Bernard Edwards, the formidable naval historian, has researched the fate of Convoys PQ13 and PQ17 bound from Iceland to Northern Russia as well as the westbound Convoy QP13. Attacked relentlessly by aircraft and U-boats, the former lost a total of thirty ships while QP13 ran into a British minefield off Iceland, losing seven vessels. The Road to Russia is an important addition to the bibliography of this bitterly fought campaign.

The definitive chronicle of underground music in the 1980s tells the stories of Black Flag, Sonic Youth, The Replacements, and other seminal bands whose DIY revolution changed American music forever. Our Band Could Be Your Life is the never-before-told story of the musical revolution that happened right under the nose of the Reagan Eighties -- when a small but sprawling network of bands, labels, fanzines, radio stations, and other subversives re-energized American rock with punk's do-it-yourself credo and created music that was deeply personal, often brilliant, always challenging, and immensely influential. This sweeping chronicle of music, politics, drugs, fear, loathing, and faith is an indie rock classic in its own right. The bands profiled include: Sonic Youth Black Flag The Replacements Minutemen Husker Du Minor Threat Mission of Burma Butthole Surfers Big Black Fugazi Mudhoney Beat Happening Dinosaur Jr.

This beautifully illustrated volume features work by leading writers and experts on carnival from around the world, and includes two stunning photo essays by acclaimed photographers Pablo Delano and Jeffrey Chock. Editor Milla Cozart Riggio presents a body of work that takes the reader on a fascinating journey exploring the various aspects of carnival - its traditions, its history, its music, its politics - and prefaces each section with an illuminating essay. Traditional carnival theory, based mainly on the work of Mikhail Bakhtin and Victor Turner, has long defined carnival as inversive or subversive. The essays in this groundbreaking anthology collectively reverse that trend, offering a re-definition of 'carnival' that focuses not on the hierarchy it temporarily displaces or negates, but a one that is rooted in the actual festival event. Carnival details its new theory in terms of a carnival that is at once representative and distinctive: The Carnival of Trinidad - the most copied yet least studied major carnival in the world.

A modern classic that no child should miss. Since it was first published in 1939, Mike Mulligan and His Steam Shovel has delighted generations of children. Mike and his trusty steam shovel, Mary Anne, dig deep canals for boats to travel through, cut mountain passes for trains, and hollow out cellars for city skyscrapers -- the very symbol of industrial America. But with progress come new machines, and soon the inseparable duo are out of work. Mike believes that Mary Anne can dig as much in a day as one hundred men can dig in a week, and the two have one last chance to prove it and save Mary Anne from the scrap heap. What happens next in the small town of Popperville is a testament to their friendship, and to old-fashioned hard work and ingenuity.

This Hugo Award finalist, "justifiably regarded as a classic" (SFReviews.net), is the tale of an epic space voyage where time dilation goes horribly wrong. Aboard the spacecraft

Leonora Christine, fifty crewmembers, half men and half women, have embarked on a journey of discovery like no other to a planet thirty light-years away. Since their ship is not capable of traveling faster than light, the crew will be subject to the effects of time dilation and relativity. They will age five years on board the ship before reaching their destination, but thirty-three years will pass on Earth. Experienced scientists and researchers, they have come to terms with the time conditions of their space travel. Until . . . the Leonora Christine passes through an uncharted nebula, which damages the engine, making it impossible to decelerate the ship on the second half of their trip. To survive, the crewmembers have no choice but to bypass their destination and continue to accelerate toward the speed of light. But how will they keep hope alive and maintain order as they hurtle deeper into space with time passing more and more rapidly, and their ultimate fate unknown? With its combination of mind-blowing hard science and compelling human drama, Tau Zero is "the ultimate hard science novel" (Mike Resnick).

POST is a look at how post-hardcore/emo music developed since its unintentional inception in the mid-1980s. With each chapter broken up by influential band or label, it focuses on a broad style of independent music that developed because of the Do-It-Yourself (DIY) ethic. Focusing on bands like Fugazi, Jawbox, Jawbreaker, Sunny Day Real Estate, Braid, the Promise Ring, Hot Water Music, the Get Up Kids, At the Drive-In, and Jimmy Eat World, as well as labels like Dischord, Jade Tree, and Vagrant, these bands and labels came from the ideas of DIY and sustained them. In turn, they inspired plenty that came after them. Looking at the surroundings and circumstances from where they came, this a look at the bonds that formed and the music that came out. ". . . a gripping, Our Band Could Be Your Life-style narrative," - Aaron Burgess, writer for Alternative Press and Revolver.

