*World of Wonders* transcript Verlag  
Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.  
6th Annual Mid-Atlantic People of Color Legal Scholarship Conference Oxford University Press  
In this heartwarming tale inspired by her childhood, superstar chef and TV host Carla Hall shares the story of young Carla, who eats a sugar cookie meant for Santa on the night before Christmas and tries to make things right. Christmas is Carla ' s favorite holiday of the year. She goes to her grandparents ' house and eats grandma ' s special recipe—a perfectly delicious cornbread. She listens to her grandpa Doc ' s marvelous stories about traveling the world. And, best of all, she spends lots of time with her family. But when Carla accidentally takes a bite out of Santa ' s sugar cookie, she thinks she ' s ruined Christmas. How will Santa know to stop at their house if they

don ' t leave him a midnight snack? With her grandmother ' s help, Carla comes up with a plan, but will it be enough to save Christmas?

Wie kommt die Zeit in die Archäologie?  
Menschen erkennen sich vor allem über ihre Dinge (Arte-fakte) und sind so mit sich selbst eine Zeit. Zeitgestaltung von Menschen ist bedingt und Archäologie ihre Geschichte.  
Undine Stabrey zeigt am Verhältnis von Mobilität und Erkenntnis, wie Vergangenheit als Geschichte entstehen und wie sich aus Fragen Wissen entwickeln konnte. Sie vermittelt, warum und wie ein Teil der Menschheitsgeschichte in eine Steinzeit, Bronzezeit und Eisenzeit verzeitlicht wurde.

Science and Homosexualities is the first anthology by historians of science to examine European and American scientific research on sexual orientation since the coining of the word "homosexual" almost 150 years ago. This collection is particularly timely given the enormous scientific and popular interest in biological studies of homosexuality, and the importance given such studies in current legal, legislative and cultural debates concerning gay civil rights. However, scientific and popular literature discussing the biology of sexual orientation have been short-sighted in representing it as objective, new scientific work. This volume demonstrates that the quest for the biological "cause" of homosexuality and other sexualities is as old as the term itself. These essays explore the active role experimental subjects played in shaping scientific theories of homosexuality and cultural perceptions of sexuality and sexual identity. Finally this anthology studies the way in which this doctor-patient interaction shaped not only scientific theories of homosexuality, but also cultural

---

perceptions and self-identities as well. Contributors include: Garland E. Allen, Erin G. Carlston, Julian Carter, Alice D. Dreger, Anne Fausto-Sterling, Margaret Gibson, Stephanie Kenen, Hubert Kennedy, Harry Oosterhuis, James Steakley, Richard Pillard, Jennifer Terry

**Fear and Loathing in Las Vegas Simon and Schuster**

Following the first comprehensive transdisciplinary dialogue on humans in outer space which resulted in "Humans in Outer Space - Interdisciplinary

Odysseys", the European Science Foundation (ESF), the European Space Agency (ESA), and the European Space Policy Institute (ESPI) have continued and deepened this transdisciplinary dialogue, which can now be found in *Humans in Outer Space - Interdisciplinary Perspectives*. Going further than regarding humans as better-than-robot tools for exploration, it investigates the human quest for odysseys beyond Earth's atmosphere and reflects on arising issues related to Europe's role among the States conducting human exploration. It provides perspectives related to governance, management of space exploration, space settlements, the role of astronauts in the future as well as related to the encounter of extraterrestrial life.

Fitz-Hugh Ludlow was a recent graduate of Union College in Schenectady, New York, when he vividly recorded his hasheesh-

---

induced visions, experiences, adventures, and later with San Francisco Bay area hippies in insights. During the mid-nineteenth century, the drug was a legal remedy for lockjaw and Ludlow had a friend at school from whom he received a ready supply. He consumed such large quantities at each sitting that his hallucinations have been likened to those experienced by opium addicts. Throughout the book, Ludlow colorfully describes his psychedelic journey that led to extended reflections on religion, philosophy, medicine, and culture. First published in 1857, *The Hasheesh Eater* was the first full-length American example of drug literature. Yet despite the scandal that surrounded it, the book quickly became a huge success. Since then, it has become a cult classic, first among Beat writers in the 1950s and 1960s, and the 1970s. In this first scholarly edition, editor Stephen Rachman positions Ludlow's enduring work as not just a chronicle of drug use but also as a window into the budding American bohemian literary scene. A lucid introduction explores the breadth of Ludlow's classical learning as well as his involvement with the nineteenth-century subculture that included fellow revelers such as Walt Whitman and the pianist Louis Gottschalk. With helpful annotations guiding readers through the text's richly allusive qualities and abundance of references, this edition is ideal for classroom use as well as for general readers.

