In the vein of *The Creative Habit* and *The Artist's Way*, a manifesto on the creative process from a master of the impossible. Since well before his epic (and illegal) 1974 walk between the Twin Towers of the World Trade Center, Philippe Petit had become an artist who answered first to the demands of his craft—and not just on the high wire, but also as a magician, street juggler, visual artist, builder, and writer. He was a rebel and an autodidact, cultivating the attitudes, resources, and techniques to tackle even seemingly impossible feats. His outlaw sensibility spawned a unique approach to the creative process—an approach he shares, with characteristic enthusiasm, irreverence, and originality, in *Creativity: The Perfect Crime*. With the reader as his accomplice, Petit reveals fresh and unconventional ways of going about the artistic endeavor, from generating and shaping ideas to practicing, problem-solving, and ultimately pulling off the “coup” itself—executing a finished work. His strategies and insights will resonate with performers of every stripe (actors, musicians, dancers), practitioners of the non-performing arts (writers, artists), professionals in search of new ways of meeting challenges, and individuals simply engaged in the art of living creatively.

"Our cities drive innovation and growth, but they also propel us into housing crises and give rise to ever-greater inequality, as the super-rich displace the well-off and the workers who run our essential services are ghettoised and pushed out to the suburbs. There is a new urban crisis, and it is undermining the foundations of our society. In this bracingly original work of research and analysis, leading

urbanist Richard Florida demonstrates how our cities are evolving in the twenty-first century, for good and for ill. From the world's superstar metropolises to the urban slums of the developing world, he shows how the crisis touches all of us, and sets out how we can make our cities more inclusive, ensuring prosperity for all"--Provided by publisher.

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning *The Daily Show* with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, *The Daily Show* with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of *The Daily Show*'s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

The compelling history of how Latino immigrants revitalized the nation's cities after decades of disinvestment and white flight. Thirty years ago, most people were ready to give up on American cities. We are commonly told that it was a "creative class" of young professionals who revived a moribund urban America in the 1990s and 2000s. But this stunning reversal owes much more to another, far less visible group: Latino and Latina newcomers. Award-winning historian A. K. Sandoval-Strausz reveals this history by focusing on two barrios: Chicago's Little Village and Dallas's Oak Cliff. These neighborhoods lost residents and jobs for decades before Latin American immigration turned them around beginning in the 1970s. As Sandoval-Strausz shows, Latinos made cities dynamic, stable, and safe by purchasing homes, opening businesses, and reviving street life. Barrio America uses vivid oral histories and detailed statistics to show how the great Latino migrations transformed America for the better.

In this exciting new book Angela McRobbie charts the 'euphoric' moment of the new creative economy, as it rose to prominence in the UK during the Blair years, and considers it from the perspective of contemporary experience of economic austerity and uncertainty about work and employment. McRobbie makes some bold arguments about the staging of creative economy as a mode of 'labour reform'; she proposes that the disposition of creativity is a fine-tuned instrument for acclimating the expanded, youthful urban middle classes to a future of work without the raft of entitlements and security which previous generations had struggled to win through the post-war period of social democratic government. Adopting a cultural studies perspective, McRobbie re-considers resistance as 'line of flight' and shows what is at stake in the new politics of culture and creativity. She incisively analyses 'project working' as the embodiment of the future of work and poses the question as to how people who come together on this basis can envisage developing stronger and more protective organisations and associations. Scattered throughout the book are excerpts from interviews with artists, stylists, fashion designers, policy-makers, and social entrepreneurs.

