The Copernicus Complex: Is Human Life Special or Mediocre?

The Copernicus Complex: Our Cosmic Significance in a Universe of Planets and Probabilities (Hardcover) by Caleb Scharf
Nicolaus Copernicus

is credited with the realisation that the Earth is not at the centre of the Universe, but orbits around the Sun. This was a key step in the development of the idea that we do not occupy a special place in ...

Caleb Scharf - Wikipedia

In "The Copernicus Complex" Caleb talks about our place in the universe, beginning with Copernicus' discovery that the earth is not the center of the universe, and then exploring whether the earth with all its life friendly properties is unique or rare in the cosmos.

In The Copernicus Complex, the renowned astrophysicist Caleb

Scharf takes us on a scientific adventure, from tiny microbes within the Earth to distant exoplanets, probability theory, and beyond, arguing that there is a solution to this contradiction, a third way of viewing our place in the cosmos, if we weigh the evidence properly.
