The enterprise of Messrs. T. Nelson & Sons and the friendly accommodation of Messrs. Macmillan render possible this collection in one cover of all the short stories by me that I care for any one to read again. Except for the two series of linked incidents that make up the bulk of the book called Tales of Space and Time, no short story of mine of the slightest merit is excluded from this volume. Many of very questionable merit find a place; it is an inclusive and not an exclusive gathering. And the task of selection and revision brings home to me with something of the effect of discovery that I was once an industrious writer

of short stories, and that I am no longer anything of the kind. I have not written one now for quite a long time, and in the past five or six years I have made scarcely one a year. The bulk of the fifty or sixty tales from which this present three-and-thirty have been chosen dates from the last century. This edition is more definitive than I supposed when first I arranged for it. In the presence of so conclusive an ebb and cessation an almost obituary manner seems justifiable. I find it a little difficult to disentangle the causes that have restricted the flow of these inventions. It has happened, I remark, to others as well as to myself, and in spite of the kindest encouragement to continue from editors and readers. There was a time when life bubbled with short stories; they were always coming to the surface of my mind, and it is no deliberate change of will that has

thus restricted my production. It is rather, I think, a diversion of attention to more sustained and more exacting forms. It was my friend Mr. C.L. Hind who set that spring going. He urged me to write short stories for the Pall Mall Budget, and persuaded me by his simple and buoyant conviction that I could do what he desired. There existed at the time only the little sketch, "The Jilting of Jane," included in this volume—at least, that is the only tolerable fragment of fiction I find surviving from my pre-Lewis-Hind period. But I set myself, so encouraged, to the experiment of inventing moving and interesting things that could be given vividly in the little space of eight or ten such pages as this, and for a time I found it a very entertaining pursuit indeed. Mr. Hind's indicating finger had shown me an amusing possibility of the mind. I found that, taking almost anything as a starting-point and letting my thoughts play about it, there would presently come out of the darkness, in a manner quite inexplicable, some absurd or vivid little incident more or less relevant to that initial nucleus. Little men in canoes upon sunlit oceans would come floating out of nothingness, incubating the eggs of prehistoric monsters unawares; violent conflicts would break out amidst the flower-beds of suburban gardens; I would discover I was peering into remote and

mysterious worlds ruled by an order logical indeed but other than our common sanity....

Three hundred miles and more from Chimborazo, one hundred from the snows of Cotopaxi, in the wildest wastes of Ecuador's Andes, there lies that mysterious mountain valley, cut off from the world of men, the Country of the Blind. Long years ago that valley lay so far open to the world that men might come at last through frightful gorges and over an icy pass into its equable meadows; and thither indeed men came, a family or so of Peruvian half-breeds fleeing from the lust and tyranny of an evil Spanish ruler.

It is one of Wells's best known stories, and features prominently in literature dealing with blindness. "In the country of the blind, the one-eyed man is king." Or is he? In H. G. Wells' acclaimed tale, a stranded mountaineer encounters an isolated society in which his apparent advantage proves less than valuable. Plot Summary: While attempting to summit the unconquered crest of Parascotopetl, a mountaineer named Nuñez slips and falls down the far side of the mountain. At the end of his descent, down a snow-slope in the mountain's shadow, he finds a valley, cut off from the rest of the world on all sides by steep precipices. Unbeknownst to Nuñez, he has discovered the fabled "Country of the Blind". The valley had been a haven for settlers fleeing

the tyranny of Spanish rulers, until an earthquake reshaped the surrounding mountains, cutting the valley off forever from future explorers. The isolated community prospered over the years, despite a disease that struck them early on, rendering all newborns blind. As the blindness slowly spreads over many generations, the people's remaining senses sharpened, and by the time the last sighted villager had died, the community had fully adapted to life without sight.