The first fifteen years of the 21st century have thrown into sharp relief the challenges of growth, equity, stability, and sustainability facing the world economy. In addition, they have exposed the inadequacies of mainstream economics in providing answers to these challenges. This volume gathers over 50 leading scholars from around the world to offer a forward-looking perspective of economic geography to understanding the various building blocks, relationships, and trajectories in the world economy. The perspective is at the same time grounded in theory and in the experiences of particular places. Reviewing state-of-the-art of economic geography, setting agendas, and with illustrations and empirical evidence from all over the world, the book should be an essential reference for students, researchers, as well as strategists and policy makers. Building on the success of the first edition, this volume offers a radically revised, updated, and broader approach to economic geography. With the backdrop of the global financial crisis, finance is investigated in chapters on financial stability, financial innovation, global financial networks, the global map of savings and investments, and financialization. Environmental challenges are addressed in chapters on resource economies, vulnerability of regions to climate change, carbon markets, and energy transitions. Distribution and consumption feature alongside more established topics on the firm, innovation, and work. The handbook also captures the theoretical and conceptual innovations of the last fifteen years, including evolutionary economic geography and the global production networks approach. Addressing the dangers of inequality, instability, and environmental crisis head-on, the volume concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future.

"In the US, in Europe, and throughout the world, globalization, in tandem with technological progress, has left a massive number of people behind, feeling dispossessed, disenfranchised, and angry. Leading the charge of "hyperglobalization" during the second half of the last century, and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund. Along with the World Bank and WTO, many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization, while not adequately considering its powerful negative consequences. In October 2017, however, the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world faces today as a result of globalization, and how to address the extensive challenges it has created. Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF, the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes: how globalization affects economic growth and social welfare; potential political implications of an honest discussion of globalization, and that "free trade may not be politically viable"; free trade's role in global inequality; how workers adjust or not when they're dislocated by

globalization; and how trade policy influences the way countries develop their economies and societies. The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented, honest debate about the real costs and consequences of globalization"--

<https://vimeo.com/124247409> This book provides a comprehensive critique of the current Creative City paradigm, with a capital 'C', and argues for a creative city with a small 'c' via a theoretical exploration of urban subversion. The book argues that the Creative City (with a capital 'C') is a systemic requirement of neoliberal capitalist urban development and part of the wider policy framework of 'creativity' that includes the creative industries and the creative class, and also has inequalities and injustices in-built. The book argues that the Creative City does stimulate creativity, but through a reaction to it, not as part of it. Creative City policies speak of having mechanisms to stimulate individual, collective or civic creativity, yet through a theoretical exploration of urban subversion, the book argues that to be 'truly' creative is to be radically different from those creative practices that the Creative City caters for. Moreover, the book analyses the role that urban subversion and subcultures have in the contemporary city in challenging the dominant political economic hegemony of urban creativity. Creative activities of people from cities all over the world are discussed and critically analysed to highlight how urban creativity has become co-opted for political and economic goals, but through a radical reconceptualisation of what creativity is that includes urban subversion, we can begin to realise a creative city (with a small 'c').

The whole landscape of research in urban studies was revolutionized by the publication of Richard Florida's *The Rise of the Creative Class* in 2002, and his subsequent book entitled *The Flight of the Creative Class* has helped to maintain a decade-long explosion of interest in the field. While these two books examine the creative class in the context of the United States, research has emerged which investigates the creative class worldwide. This book brings together detailed studies of the creative class in cities across the globe, examining the impact of the creative class on growth and development. The countries covered include the United Kingdom, the Netherlands, Germany, Australia, China, Japan and Canada, in addition to the United States. Taken together, the contributions deepen our understanding of the creative class and the various factors that affect regional development, highlighting the similarities and differences between the creative class and economic development across countries. This book will be of great interest to scholars of economic geography, regional economics, urban sociology and cultural policy, as well as policy makers involved in urban development.

NATIONAL BOOK AWARD FINALIST • NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was

poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history.

