The string theory landscape or landscape of vacua refers to the collection of possible false vacua in string theory, together comprising a collective "landscape" of choices of parameters governing compactifications. The term "landscape"

comes from the notion of a fitness landscape in evolutionary biology. It was first applied to cosmology by Lee Smolin in his book *The Life of the Cosmos*, and was first used in the context of string theory by Leonard Susskind.

The String Theory Landscape The most recent update to the Big Bang theory, called the String Theory Landscape, arose

out of elements of string theory and cosmic inflation. The theory's inclusion of a multiverse and its denial of immutable physical laws has raised debates that continue to this day. This story is part 1 of a five-part series.

The Cosmic Landscape: String Theory and the Illusion of ...

The Cosmic Landscape: String Theory and the Illusion of Intelligent Design by Leonard Susskind "The Cosmic Landscape" is an informative, provocative theoretical physics book about how the world came to be the way it is. Dr. Leonard Susskind takes the layperson behind the scenes of an on-going debate among physicists and cosmologists; it's a battle between those who believe that the laws of nature are determined by mathematical relations, and those who believe that the Laws of Physics have ...

Cosmic landscape : string theory and the illusion of ...

The beginning of the 21st century is a watershed in modern science, a time that will forever change our understanding of the universe, Susskind contends. Several decades ago, he introduced the revolutionary concept of string theory to the world of physical science.
