Austral Jazz: The Localization of a Global Music Form in Sydney proposes a new theoretical framework for understanding local jazz communities as they develop outside the United States, demonstrating such processes in action by applying the framework to a significant period of the history of jazz in Sydney, Australia after 1973. This volume introduces the notion of ‘Austral Jazz,’ coined in order to reset the focus on supranational conceptions of jazz expressions in the southwestern Pacific. It makes the case for Austral Jazz chronologically across six chapters that discuss, interpret and critique major events and seminal recordings, tracing the development of the Austral shift from a pre-Austral period

prior to 1973. *Austral Jazz* presents a fresh approach to understanding the development of jazz communities, and while its focus is on the Sydney scene after 1973, the ‘Austral’ theory can be applied to creative communities globally. A creative shift took place in Sydney in the early 1970s, which led to the flourishing of a new kind of jazz-based expression, one that reflected Australia’s increasingly globalized and multicultural outlook. This study is timely, and it builds on the work of local jazz researchers. Historiographical understandings of global developments in jazz can be understood within a framework of four overarching narratives: The ‘birth and belonging’ narrative; the ‘spread and adaptation’ narrative; the ‘pluralization by localization’ narrative; and the ‘self-fashioning of the already local’ narrative.

The first significant fresh reporting on the legendary band in twenty years, built on interviews with all surviving band members and revealing a never-before-seen side of the genius and debauchery that defined their heyday. Veteran rock journalist Mick Wall unflinchingly tells the story of the band that pushed the envelope on both creativity and excess, even by rock ‘n’ roll standards. Led Zeppelin was the

last great band of the 1960s and the first great band of the 1970s—and *When Giants Walked the Earth* is the full, enthralling story of Zep from the inside, written by a former confidante of both Jimmy Page and Robert Plant. Rich and revealing, it bores into not only the disaster, addiction and death that haunted the band but also into the real relationship between Page and Plant, including how it was influenced by Page's interest in the occult. Comprehensive and yet intimately detailed, *When Giants Walked the Earth* literally gets into the principals' heads to bring to life both an unforgettable band and an unrepeatable slice of rock history.

The Conquest of Labor offers the first biography of Daniel Pratt (1799-1873), a New Hampshire native who became one of the South's most important industrialists. After moving to Alabama in 1833, Pratt started a cotton gin factory near Montgomery that by the eve of the Civil War had become the largest in the world. Pratt became a household name in cotton-growing states, and Prattville—the site of his operations—one of the antebellum South's most celebrated manufacturing towns. Based on a rich cache of personal and business records, Curtis J. Evans's study of Daniel Pratt and his "Yankee" town in the heart of the Deep South challenges the conventional portrayal of the South as a premodern region hostile to industrialization and shows that, contrary to current popular thought, the South was not so markedly different from the North.

"In April 2010, Santa Monica's Track 16 Gallery hosted the first photographic exhibit by Mike Watt. The show featured 35 photos, which make up the first 35 images in this book.

Interspersed with these images are excerpts from Watt's extensive [sic] tour diaries. It is that juxtaposition of notes from the road and photos from his home base which led to the creation of Mike Watt: on and off bass."--Introduction.

POST is a look at how post-hardcore/emo music developed since its unintentional inception in the mid-1980s. With each chapter broken up by influential band or label, it focuses on a broad style of independent music that developed because of the Do-It-Yourself (DIY) ethic. Focusing on bands like Fugazi, Jawbox, Jawbreaker, Sunny Day Real Estate, Braid, the Promise Ring, Hot Water Music, the Get Up Kids, At the Drive-In, and Jimmy Eat World, as well as labels like Dischord, Jade Tree, and Vagrant, these bands and labels came from the ideas of DIY and sustained them. In turn, they inspired plenty that came after them. Looking at the surroundings and circumstances from where they came, this a look at the bonds that formed and the music that

came out. ". . . a gripping, Our Band Could Be Your Life-style narrative," - Aaron Burgess, writer for Alternative Press and Revolver.

