What if the ultimate treatment for cancer was closer than most of us realize? A silent revolution has been unfolding recently in the science of natural medicine, bringing us so close to the answer—far too close, for some. Chromogen employee Annika Guthrie understands this more than most. She's watched her terminally ill father add years to his life with natural supplements, and makes it her mission to turn this alternative medicine into what the medical community calls "real" science. It's why she joins forces with the maverick but genius cancer researcher Dr. Elliott Lindell, even though he works with Mitogenica-Chromogen's fiercest competitor. Together, they formulate a cocktail of natural supplements which Annika secretly gives to patients in Chromogen's latest drug trial. The cocktail works so well, it threatens to undermine Chromogen's next billion dollar chemo drug, and Annika's world quickly falls apart. Her wards start curiously dying from everything but their cancer, and Dr. Lindell disappears on the eve of his most critical experiment. Annika soon finds she is the only one left who can recover what remains of Dr. Lindell's work—and that she is racing against someone far larger and more deadly than her worst fears.

When the book opens Eve, who is the narrator, is just coming into consciousness. She has been given by God to the Serpent to raise. Her sense of wonder as the Serpent introduces her to life in Paradise is a strength of the book; she learns about nature, love and the way that the new and fascinating world works. When she comes into contact with God - who rears Adam - she is wary of his dominance and egotism. One day, becoming impatient to discover whether or not he's designed the male and female to procreate properly, God rushes Adam and Eve into intercourse. The Serpent alone recognizes the consequences of God's act. 'Until today Eve has felt...that the world was good...' but 'Adam as good as raped her.' Eve is devastated by the experience. Eve leaves the Garden to gain some distance from God and to discover what exists in the outside world; the Serpent accompanies her. They make several journeys - one to a volcano, one to a desert, one to a mountain range and one to the sea (where Eve swims out to sea against the instructions of the Serpent and nearly drowns.) On their return to the Garden, the roots of the apple tree of the Knowledge of Good and Evil begin to grow; the Serpent sensing that time is running out to teach Eve that love making is good, changes into a man and makes love to her with great sensitivity. After this she is prepared to accept her role as the mother of humankind. God is outraged by Eve's - and also Adam's - interest in the tree of knowledge. He is at his capricious worst: everything must bow to his wishes. They realise that if they are to have any freedom of will they must leave God and the garden. The Serpent warns them that this will involve future suffering but Eve feels she must develop and be her own person. They go forth...

Eccentric small town girl clashes with a handsome brooding billionaire in this hilarious, yet sweet rom com! It is an indisputable fact that Reed women are not marriage material. The great-granddaughter of a famous burlesque dancer, the granddaughter of an ex-hippie, and the daughter of an eccentric artist, Taylor quickly learns the heartbreaking lesson of her family curse after her first love ends in rejection.

Apparently, Reed women are not girlfriend material either. Nestled in a small town in Maine, Cedar Gardens is the worn-down estate which the Reed women call home. But there's one catch: It doesn't belong to them. Almost seventy years ago, Mortimer J. Freeman bought the place for his long-lost love, Marlana Reed. Now, his great-grandson--and heir to billions--Lucas Freeman is in town with an agenda: to quietly reclaim the estate and Mortimer's old love letters to Marlana while avoiding a family scandal. But Taylor's grandmother

has another plan: to play matchmaker with Taylor and Lucas before all three Reed women are kicked out of the only home they have ever known. The problem? Taylor can't stand the brooding billionaire, who doesn't understand the gravity of a triple dog dare or the fun of blowing bubbles in your milk. Responsibility, reliability, and routine are Lucas's mantra. That is, until the fiery Taylor schemes up a hilarious to-do list to break him out of his habitual shell and, in the process, turns his world upside down. But falling in love wasn't part of any of their plans. Does Cedar Gardens have enough magic to bring Taylor and Lucas together, or will the Reed family curse win out in the end?

In *Gardens of the Roman Empire*, the pioneering archaeologist Wilhelmina F. Jashemski sets out to examine the role of ancient Roman gardens in daily life throughout the empire. This study, therefore, includes for the first time, archaeological, literary, and artistic evidence about ancient Roman gardens across the entire Roman Empire from Britain to Arabia. Through well-illustrated essays by leading scholars in the field, various types of gardens are examined, from how Romans actually created their gardens to the experience of gardens as revealed in literature and art. Demonstrating the central role and value of gardens in Roman civilization, Jashemski and a distinguished, international team of contributors have created a landmark reference work that will serve as the foundation for future scholarship on this topic. An accompanying digital catalogue will be made available at: [www.gardensoftheromanempire.org](http://www.gardensoftheromanempire.org).
