Why do we work so hard at our jobs, day after day? Why is a job well done important to us? We know there is more to a career than money and prestige, but what exactly do we mean by

"fulfillment"?

These are old but important

questions. They belong with some newly discovered

ones: Why are people in business more religious than

the population as a world's Christians, whole? What do people of business know, and what do they do, that anchors their faith? In this ground-breaking and inspiring book, Michael Novak ties together these crucial questions by explaining the meaning of work as a vocation. Work should be more than just a job -- it should be a calling. This book explains an important part of our lives in a new way, and readers will instantly recognize themselves in its pages. A larger proportion than ever before of the

peoples of faith are spending their working lives in business. Business is a profession worthy of a person's highest ideals and aspirations, fraught with moral possibilities both of great good and of great evil. Novak takes on agonizing problems, such as downsizing, the tradeoffs that must sometimes be faced between profits and human rights, and the pitfalls of philanthropy. He also examines the daily questions of how an honest day's work contributes to

the good of many people, both close at hand and far away. Our work connects us with one another. It also makes possible the universal advance out of poverty, and it is an essential prerequisite of democracy and the institutions of civil society. This book is a spiritual feast, for everyone who wants to examine how to make a life through making a living.

Know Thyself: The Value and Limits of Self-Knowledge takes the reader on tour of the nature, value, and limits of self-knowledge. Mitchell S. Green calls on classical sources like Plato and Descartes, 20th-century thinkers like Freud, recent developments in neuroscience and experimental psychology, and even Buddhist philosophy to explore topics at the heart of who we are. The result is an unvarnished look at both

the achievements and drawbacks of the many attempts to better know one's own self. Key topics in this volume include: Knowledge – what it means to know, the link between wisdom and knowledge, and the value of living an "examined life" Personal identity – questions of dualism (the idea that our mind is not only our brain), bodily continuity, and personhood The unconscious — including the kind posited by psychoanalysis as well as the form proposed by recent research on the so-called adaptive unconscious Free will – if we have it, and the recent arguments from neuroscience challenging it Self-misleading – the ways we willfully deceive ourselves, and how this relates to empathy, peer disagreement, implicit bias, and intellectual humility Experimental psychology – considerations on the automaticity of emotion and other cognitive processes, and how they shape us This book is designed to be used in conjunction with the free 'Know Thyself' MOOC (massive open online course) created through collaboration of the

University of Connecticut's Project on Humility and Conviction in Public Life, and the University of Edinburgh's Eidyn research centre, and hosted on the Coursera platform (<https://www.coursera.org/learn/know-thyself>). The book is also suitable as a text for interdisciplinary courses in the philosophy of mind or self-knowledge, and is highly recommended for anyone looking for a short overview of this fascinating topic.

Examined Life: 'The Examined Life is a fascinating collection of quiet stories about very real human predicaments: the listening cure at its best' – Patrick McGrath 'I couldn't put this down—I read about other people, but learned about myself at the same time. Real stories can be so much more fascinating than fictional ones, especially with Stephen Grosz. No preaching, no clichés—just wisdom.' – Victoria Hislop 'A beautifully judged, wonderfully readable book with a clear and kind voice. There is a rare integrity in the writing: no showing off, just honest attention to each trusted relationship. I read the whole thing in one sitting, cover to cover' – Ruth Padel

In this book, the follow-up to the best-selling *Philosophy for Kids*, Dr. David White delves deeper into the philosophical questions kids (and adults) care about deeply. Through vibrant discussions and debate, the book offers ways teachers can help students grapple with age-old questions about the nature of friendship (Aristotle), time (Augustine), knowledge (Plato), existence of God (Aquinas), perception (Berkeley), freedom and society (Rousseau), and many more. The book is divided into three sections. Part 1

presents primary source readings that will encourage discussion and debate; Part 2 offers easy-to-use activities that focus on the direct application of philosophy to areas such as critical thinking, language, and the arts; and Part 3 offers a unique perspective just for teachers—a philosophical look at how teachers can become more reflective philosophers themselves. This is an excellent teachers' handbook for using advanced philosophy in the classroom. Grades 7-12

A Study in the Heredity of Feeble-mindedness *The Examined Life: How We Lose and Find Ourselves*

"Starting in 2005, John Griswold began publishing his nonfiction essays in *Inside Higher Ed*, *McSweeney's Internet Tendency*, *Brevity*, *Ninth Letter*, and *Adjunct Advocate* under the pen name Oronte Churm. This collection contains heavily revised previously published essays but much more new material covering a wide range of topics riffing on the writing life—from the utility of creative writing to babies, and from race issues in a university town to crocodiles. Griswold's tongue-in-cheek tone

allows him to discuss this breadth of subject matter in an inviting and entertaining way while still addressing prevalent and important issues. Much of this book has to do with the tenuous and uncertain place of university adjuncts and other contingent instructors in the larger higher education ecosphere. Griswold writes, "After more than a dozen years teaching creative writing, literature, and rhetoric at two universities, I fell into what they call the tenure stream at another school. The worries and stresses have changed, but my interests remain: What does it mean to be educated? To think, feel, write? To be whole? The writing in this book was my own attempt to see if I knew anything at all. And of course that's a lifelong journey, its rewards always temporary and therefore comic. Picture Long John Silver at the end of the movie, his dory filled with stolen gold, rowing and sinking; rowing, sinking, and gloating." --