This Hugo Award finalist, "justifiably regarded as a classic" (SFReviews.net), is the tale of an epic space voyage where time dilation goes horribly wrong. Aboard the spacecraft Leonora Christine, fifty crewmembers, half men and half women, have embarked on a journey of discovery like no other to a planet thirty light-years away. Since their ship is not capable of traveling faster than light, the crew will be subject to the effects of time dilation and relativity. They will age five years on board the ship before reaching their destination, but thirty-three years will pass on Earth.

Experienced scientists and researchers, they have come to terms with the time conditions of their space travel. Until . . . the Leonora Christine passes through an uncharted nebula, which damages the engine, making it impossible to

decelerate the ship on the second half of their trip. To survive, the crewmembers have no choice but to bypass their destination and continue to accelerate toward the speed of light. But how will they keep hope alive and maintain order as they hurtle deeper into space with time passing more and more rapidly, and their ultimate fate unknown? With its combination of mind-blowing hard science and compelling human drama, Tau Zero is "the ultimate hard science novel" (Mike Resnick).

The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data, such as styles, artists, lyrics, and reviews. Bringing together an interdisciplinary array of top researchers, *Music Data Mining* presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing. The book first covers music data mining tasks and algorithms and audio feature extraction, providing a framework for subsequent chapters. With a focus on data classification, it then describes a computational approach inspired by human auditory perception and examines instrument recognition, the effects of music on moods and emotions, and the connections between power laws and music aesthetics. Given the importance of social aspects in understanding music, the text addresses the use of the Web and peer-to-peer networks for both music data mining and evaluating music mining tasks and algorithms. It also discusses indexing with tags and explains how data can be

collected using online human computation games. The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining. The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information. An excellent introduction to the field, this volume presents state-of-the-art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections.

The Virgin Encyclopedia of Heavy Rock Gollancz

In the 1990s, expressive culture in the Caribbean was becoming noticeably more feminine. At the annual Carnival of Trinidad and Tobago, thousands of female masqueraders dominated the street festival on Carnival Monday and Tuesday. Women had become significant contributors to the performance of calypso and soca, as well as the musical development of the steel pan art form. Drawing upon ethnographic fieldwork conducted by the author in Trinidad and Tobago, *What She Go Do* demonstrates how the increased access and agency of women through folk and popular musical expressions has

improved intergender relations and representation of gender in this nation. This is the first study to integrate all of the popular music expressions associated with Carnival—calypso, soca, and steelband music—within a single volume. The book includes interviews with popular musicians and detailed observation of musical performances, rehearsals, and recording sessions, as well as analysis of reception and use of popular music through informal exchanges with audiences. The popular music of the Caribbean contains elaborate forms of social commentary that allows singers to address various sociopolitical problems, including those that directly affect the lives of women. In general, the cultural environment of Trinidad and Tobago has made women more visible and audible than any previous time in its history. This book examines how these circumstances came to be and what it means for the future development of music in the region.

Houghton Mifflin Harcourt Bernard Edwards, the formidable naval historian, has researched the fate of Convoys PQ13 and PQ17 bound from Iceland to Northern Russia as well as the westbound Convoy QP13. Attacked relentlessly by aircraft and U-boats, the former lost a total of thirty ships while QP13 ran into a British minefield off Iceland, losing seven vessels. The Road to Russia is an important addition to the bibliography of this bitterly fought campaign.

The definitive chronicle of underground music in the 1980s tells the stories of Black Flag, Sonic Youth, The Replacements, and other

seminal bands whose DIY revolution changed American music forever. Our Band Could Be Your Life is the never-before-told story of the musical revolution that happened right under the nose of the Reagan Eighties -- when a small but sprawling network of bands, labels, fanzines, radio stations, and other subversives re-energized American rock with punk's do-it-yourself credo and created music that was deeply personal, often brilliant, always challenging, and immensely influential. This sweeping chronicle of music, politics, drugs, fear, loathing, and faith is an indie rock classic in its own right. The bands profiled include: Sonic Youth Black Flag The Replacements Minutemen Husker Du Minor Threat Mission of Burma Butthole Surfers Big Black Fugazi Mudhoney Beat Happening Dinosaur Jr.
