Cariad Romances Developed from oral storytelling tradition from the Middle Ages, short story was developed and diversified so that it is now difficult to characterize it. It cannot be included into a specific genre and substantially differ by country and historical period. Short story uses specific techniques to emphasize a singular effect or mood.

There are many funny definitions for short stories: "strong essences in small bottles", "to say much in a few words", "a way of synthesized thinking", "a quick way, appropriate to this century, to convey ideas", "intelligence on small spaces", etc. It is a very suitable genre for the youth of today, with concise and powerful message. An escape from the real world in a totally different universe for some, an opportunity to relax or a means of procrastination for others. Short stories readers have more powerful, concentrated and intense ideas and emotions. A deep and relaxing art, very appropriate for our time. I brought together in this anthology some of the most beautiful short stories of the classical French literature. The first edition will be continued over many years to come, with other stories at least as beautiful, written by the most famous French authors.

Episode 2: *The Darkness Within*
In the year 2150, the human race found itself on the brink of extinction. Earth was overcrowded and resources depleted. Pollution was out of control. Then the alien race, the Otruk, arrived and brought radical new technologies with them. The orbiting space stations were built with space elevators tethered to the ground with massive woven fibers of carbon nanotubes. Humans left the surface of the Earth to live in the space stations with the promise

that they would return after the Otruk's cleaning technology rejuvenated the surface. The Otruk broke their promise, though, and refused to let humans back to the surface. In 2350, the human race launched their war to reclaim their home. The Otruk have launched a surprise attack against Foothold, the fortress city surrounding the tether point of the space elevator. Trip and his squad must now make an emergency descent to the surface to reinforce and defend Foothold from the onslaught of the Otruk, who are intent on driving humanity off the surface. Anxiety runs high in the squad as they prepare to enter battle. Little does Trip know that the true test arrives in the aftermath of the battle where he must come to terms with the consequences of the destruction he has wrought.

And although her camera was stolen, Maddie knows she has something that could be even more valuable to investigators. FBI agent Brian Beckman has spent months investigating a vicious criminal known as the Doctor, only to have a key witness abducted on his watch. Worse, he’s falling for

the woman who may be the Doctor's next target. Maddie's aloof facade hides a world of hurt that he wants to heal, no matter how much she keeps him at bay. But first he has to protect her from the danger that's just out of focus, drawing close enough to shoot...and kill.

So if God loves me so much more than any person ever could, shouldn't I be able to see it? hear it? feel it? EVERYWHERE? If this is true, why are there so many people that don't?