Carolyn Ives Gilman comes Dark Orbit, a compelling novel featuring alien contact, mystery, and murder. Reports of a strange, new habitable planet have reached the Twenty Planets of human civilization. When a team of

scientists is assembled to investigate this world, an exoethnologist Sara Callicot is recruited to keep an eye on an unstable crewmate. Thora was once a member of the interplanetary elite, but since her prophetic delusions helped mobilize a revolt on Orem, she's been banished to the farthest reaches of space, because of the risk that her very presence could revive unrest. Upon arrival, the team finds an extraordinary crystalline planet, laden with dark matter. Then a crew member is murdered and Thora mysteriously disappears. Thought to be uninhabited, the planet is in fact home to a blind, sentient species whose members navigate their world with a bizarre vocabulary and extrasensory perceptions. Lost in the deep crevasses of the planet among these people, Thora must battle her demons and learn to comprehend the native inhabitants in order to find her crewmates and warn them of an impending danger. But her most difficult task may lie in persuading the crew that some powers lie beyond the boundaries of science. Anticipations H. G. Wells - Anticipations of the Reaction of Mechanical and Scientific Progress upon Human Life and Thought, or as it is generally known "Anticipations" was written by H.G. Wells in 1900, at the age of 34. The book became a bestseller, and he personally deemed it "the keystone to the main arch of my work." Wells looks at the changes due to occur, because of various technologies. In both a social and material superstructural sense. He starts with the changes caused by the steam engine and the mechanical revolution that occurred. Wells believed that humans were living through a great reorganisation of society, which would ultimately effect every single aspect of life. The accuracy of Wells' predictions are stunning.

Wrestling with doubt can be profoundly lonely, but Portland pastor Dominic Done offers a safe place to openly wrestle with your faith without being criticized or judged. Writing with humor and candor out of his own experiences, and incorporating Scripture, literature, and accounts of others who have doubted, Dominic Done argues that not only is questioning normal, it is often a path

toward a rich and vibrant faith. Rather than viewing trust and doubt as incompatible, When Faith Fails provides readers with a way to wrestle and ask questions while growing ever closer to God. No subject is off-limits, and Dominic fearlessly and graciously addresses topics including: the experience of tragedy the difficult parts of the Bible the intersection of science and faith the times when God is silent By walking in the path that many others have trod, you can move through doubt into a deeper, fuller faith—a faith that doesn't run from questions and the hard work of honest wrestling but instead embraces the mysteries of belief. "This book is for those of us who have experienced a gut check, or two, when it comes to some of the intersections between our lives and our faith. It's for those of us who no longer want to add unnecessary explanations to our beliefs just because we can't fully see what God is doing in our lives." —Bob Goff, New York Times bestselling author of Everybody, Always "This book is one of those books that I will be buying to give to multiple friends." —Jefferson Bethke, New York Times bestselling author of Jesus >

Religion “ This book will help you surrender and trust the areas of your life that are meant to exude God-designed mystery, while also holding your hand as you search for substance and truth. ”

—Audrey Roloff, coauthor of *A Love Letter Life*, founder of *Always More*, and cofounder of *Beating50Percent* “ Doubt is such a pertinent issue in this cultural moment. Dominic walks us through the issues of doubt with which we wrestle but he does so in pastoral practicality. One feels as though you are seated in his living room sipping coffee. Dominic is the type of soul who understands the questions of the heart. He never shames. He ’ s always transparent. He gives substantive hope. ”

“Tomalin ’ s *The Young H.G. Wells* is hard to beat, being friendly, astute and a pleasure to read. ” —Michael Dirda, *Washington Post* “ Claire Tomalin ’ s short, engaging biography *The Young H.G. Wells* is a welcome addition to the conversation. . . Her book makes a strong case for Wells ’ s enduring importance. ” —Heller McAlpin, *The Wall Street Journal* From acclaimed literary biographer Claire Tomalin, a complex and fascinating exploration of the early life of the influential writer and public figure H. G. Wells How did the first forty years of H. G. Wells's life shape the father of science

fiction? From his impoverished childhood in a working-class English family and determination to educate himself at any cost to his complicated marriages, love affair with socialism, and the serious ill health that dominated his twenties and thirties, H. G. Wells's extraordinary early life would set him on a path to become one of the world's most influential writers. The sudden success of *The Time Machine* and *The War of the Worlds* transformed his life and catapulted him to international fame; he became the writer who most inspired Orwell and countless others and predicted men walking on the moon seventy years before it happened. In this remarkable, empathetic biography, Claire Tomalin paints a fascinating portrait of a man like no other, driven by curiosity and desiring reform, a socialist and a futurist whose new and imaginative worlds continue to inspire today.
