before it became a province of Canada. Through his discussion of three periods in Nova Scotia's development (1740-1815, 1815-53, and 1853-70) and four themes (regionalism, imports and the standard of living, reciprocity, and the balance of payments) he shows that the colony's pre-Confederation economy was anything but glorious. Gwyn argues that Nova Scotia's economy suffered from numerous disadvantages and

had few strengths. The 1755 deportation of Acadians destroyed a flourishing agriculture, and the limited extent of arable soil inhibited continuous, interconnected settlement: the colony's regions remained sparsely connected even at Confederation. During the generation it took agriculture to recover from the Deportation, lumber came to provide both an export in its own right and the basis for shipping and shipbuilding. However, thanks in part to the colonial assembly's neglect, the availability of ships did not lead to a prosperous fishing industry. Throughout the period under study, Nova Scotia remained very vulnerable to shifts in the North Atlantic economy and to changes in Britain's military spending and its relations

with Nova Scotia's American and Canadian neighbours. British industrialization, changing patterns of trade with the West Indies, and the advent of steamships all challenged Nova Scotia's natural resource sectors and its shipping and shipbuilding, and Confederation necessitated yet another reorientation. While some sectors of the economy displayed real expansion during the early nineteenth century, Gwyn finds that overall the growth was "extensive" rather than "intensive" - it merely kept pace with expanding population, providing no base for the often-predicted glowing economic future. Excessive Expectations sheds light on the current economic problems faced by the Maritimes and will be of great interest to anyone

seeking to understand the historical background of this part of the Atlantic's economy.

More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries. As editor Kenneth E. Hendrickson, III, notes in his introduction: “ Since the end of the nineteenth-century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan. ” In *The Encyclopedia of the Industrial Revolution in World History* contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. The *Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the “ aerospace industry ” to “ zaibatsu. ” Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men and women, families, and

organizations. They also cover legal developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross-references and a brief list of suggested readings to alert readers to more detailed information. The *Encyclopedia of the Industrial Revolution in World History* includes over 300 illustrations, as well as artfully selected, extended quotations from key primary sources, from Thomas Malthus ’ “ Essay on the Principal of Population ” to Arthur Young ’ s look at Birmingham, England in 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale. The *Social Structure of Modern Britain* Routledge Heroism in the 19th and early 20th centuries is synonymous with military endeavours, imperial adventures and the 'great men of history'. There was, however, another prominent and influential strand of the idea which has, until now, been largely overlooked. This book seeks to address this oversight and establish new avenues of study by revealing and examining 'everyday' heroism; acts of life-risking bravery, undertaken by otherwise ordinary individuals, largely in the course of their daily lives and within quotidian surroundings. Adopting an interdisciplinary approach, John Price charts and investigates the growth and development of this important discourse,

presenting in-depth case studies of The Albert Medal and the Carnegie Hero Fund alongside a nationwide analysis of heroism monuments and an exploration of radical approaches to the concept. Unlike its military and imperial counterparts, everyday heroism embraced the heroine and this study reflects that with an examination of female heroism. Discovering why certain individuals or acts were accorded the status of being 'heroic' also provides insights into those that recognized them. Heroism is a flexible and malleable constellation of ideas, shaped or constructed along different lines by different people, so if you want to identify the characteristics of a group or society, much can be learnt by studying those it holds up as heroic. Consequently, *Everyday Heroism: Victorian Constructions of the Heroic Civilian* provides valuable and revealing evidence for a wide range of social and cultural topics including; class, gender, identity, memory, celebrity, and literary and visual culture.

The forgotten history of London: the world capital of revolution. In the eyes of Britain ' s heritage industry, London is the traditional home of empire, monarchy and power, an urban wonderland for the privileged, where the vast majority of Londoners feature only to applaud in the background. Yet, for nearly 2000 years, the city has been a breeding ground for radical ideas, home to thinkers, heretics and rebels from John Wycliffe to Karl Marx. It has been the site of sometimes violent clashes that changed the course of history: the Levellers ' doomed struggle for liberty in the aftermath of the Civil War; the silk weavers, match girls and dockers who crusaded for workers ' rights; and the Battle of Cable Street, where East Enders took on Oswald Mosley ' s Black Shirts. A People ' s History of London journeys to a city of pamphleteers, agitators, exiles

and revolutionaries, where millions of people have struggled in obscurity to secure a better future.
The French Revolution Routledge
The Social Structure of Modern Britain, Third Edition is a comprehensive account of the social structure of modern Britain. Aspects of social structure are examined from a historical and comparative perspective. The book includes statistical information, not only on the more obvious areas like births, deaths, and immigration, but also on such lesser known (but no less important) topics as leisure behavior, income and wealth, and trends in criminal and other deviant activities. Comprised of six chapters, this book begins with an introduction to the demographic features of British society, including population trends in the twentieth century, socio-economic aspects of population, and fertility and mortality trends, along with the effects of immigration on demography. Subsequent chapters focus on the family, social class, and education as well as leisure and pleasure. The final chapter is devoted to three major mechanisms of social control in British society: religion, political institutions, and law enforcement. In particular, it assesses the extent to which religious beliefs and political attitudes exert control over people's thoughts and behavior, together with the definition of

crime, the causes of criminal behavior, and the aims of a penal system. This monograph will be a useful resource for sociologists and social scientists.

