feel — forever! Egoscue shows women how to take back their bodies by recovering and restoring a precious health asset — full, free, flexible motion — that he believes has been drastically reduced by our modern lifestyle. As Egoscue explains, motion not only develops a woman's body but also maintains and rejuvenates it. Yet as her motion-deprived muscles disengage and weaken, it is common for a woman's body to lose alignment, leading to repetitive stress injuries, persistent pain, and general bad health. Even the simplest activities — how she sits, stands, walks, works, lifts, and sleeps — can trigger problems. Focusing on proper alignment, posture, and muscle engagement, Egoscue provides simple but powerful techniques to restore flexibility and function while at the same time boosting energy, revving up the immune system, even raising the body's metabolic rate. The remarkable "E-cises" included within have also been linked to improved ability to fight disease, cope with aging, and recover from accidents and injuries. The "miracle" cure Egoscue offers is, simply, correct motion. Organized by the seasons of a woman's life, Pain Free for Women pays particular attention to age-specific concerns such as puberty, childbirth, and menopause, as well as special issues such as arthritis, PMS, and depression. At the same time, Egoscue shows how women can build a framework of healthy movement that will prevent illness and maintain pain-free good health throughout the journey of life. According to Egoscue, reversing the effects of poor musculoskeletal fitness provides astonishing benefits, including:

- Better balance, posture, and breathing, as well as increased resiliency
- Effective and safe weight management
- Healthy bone density and visual acuity
- Heightened sex drive
- Delayed symptoms of aging
- Peace of mind and general

tranquility Extensively illustrated to demonstrate proper placement, posture, and movement, Pain Free for Women offers women of every age the possibility of feeling better than ever before.

And when we do move, the movement violates the design of the body with every step we take. #2 The Egoscue Method is a way to provide each person with sufficient motion, which is no longer built into the daily pattern of our lives the way it was just a few decades ago. We will have to work at it from now on. #3 The human body is a complex machine, but its royal motto is Every man a king. We don ' t need technology to understand our own bodies and the biological imperatives that drive them. By tapping our own expertise, we can unlock the maximum potential that lies within each of us. #4 The human body is so complex that it allows for its function to be very simple. We don ' t have the brain power to consciously oversee incredibly intricate processes like digestion and respiration.