Still Writing W. W. Norton & Company

A New York Times Notable Book for 2011 We all want to know how to live. But before the good life was reduced to ten easy steps or a prescription from the doctor, philosophers offered arresting answers to the most fundamental questions about who we are and what makes for a life worth living. In *Examined Lives*, James Miller returns to this vibrant tradition with short, lively biographies of twelve famous philosophers. Socrates spent his life examining himself and the assumptions of others. His most famous student, Plato, risked his reputation to tutor a tyrant. Diogenes carried a bright lamp in broad daylight and announced he was "looking for a man." Aristotle's alliance with Alexander the Great presaged

Seneca's complex role in the court of the Roman Emperor Nero.

Augustine discovered God within himself. Montaigne and Descartes struggled to explore their deepest convictions in eras of murderous religious warfare. Rousseau aspired to a life of perfect virtue. Kant elaborated a new ideal of autonomy. Emerson successfully preached a gospel of self-reliance for the new American nation. And Nietzsche tried "to compose into one and bring together what is fragment and riddle and dreadful chance in man," before he lapsed into catatonic madness. With a flair for paradox and rich anecdote, *Examined Lives* is a book that confirms the continuing relevance of philosophy today—and explores the most urgent questions about what it means to live a good life.

Shorter Lives, Poorer Health
The New Press

The *Literary Agenda* is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of "the literary" has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognized as a way of thinking or an arena for thought. It is sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized

explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into the meaning and value of literary reading. We live in days, not leaving them or choosing them. What's in a day? With their natural narrative arc they begin and they end and in between we talk about how they are going or wonder "where" they have gone. They each have their small stories, non-stories, ephemeral stories. So every day slips by, most days much like most other days. We eat, we sleep, we go to work; we endure, enjoy, continue. Day after day, day before day, it is the recurring of no particular story in endless, beginningless succession. At the same time, any single day is also a unique date, with its multi-digit identity, its moment-at last, and never again-of here and now, today. And on longer scales, the slow small shifts of ordinary days and their surrounding stories will eventually remake the days that have been and gone as the times that are no more. An ordinary day from decades, let alone centuries ago must now be a "once" long passed away, the old days to be regretted-or to be revived in all the curiosity of their historical difference. *Everyday Stories* makes us think again about the ordinary life we are in, day after day and day by day: always the same, and always slightly changing. Entering into the single day, drawing out the stories that surround us, this book goes into everyday stories of many descriptions, old and new: both in literature and in that story-laden place and time we call real life.

WE DON'T HAVE ALL THE ANSWERS, BUT WE WILL DIRECT YOU TOWARDS A VARIETY OF USEFUL IDEAS THAT ARE GUARANTEED TO STIMULATE, PROVOKE, AND CONSOLE. An Economist Best Book of the Year Everyone accepts the importance of physical health; isn't it just as important to aim for the mental equivalent? Philippa Perry has come to the rescue with *How to Stay Sane* -- a maintenance manual for the mind. Years of working as a psychotherapist showed Philippa Perry what approaches produced positive change in her clients and how best to maintain good mental health. In *How to Stay Sane*, she has taken these principles and applied them to self-help. Using ideas from neuroscience and sound psychological theory, she shows us how to better understand ourselves. Her idea is that if we know how our minds form and develop, we are less at the mercy of unknown unconscious processes. In this way, we can learn to be the master of our feelings and not their slave. This is a smart, pithy, readable book that everyone with even a passing interest in their psychological health will find useful.

The Power of Self-Sacrifice in a Selfish World Houghton Mifflin Harcourt
 The New York Times--bestselling graphic memoir about Alison Bechdel, author of *Fun Home*, becoming the artist her mother wanted to be. Alison Bechdel's *Fun Home* was a pop culture and

literary phenomenon. Now, a second thrilling tale of filial sleuthery, this time about her mother: voracious reader, music lover, passionate amateur actor. Also a woman, unhappily married to a closeted gay man, whose artistic aspirations simmered under the surface of Bechdel's childhood...and who stopped touching or kissing her daughter good night, forever, when she was seven.

Poignantly, hilariously, Bechdel embarks on a quest for answers concerning the mother-daughter gulf. It's a richly layered search that leads readers from the fascinating life and work of the iconic twentieth-century psychoanalyst Donald Winnicott, to one explosively illuminating Dr. Seuss illustration, to Bechdel's own (serially monogamous) adult love life. And, finally, back to Mother—to a truce, fragile and real-time, that will move and astonish all adult children of gifted mothers. A New York Times, USA Today, Time, Slate, and Barnes & Noble Best Book of the Year “As complicated, brainy, inventive and satisfying as the finest prose memoirs.”—New York Times Book Review “A work of the most humane kind of genius, bravely going right to the heart of things: why we are who we are. It's also incredibly funny. And visually stunning. And page-turningly addictive. And heartbreaking.”—Jonathan Safran Foer “Many of us are living out the unlived lives of our mothers. Alison Bechdel has written a graphic novel about this; sort of like a comic book by Virginia Woolf. You won't believe it until you read it—and you must!”—Gloria Steinem