Who were the People of the Moor? Sixty generations have lived here since the Roman Second Legion descended from the skyline. What is the significance of the spirit-road....or a beautiful pavement in a villa buried by the soil of centuries? Who were the mysterious hill-fort people who established a high-status society on an ancient site? We encounter Norman lords and the lives of the miserable, a Mayor of Bristol who lost his wife when Black Death swept the people away, a senior Judge but also the common people, determined to build a magnificent structure as a sign of faith and hope for the future. What would it have been like to go to church in 1460? We read of the irrepressible way that the late medieval life of Merry England spills over into the church; of payments to minstrels and skilled craftsmen. The People of the Moor have to face up to religion-shock as a reform movement rocks their foundations. They contend with a tsunami, pirates and soldiers. As the generations roll by, we experience life in an 18th century village and witness a remarkable experiment by Hannah and her sisters. An in-depth look at the mid-Victorians holds up a mirror to social transformation on wheels and the challenge of educating and

providing for the poor. Some intriguing characters pass each other in the street in 1840. Who is the village tailor, a yeoman farmer with relatives sentenced to death or transportation to Australia, a Quaker girl and the old gypsy who will die next year in the workhouse? In time new forms of power take hold and rural communities between the wars experience rapid social change. This story of small communities on their journey through time is a microcosm of English history. The march of 60 generations is our story too.

Along with her mother Emmeline, and her sister Christabel, Sylvia Pankhurst was one of the leading women's suffrage activists in early twentieth-century England, working with the militant Women's Social and Political Union. Unlike her family, however, who looked to parliament and spoke to elite and middle-class women's concerns, Sylvia consistently looked to working women and the labour movement as central to her feminist politics. In this illuminating political biography, feminist historian Barbara Winslow recovers Sylvia Pankhurst's life and work for a new generation of socialists and feminists. From Pankhurst's organizing with immigrant and working women in London's East End to her revolutionary communism and growing internationalism and anti-fascism, Winslow gives us the story of a brilliantly inspiring unorthodox feminist and unorthodox socialist. With a preface from internationally recognized socialist feminist

historian and activist, Sheila Rowbotham. 1746-1946, by G.D.H. Cole and Raymond Postgate ... [2nd Edition, Enlarged, Brought Up to Date and Partly Rewritten.]. Feral House
This book, first published in 1983, examines in depth the nature and sources of class radicalism in France and Britain and takes issue with some of the major theories of class consciousness and class action. Drawing on data both from detailed case studies and from wider national surveys, it shows that the conflict of class interests within capitalist societies can lead to sharply diverging attitudes to class inequality. It argues that the explanation of such differences cannot be found in some 'general law of the evolution of social conflict in capitalist society. It must be sought in the profound institutional differences that exist between the two societies. In particular the study argues for a reassessment of the importance of the experience of war and of the way in which the business and political elite handled the social crises generated by war, in accounting for the long-term structural divergence of capitalist societies.

Like the corset, the women's magazines which emerged in the nineteenth century produced a 'natural' idea of femininity: the domestic wife; the fashionable woman; the romancing and desirable girl. Their legacy, from agony aunts to fashion plates, are easily traced in their modern counterparts. But do these magazines and their promises empower or disempower their readers? *A Magazine of Her Own?* is a lively and revealing exploration of this immensely popular form from its beginnings. In fascinating detail Margaret Beetham investigates the desires, images and interpretations of femininity posed by a medium whose readership was and still is almost exclusively female. *A Magazine of Her Own* is at once a chronological tracing of the history, a collection of intriguing case studies and an intervention into recent debates about gender and sexuality in popular reading. It is a book which anyone who is interested in the unique, influential world of the woman's magazine - students, scholars and general readers alike - will want to read

This broad-based collection of essays is an introduction both to the concerns of contemporary folklore scholarship and to the variety of forms that folk performance has taken throughout English history. Combining

case studies of specific folk practices with discussion of the various different lenses through which they have been viewed since becoming the subject of concerted study in Victorian times, this book builds on the latest work in an ever-growing body of contemporary folklore scholarship. Many of the contributing scholars are also practicing performers and bring experience and understanding of performance to their analyses and critiques. Chapters range across the spectrum of folk song, music, drama and dance, but maintain a focus on the key defining characteristics of folk performance – custom and tradition – in a full range of performances, from carol singing and sword dancing to playground rhymes and mummers' plays. As well as being an essential reference for folklorists and scholars of traditional performance and local history, this is a valuable resource for readers in all disciplines of dance, drama, song and music whose work coincides with English folk traditions.