The Role of Internal and External Connections Hachette UK

Over the last forty years, the human landscape of the United States has been fundamentally transformed. The metamorphosis is partially visible in the ascendance of glittering, coastal hubs for finance, infotech, and the so-called creative class. But this is only the tip of an economic iceberg, the bulk of which lies in the darkness of the declining heartland or on the dimly lit fringe of sprawling cities. This is America's hinterland, populated by towering grain threshers and hunched farmworkers, where laborers drawn from every corner of the world crowd into factories and "fulfillment centers" and where cold storage trailers are filled with fentanyl-bloated corpses when the morgues cannot contain the dead. Urgent and unsparing, this book opens our eyes to America's new heart of darkness. Driven by an ever-expanding socioeconomic crisis, America's class structure is recomposing itself in new geographies of race, poverty, and production. The center has fallen. Riots ricochet from city to city led by no one in particular. Anarchists smash financial centers as a resurgent far right builds power in the countryside. Drawing on his direct experience of recent popular unrest, from the Occupy movement to the wave of riots and blockades that began in Ferguson, Missouri, Phil A. Neel provides a close-up view of this landscape in all its grim but captivating detail.

Inaugurating the new Field Notes series, published in association with the Brooklyn Rail, Neel's book tells the intimate story of a life lived within America's hinterland.

We tend to view prolonged economic downturns, such as the Great Depression of the 1930s and the Long Depression of the late nineteenth century, in terms of the crisis and pain they cause. But history teaches us that these great crises also represent opportunities to remake our economy and society and to generate whole new eras of economic growth and prosperity. In terms of innovation, invention, and energetic risk taking, these periods of "creative destruction" have been some of the most fertile in history, and the changes they put into motion can set the stage for full-scale recovery. In *The Great Reset*, bestselling author and economic development expert Richard Florida provides an engaging and sweeping examination of these previous economic epochs, or "resets." He distills the deep forces that have altered physical and social landscapes and eventually reshaped economies and societies. Looking toward the future, Florida identifies the patterns that will drive the next Great Reset and transform virtually every aspect of our lives — from how and where we live, to how we work, to how we invest in individuals and infrastructure, to how we shape our cities and regions. Florida shows how these forces, when combined, will spur a fresh era of growth and prosperity, define a new geography of progress, and create surprising

opportunities for all of us. Among these forces will be * new patterns of consumption, and new attitudes toward ownership that are less centered on houses and cars * the transformation of millions of service jobs into middle class careers that engage workers as a source of innovation * new forms of infrastructure that speed the movement of people, goods, and ideas * a radically altered and much denser economic landscape organized around "megaregions" that will drive the development of new industries, new jobs, and a whole new way of life We've weathered tough times before. They are a necessary part of economic cycles, giving us a chance to clearly see what's working and what's not. Societies can be reborn in such crises, emerging fresh, strong, and refocused. Now is our opportunity to anticipate what that brighter future will look like and to take the steps that will get us there faster. With his trademark blend of wit, irreverence, and rigorous research and analysis, Florida presents an optimistic and counterintuitive vision of our future, calling into question long-held beliefs about the nature of economic progress and forcing us to reassess our very way of life. He argues convincingly that it's time to turn our efforts — as individuals, as governments, and as a society — to putting the necessary pieces in place for a vibrant, prosperous future.

Time Time b a Space Space Time Time c d Space Space Fig. 1 Different possible scales for growth and innovation analyses spatial dimension, the sectoral dimension and the time dimension are represented. In Fig. 1a, regional development analyses are revealed, where the economy is sliced vertically into regions and their dynamics are investigated. The study of the evolution of industries, typical of evolutionary industrial economics, is represented in Fig. 1b, where the economy is divided horizontally into sectoral slices. This approach has progressed considerably in recent years (see Malerba 2006, for a recent survey).

Modifications of industries have important spatial implications, which however are not normally at the core of these analyses even though spatial patterns of innovation differ greatly from sector to sector (Breschi 2000). Our approach operates in the manner of Fig. 1a and we will focus on regions, extending the analysis to industries only where this is regionally and structurally relevant. Hence, the approach in the book belongs to the tradition of regional development theories, but, in contrast to the more traditional analyses, we will not consider the region as an economic unit per se. Rather, interactions between and within regions are very relevant to the performance of individual regions in an integrated world and will be at the core of the analyses of the following chapters.