\*One of Time Magazine 's Most Anticipated  
Books\* From Pulitzer Prize winner Annie Proulx,  
this riveting deep dive into the history of our  
wetlands and what their systematic destruction  
means for the planet “ is both an enchanting work  
of nature writing and a rousing call to action ”  
(Esquire). “ I learned something new—and found  
something amazing—on every page. ” —Anthony  
Doerr, author of All the Light We Cannot See and  
Cloud Cuckoo Land A lifelong acolyte of the  
natural world, Annie Proulx brings her witness and  
research to the subject of wetlands and the vitally  
important role they play in preserving the  
environment—by storing the carbon emissions that  
accelerate climate change. Fens, bogs, swamps, and  
marine estuaries are crucial to the earth 's

survival, and in four illuminating parts, Proulx  
documents their systemic destruction in pursuit of  
profit. In a vivid and revelatory journey through  
history, Proulx describes the fens of 16th-century  
England, Canada 's Hudson Bay lowlands,  
Russia 's Great Vasyugan Mire, and America 's  
Okefenokee National Wildlife Refuge. She  
introduces the early explorers who launched the  
destruction of the Amazon rainforest, and writes of  
the diseases spawned in the wetlands—the Ague,  
malaria, Marsh Fever. A sobering look at the  
degradation of wetlands over centuries and the  
serious ecological consequences, this is “ an  
unforgettable and unflinching tour of past and  
present, fixed on a subject that could not be more  
important ” (Bill McKibben). “ A stark but  
beautifully written Silent Spring – style warning  
from one of our greatest novelists. ” —The  
Christian Science Monitor  
The New Yorker Springer Science &  
Business Media

With their distinctive pink coloring and one-legged stance, flamingos are easily the most recognizable bird in the world. Most of us don't know, however, that there are actually six different species of flamingo, each differing in size and hue — — and, despite excellent fossil records, scientists have had a difficult time positioning the flamingo within the avian genetic tree. In *Flamingo*, Caitlin R. Kight untangles the scientific knowledge about this unusual ornithological wonder and looks at how it has figured in popular culture. Kight presents the flamingo in a concise and accessible way, introducing its detailed scientific history alongside what we know about its often hostile habitats and complex social behavior. She explores its genetic lineage and the confusions it has caused, and she details the significance it has had for many cultures, whether as a spiritual totem or a commercial symbol of the tropical life. She even explains how it gets its extraordinary color (hint: it has to do with its diet). A wonderful resource for any bird lover, *Flamingo* provides valuable insight into just what makes this flashy-feathered character so special.

*Eight Little Piggies: Reflections in Natural History*  
W. W. Norton & Company

Gould covers topics as diverse as episodes in the birth of paleontology to lessons from Britain 's four greatest Victorian naturalists. This collection presents the richness and fascination of the various lives that have fueled the enterprise of science and opened our eyes to a world of unexpected wonders.

Rotunda Simon and Schuster

For the last few thousand years, humanity

---

has struggled to achieve sustainable development. Gillespie sees the problem as multi-faceted: a three legged stool of economic, social, and environmental conundrums have stalled the quest for the long term viability of both our species and the ecosystems in which we reside. Gillespie moves from the low life expectancy, excessive deforestation, and wetland drainage of the medieval period, through the species loss, coal burning, free trade, and poor waste management of the seventeenth and eighteenth centuries, and to the more recent concerns of climate change, unsustainable fisheries, and chemical pollutants. By delivering a comprehensive examination of human survival over the past millennium, Gillespie illustrates that the

challenges we face are not new - that we now have the means to counter them, is.

