This unique anthology is the first to provide a multicultural perspective on witchcraft from the 15th to 18th century. Featuring primary documents as well as scholarly interpretations, *Witches of the Atlantic World* builds upon information regarding both Christian and non-Christian beliefs about possession and the demonic. Elaine G. Breslaw draws on Native American, African, South American, and African-American sources, as well as the European and New England heritage, to illuminate the ways in which witchcraft in early America was an attempt to understand and control evil and misfortune in the New World. Organized into sections on folklore and magic, diabolical possession, Christian perspectives, and the question of gender, the volume includes

selections by Cotton Mather, Matthew Hopkins, and Samuel Willard, among others; Salem trial testimonies; and commentary by a host of distinguished scholars. Together the materials demonstrate how the Protestant and Catholic traditions shaped American concepts, and how multicultural aspects played a key role in the Salem experience. *Witches of the Atlantic World* sheds new light on one of the most perplexing aspects of American history and provides important background for the continued scholarly and popular interest in witches and witchcraft today.

Devilish Indians and Puritan Fantasies
Jossey-Bass

This text, based on Louise M. Rosenblatt's transactional model of literature, focuses on the application of transactional reader-response theory in the classroom. It grows from frequent requests from secondary school and college teachers for teaching suggestions on how to put theory into practice. This is not a "What should I do on Monday?" cookbook, but an expression of the practice of theory in college and secondary school classrooms. The chapters portray a spectrum of strategies--including biopoems, expressive and imaginative writing, journal writing,

readers' theater, role playing, and unsent letters--using as examples individual works from several genres. Recognizing that teachers who may have been trained in other theories and methodologies may be hesitant about their quite different role and expectations in the reader-centered classroom, the authors provide stepping stones to develop readiness and confidence, suggestions, and insights to ease the transition to the transactional model of teaching and learning.

Pedagogical features: * An explanatory introduction to each section defines its orientation and describes the content and direction of the chapters it contains. * Invitations elicit engagement of readers with concepts, attitudes, or strategies presented in the chapters; they invite readers, as individuals or members of a small group, to consider ideas or to practice a strategy, among other activities, in order to enhance understandings. * A glossary defines key concepts and strategies discussed in the text. * A bibliography provides an extensive list of resources--books and journal articles--both theoretical and applied. New in the second edition: * Six new chapters--three deal with the roles of film-as-literature in the English classroom, and three with enhancing multicultural understandings. * Updates and revisions to several chapters that appeared in the first edition. * Invitations, new in this edition, have

been added to focus and expand readers' thinking.

Negotiating Personal and Professional Spaces Routledge
In this book, Janet Alsup reports and theorizes a multi-layered study of teacher identity development. The study, which followed six pre-service English education students, was designed to investigate her hypothesis that forming (or failing to form) a professional identity is central in the process of becoming an effective teacher. This work addresses the intersection of various types of discourse within the process of professional identity development, emphasizes that the intersection of the personal and professional in teacher identity formation is more complex than is acknowledged in typical methods classes, and accents the need for teacher educators to take steps to facilitate such integration. Specific suggestions for methods courses are presented that teacher educators can use as is or adapt to their own contexts. Teacher Identity Discourses: Negotiating Personal and Professional Spaces speaks eloquently to faculty, researchers, and graduate students across the field of teacher education.

Folk Literature and Children Duke

University Press

Secondary School Reading presents carefully thought out, practical strategies for promoting the development of reading skills at the post-elementary level. Practical applications are presented through their relationship to the theoretical conception of the total reading-learning process as they relate to the learner's needs. Reading instruction in the secondary school is essentially different than elementary instruction in the school. The older young people have different needs and interests and utilize different cognitive strategies. This volume presents strategies for older learners which reflects a thorough knowledge of both reading and teaching, as well as many years of experience in teaching this level. Secondary School Reading is a good blend of theoretical constructs and practical application. Its examples offer the teacher many ideas for learning activities. Its appendices direct the reader to many sources of information and teaching materials.
