It may be worth considering fitting a dimmer switch to any new lighting so you can control the level of light to suit everybody. But a basic way used to determine how much light you need, is to calculate your room size in square metres then multiply by 25 to give the wattage of lighting required for standard bulbs, though if using halogen bulbs you can reduce the multiplication to 19.

For example, if you are lighting a bathroom, then you need a light fitting which is IP4 Rated. You also need to consider how much light you need in a particular space. Larger spaces will obviously need larger fittings to light them, or alternatively use a number of smaller fittings depending on the look you want to achieve.