Market economy has become today the predominant economic system in the world. One of the tasks of the book is to define analytically the essential features of a market economy. The other purpose is to investigate the very working of a market economy which rests on firms defined as organizations and markets seen as institutions. It also supposes a renewed conception of cooperation and competition. The book will permit the reader to acquire a fresh view on market economies, stressing simultaneously their unity and diversity. It will also interest specialists of microeconomics as well as industrial organization, economics of technology and institutional economics.

Science and Homosexualities A&C Black

Evolutionary theory is the theme that binds together these essays on such seemingly disparate

---

topics as the feeding habits of flamingos, flowers and snails that change from male to female and sometimes back again, and the extinction from baseball of the .400 hitter.

Argues that intelligence tests, in addition to being of dubious value in predicting academic success, are also fundamentally biased

Markets and Organization Bloomsbury Publishing  
"Gould himself is a rare and wonderful animal—a member of the endangered species known as the ruby-throated polymath. . . . [He] is a leading theorist on large-scale patterns in evolution . . . [and] one of the sharpest and most humane thinkers in the sciences." --David Quammen, New York Times Book Review

The Flamingo's Smile: Reflections in Natural History W. W. Norton & Company

\* Reflections and humorous pieces, plus insights into some of mountaineering's more controversial events  
\* Revealing portraits of other Himalayan climbers  
Peeling back the layers to reveal the gritty truth about the elite climbing world is Greg Child's specialty. With clever wit, sharp observations, and insightful reflections, Child's writing covers the full spectrum of the mountaineering experience. Entertaining even to those who have never been above sea level, Child's stories reveal climbing's other face. His description of the daily habits of mountaineers on expedition (who don't bathe for months) is both disgusting and horrifyingly funny. A post-climb fiasco in the offices of petty Pakistani bureaucrats proves that not all epics take place on high

---

mountain faces. Falling of a rock climb in front of his mother is an exercise in humility. Child takes up climbing controversy with the same keen insight. His investigation of Tomo Cesen's claimed first ascent of Lhotse's south wall is considered the definitive report on this controversial event. A hard look at the media frenzy around the death of Alison Hargreaves on K2 evolves into a brilliant, impassioned defense of a friend. He also speaks out on the money- and media-driven expeditions that now crowd Everest. But Child never preaches. Whether contrasting his clumsy performance with Lynn Hill's elegant moves on a climb in the remote mountains of Kyrgyzstan or reflecting upon artifacts (from crucifixes to pink flamingos) that decorate the world's highest peaks, he writes it as he sees it, with a dose of wit. A true insider, Greg Child draws us deep into the world of climbing but never denies its dark side.

Adam's Navel JHU Press

'This is an outstanding collection of papers by top scholars in a range of disciplines who shed stimulating, complementary insights into the social, cognitive and semiotic frameworks that shape both the acquisition of language, and the constitution of social actors through that process. The intentionally loose ecological framing of the volume provides an arena within which a range of perspectives, all

---

united by their opposition to a mechanistic view of language acquisition, can enter into dialogue with each other. This is a most stimulating collection, with a range of insightful investigations of settings as diverse as an autistic child learning to interact with others on the playing field, professional gate-keeping encounters, and foreign language classrooms.' Professor Charles Goodwin, University of California at Los Angeles The book brings together well-known scholars in two relatively distinct fields, language acquisition and language socialization, and from a variety of orientations within applied linguistics to describe language development from a relational perspective. The papers in this volume are a response to three main questions: 1) What conceptual models best capture the ecological nature of language learning? 2) What research approaches are best likely to illuminate the relationship between language and social structure? 3) How is educational success defined for language acquisition and language socialization?

Iberia Spanish Travels and Reflections Reaktion Books  
50th Anniversary Edition • With an introduction by Caity Weaver, acclaimed New York Times journalist This cult classic of gonzo journalism is the best chronicle of drug-soaked, addle-brained, rollicking good times ever committed to the printed page. It is also the tale of a long weekend road trip that has gone down in the annals of American pop culture as one of the strangest journeys ever undertaken. Also a major motion picture directed by Terry Gilliam, starring Johnny Depp and Benicio del Toro.
