Engaging Musical Practices: A Sourcebook for Middle School General Music presents numerous ways to engage adolescents in active music making that is relevant to their lives so that they may be more apt to continue their involvement with music as a lifetime endeavor.

*Engaging Musical Practices* R&L Education

A modern classic that no child should miss. Since it was first published in 1939, Mike

Mulligan and His Steam Shovel has delighted generations of children. Mike and his trusty steam shovel, Mary Anne, dig deep canals for boats to travel through, cut mountain passes for trains, and hollow out cellars for city skyscrapers -- the very symbol of industrial America. But with progress come new machines, and soon the inseparable duo are out of work. Mike believes that Mary Anne can dig as much in a day as one hundred men can dig in a week, and the two have one last chance to prove it and save Mary Anne from the scrap heap. What happens next in the small town of Popperville is a testament to their friendship, and to old-fashioned hard work and ingenuity.

The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data, such as styles, artists, lyrics, and reviews. Bringing together an interdisciplinary array of top researchers, *Music Data Mining* presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing. The book first covers music data mining tasks and algorithms and audio feature extraction, providing a framework for subsequent chapters. With a focus on data classification, it then describes a computational approach inspired by human auditory perception and examines instrument recognition, the effects of music on moods and emotions, and the connections between power laws and music aesthetics. Given the importance of social aspects in understanding music, the text addresses the use of the Web and peer-to-peer networks for both music data mining and evaluating music mining tasks and algorithms. It also discusses indexing with tags and explains how data can be collected using online human computation games. The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining. The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information. An

excellent introduction to the field, this volume presents state-of-the-art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections.

*The American Marine Engineer* R & L Education

This beautifully illustrated volume features work by leading writers and experts on carnival from around the world, and includes two stunning photo essays by acclaimed photographers Pablo Delano and Jeffrey Chock. Editor Milla Cozart Riggio presents a body of work that takes the reader on a fascinating journey exploring the various aspects of carnival - its traditions, its history, its music, its politics - and prefaces each section with an illuminating essay. Traditional carnival theory, based mainly on the work of Mikhail Bakhtin and Victor Turner, has long defined carnival as inversive or subversive. The essays in this groundbreaking anthology collectively reverse that trend, offering a re-definition of 'carnival' that focuses not on the hierarchy it temporarily displaces or negates, but a one that is rooted in the actual festival event. Carnival details its new theory in terms of a carnival that is at once representative and distinctive: The Carnival of Trinidad - the most copied yet least studied major carnival in the world.

Ice and Refrigeration Penguin

POST is a look at how post-hardcore/emo music developed since its unintentional inception in the mid-1980s. With each chapter broken up by influential band or label, it focuses on a broad style of independent music that developed because of the Do-It-Yourself (DIY) ethic. Focusing on bands like Fugazi, Jawbox, Jawbreaker, Sunny Day Real Estate, Braid, the Promise Ring, Hot Water Music, the Get Up Kids, At the Drive-In, and Jimmy Eat World, as well as labels like Dischord, Jade Tree, and Vagrant, these bands and labels came from the ideas of DIY and sustained them. In turn, they inspired plenty that came after them. Looking at the surroundings and circumstances from where they came, this a look at the

---

bonds that formed and the music that came out. ". . . a gripping, Our Band Could Be Your Life-style narrative," - Aaron Burgess, writer for Alternative Press and Revolver.

When Giants Walked the Earth Macmillan

This blistering novel—from the bestselling, Pulitzer Prize – winning author of *The Road*—returns to the Texas-Mexico border, setting of the famed Border Trilogy. The time is our own, when rustlers have given way to drug-runners and small towns have become free-fire zones. One day, a good old boy named Llewellyn Moss finds a pickup truck surrounded by a bodyguard of dead men. A load of heroin and two million dollars in cash are still in the back. When Moss takes the money, he sets off a chain reaction of catastrophic violence that not even the law – in the person of aging, disillusioned Sheriff Bell – can contain. As Moss tries to evade his pursuers – in particular a mysterious mastermind who flips coins for human lives – McCarthy simultaneously strips down the American crime novel and broadens its concerns to encompass themes as ancient as the Bible and as bloodily contemporary as this morning ’ s headlines. *No Country for Old Men* is a triumph.

