In response to the overwhelming  
need for information on the female  
mind, Brizendine established the  
first clinic in the country to  
study and treat women's brain  
function. In *The Female Brain*, Dr.

Brizendine distills all her  
findings and the latest information  
from the scientific community in a  
highly accessible book that  
educates women about their unique  
brain/body/behavior.

Men have stronger connections  
between brain areas for motor and  
spatial skills. That means males  
tend to do a better job at tasks  
that need hand-eye coordination  
and understanding where objects  
are in space, such as throwing a  
ball or hammering a nail. On  
average, male brains are about 10%  
larger than female brains.