Austral Jazz: The Localization of a Global Music Form in Sydney proposes a new theoretical framework for understanding local jazz communities as they develop outside the United States, demonstrating such processes in action by applying the framework to a significant period of the history of jazz in Sydney, Australia after 1973. This volume introduces the notion of 'Austral Jazz,' coined in order to reset the focus on supranational conceptions of jazz expressions in the southwestern Pacific. It makes the case for Austral Jazz chronologically across six chapters that discuss, interpret and critique major events and seminal recordings, tracing the development of the Austral shift from a pre-Austral period prior to 1973. Austral Jazz presents a fresh approach to understanding the development of jazz communities, and while its focus is on the Sydney scene after 1973, the 'Austral' theory can be applied to creative communities globally. A creative shift took place in Sydney in the early 1970s, which led to the flourishing of a new kind of jazz-based expression, one that reflected Australia's increasingly globalized and multicultural outlook. This study is timely, and it builds on the work of local jazz researchers. Historiographical understandings of global developments in jazz can be understood within a framework of four overarching narratives: The 'birth and belonging' narrative; the 'spread and adaptation' narrative; the 'pluralization by localization' narrative; and the 'self-fashioning of the already local' narrative.

The first significant fresh reporting on the legendary band in twenty years, built on interviews with all surviving band members and revealing a never-before-seen side of the genius and debauchery that defined their heyday. Veteran rock journalist Mick Wall unflinchingly tells the story of the band that pushed the envelope on both creativity and excess, even by rock 'n' roll standards. Led Zeppelin was the last great band of the 1960s and the first great band of the 1970s—and When Giants Walked the Earth is the full, enthralling story of Zep from the inside, written by a former confidante of both Jimmy Page and Robert Plant. Rich and revealing, it bores into not only the disaster, addiction and death that haunted the band but also into the real relationship between Page and Plant, including how it was influenced by Page's interest in the occult. Comprehensive and yet intimately detailed, When Giants Walked the Earth literally gets into the principals' heads to bring to life both an unforgettable band and an unrepeatable slice of rock history.

In the 1990s, expressive culture in the Caribbean was becoming noticeably more feminine. At the annual Carnival of Trinidad and Tobago, thousands of female masqueraders dominated the street festival on Carnival Monday and Tuesday. Women had become significant contributors to the performance of calypso and soca, as well as the musical development of the steel pan art form. Drawing upon ethnographic fieldwork conducted by the author in Trinidad and Tobago, What She Go Do demonstrates how the increased access and agency of women through folk and popular musical expressions has improved intergender relations and representation of gender in this nation. This is the first study to integrate all of the popular music expressions associated with Carnival—calypso, soca, and steelband music—within a single volume. The book includes interviews with popular musicians and detailed observation of musical performances, rehearsals, and recording sessions, as well as analysis of reception and use of popular music through informal exchanges with audiences. The popular music of the Caribbean contains elaborate forms of social commentary that allows singers to address various sociopolitical problems, including those that directly affect the lives of women. In general, the cultural environment of Trinidad and Tobago has made women more visible and audible than any previous time in its history. This book examines how these circumstances came to be and what it means for the future development of music in the region.

The Conquest of Labor offers the first biography of Daniel Pratt (1799-1873), a New Hampshire native who became one of the South's most important industrialists. After moving to Alabama in 1833, Pratt started a cotton gin factory near Montgomery that by the eve of the Civil War had become the largest in the world. Pratt became a household name in cotton-growing states, and Prattville-the site of his operations-one of the antebellum South's most celebrated manufacturing towns. Based on a rich cache of personal and business records, Curtis J. Evans's study of Daniel Pratt and his "Yankee" town in the heart of the Deep South challenges the conventional portrayal of the South as a premodern region hostile to industrialization and shows that, contrary to current popular thought, the South was not so markedly different from the North.