Accompanied by a CD with music from Death Cab for Cutie and other bands, this groundbreaking volume, using candid photos, traces the rise of indie rock, capturing the bands and musicians that started and continue this radical revolution. Original. 12,500 first printing.

Documents of the Assembly of the State of New York Little, Brown  
Bernard Edwards, the formidable naval historian, has researched the fate of Convoys PQ13 and PQ17 bound from Iceland to Northern Russia as well as the westbound Convoy QP13. Attacked relentlessly by aircraft and

U-boats, the former lost a total of thirty ships while QP13 ran into a British minefield off Iceland, losing seven vessels. *The Road to Russia* is an important addition to the bibliography of this bitterly fought campaign.

What She Go Do Vintage

*Austral Jazz: The Localization of a Global Music Form in Sydney* proposes a new theoretical framework for understanding local jazz communities as they develop outside the United States, demonstrating such processes in action by applying the framework to a significant period of the history of jazz in Sydney, Australia after 1973. This volume introduces the notion of ‘ Austral Jazz, ’ coined in order to reset the focus on supranational conceptions of jazz expressions in the southwestern Pacific. It makes the case for Austral Jazz chronologically across six chapters that discuss, interpret and critique major events and seminal recordings, tracing the development of the Austral shift from a pre-Austral period prior to 1973. *Austral Jazz* presents a fresh approach to understanding the development of jazz communities, and while its focus is on the Sydney scene after 1973, the ‘ Austral ’ theory can be applied to

---

creative communities globally. A creative shift took place in Sydney in the early 1970s, which led to the flourishing of a new kind of jazz-based expression, one that reflected Australia's increasingly globalized and multicultural outlook. This study is timely, and it builds on the work of local jazz researchers. Historiographical understandings of global developments in jazz can be understood within a framework of four overarching narratives: The 'birth and belonging' narrative; the 'spread and adaptation' narrative; the 'pluralization by localization' narrative; and the 'self-fashioning of the already local' narrative.

Mike Watt CRC Press

In the 1990s, expressive culture in the Caribbean was becoming noticeably more feminine. At the annual Carnival of Trinidad and Tobago, thousands of female masqueraders dominated the street festival on Carnival Monday and Tuesday. Women had become significant contributors to the performance of calypso and soca, as well as the musical development of the steel pan art form. Drawing upon ethnographic fieldwork conducted by the author in Trinidad and Tobago, *What She Go Do* demonstrates how the increased access and agency of women through folk and popular musical expressions has improved intergender relations and representation of gender in this nation. This is the first study to integrate all of the popular music expressions associated with Carnival—calypso, soca, and steelband music—within a single volume. The book includes interviews with popular musicians and detailed observation of musical performances, rehearsals, and recording sessions, as well as analysis of reception and use of popular music through informal exchanges with audiences. The popular music of the Caribbean

contains elaborate forms of social commentary that allows singers to address various sociopolitical problems, including those that directly affect the lives of women. In general, the cultural environment of Trinidad and Tobago has made women more visible and audible than any previous time in its history. This book examines how these circumstances came to be and what it means for the future development of music in the region.

The Engine Room of Government Routledge

This encyclopedia of heavy rock and metal music is taken from the database of the Encyclopedia of Popular Music. Containing over 1400 entries, this book provides reviews of all the big names in the history of the genre.

Engaging Musical Practices

The Conquest of Labor offers the first biography of Daniel Pratt (1799-1873), a New Hampshire native who became one of the South's most important industrialists. After moving to Alabama in 1833, Pratt started a cotton gin factory near Montgomery that by the eve of the Civil War had become the largest in the world. Pratt became a household name in cotton-growing states, and Prattville- the site of his operations- one of the antebellum South's most celebrated manufacturing towns. Based on a rich cache of personal and business records, Curtis J. Evans's study of Daniel Pratt and his "Yankee" town in the heart of the Deep South challenges the conventional portrayal of the South as a premodern region hostile to industrialization and shows that, contrary to current popular thought, the South was not so markedly different from the North.
