The Geography of East and Southeast Asia AuthorHouse

Develop a rich foundation of world geographical knowledge and skills using the best of children's literature.

The Geography of Memory Wipf and Stock Publishers

Lucy lives on the twenty-fourth floor. Owen lives in the basement. It's fitting, then, that they meet in the middle -- stuck between two floors of a New York City apartment building, on an elevator rendered useless by a citywide blackout. After they're rescued, Lucy and Owen spend the night wandering the darkened streets and marveling at the rare appearance of stars above Manhattan. But once the power is back, so is reality. Lucy soon moves abroad with her parents, while Owen heads out west with his father. The brief time they spend together leaves a mark. And as their lives take them to Edinburgh and to San Francisco, to Prague and to Portland, Lucy and Owen stay in touch through postcards, occasional e-mails, and phone calls. But can they -- despite the odds -- find a way to reunite? Smartly observed and wonderfully romantic, Jennifer E. Smith's new novel shows that the center of the world isn't necessarily a place. Sometimes, it can be a person.

The Geography of You and Me - FREE PREVIEW EDITION (The First 5 Chapters) Dutton Childrens Books

Lovescapes introduces the reader to the various meanings and manifestations of love and its many cognates such as compassion, caring, altruism, empathy, and forgiveness. It addresses how love and compassion have been understood in history and the religions of the world. It goes on to explore the ways that our environments and heredity influence our capacity to love and suggests ways to cultivate love and compassion in one's life. The book shows how the values of love and compassion are integral to

finding humane solutions to the daunting problems we face as individuals, as a human family, and as an earth community--a world in crisis. Lovescapes has the following features: -Describing how love is the essence of the divine, and therefore the ground of reality -Understanding the meaning of love and its place in our lives -Learning how love and compassion have been understood across history, culture, and tradition -Gaining insight about how to increase our capacity to love and show compassion -Discerning how love and compassion can be applied in all aspects of our lives, in the regions where we live, and in our global setting.

An Introduction to the Geography of Tourism 'The Rosen Publishing Group, Inc'

A read-aloud introduction to geography for young children that, when opened and folded back, creates a freestanding globe Children are invited to identify and experience the Earth's amazing geography through rhyming verse and lush illustrations: from rivers, lakes, and oceans deep, to valleys, hills, and mountains steep. Secondary text offers more detailed, curriculum-focused facts and encourages readers to consider their own living environments, making the reading experience personal yet set within a global backdrop. This informative homage to Earth is sure to inspire readers to learn more about their planet -- and to engage with the world around them. Ages 2-5

Inward Bound New Directions Publishing

Award-winning poet Jeanne Murray Walker tells an extraordinarily wise, witty, and quietly wrenching tale of her mother's long passage into dementia. This powerful story explores parental love, profound grief, and the unexpected consolation of memory. While Walker does not flinch from the horrors of "the ugly twins, aging and death," her eye for the apt image provides a window into unexpected joy and humor even during the darkest days. This is a multi-layered narrative of generations, faith, and friendship. As Walker leans in to the task of caring for her mother, their relationship unexpectedly deepens and becomes life-giving. Her mother's memory, which more and more dwells in the distant past, illuminates Walker's own childhood. She rediscovers and begins to understand her own past, as well as to enter more fully into her mother's final years. THE GEOGRAPHY OF MEMORY is not only a personal journey made public in the most engaging, funny, and revealing way possible, here is a story of redemption for anyone who is caring for or expecting to care for ill and aging parents--and for all the rest of us as well.

The Geography of Hope Good Year Books

An immense land, China is approximately the same size as the United States. Yet it is home to more than four times as many people as live within U.S. borders--and the population is concentrated in the eastern half of the country because much of the west consists of rugged mountains and inhospitable desert. The Geography of China presents a wealth of information on such topics as topography, climate, natural resources, regions, cities, and environmental issues. It will be a valuable resource for students of this emerging nation.

The Geography of South Asia Twelve

O, The Oprah Magazine's 20 Best Titles of the Year Time Magazine's 100 Books to Read in 2020 Financial Times' Best Books of 2020 Esquire's Best Books of 2020 New York Times Editors' Choice Lit Hub's Best Books of 2020 Bustle's Best Short Story Collections of 2020 Electric Literature's Favorite Short Story Collections of 2020 Library Journal's Best Short Stories of 2020 "Superb. . . Krauss's depictions of the nuances of sex and love, intimacy and dependence, call to mind the work of Natalia Ginzburg in their psychological profundity, their intellectual rigor. . . Krauss's stories capture characters at moments in their lives when they're hungry for experience and open to possibilities, and that openness extends to the stories themselves: narratives too urgent and alive for neat plotlines, simplistic resolutions or easy answers." —Molly Antopol, New York Times Book Review "From a contemporary master, an astounding collection of ten globetrotting stories, each one a powerful dissection of the thorny connections between men and women. . . Each story is masterfully crafted and deeply contemplative, barreling toward a shimmering, inevitable conclusion, proving once again that Krauss is one of our most formidable talents in fiction." —Esquire In one of her strongest works of fiction yet, Nicole Krauss plunges fearlessly into the struggle to understand what it is to be a man and what it is to be a woman, and the arising tensions that have existed from the very beginning of time. Set in our contemporary moment, and moving across the globe from Switzerland, Japan, and New York City to Tel Aviv, Los Angeles, and South America, the stories in *To Be a Man* feature male characters as fathers, lovers, friends, children, seducers, and even a lost husband who may never have been a husband at all. The way these stories mirror one other and resonate is beautiful, with a balance so finely tuned that the book almost feels like a novel. Echoes ring through stages of life: aging parents and new-born babies; young women's coming of age and the newfound, somewhat bewildering sexual power that accompanies it; generational gaps and unexpected deliveries of strange new leases on life; mystery and wonder at a life lived or a future waiting to unfold. *To Be a Man* illuminates with a fierce, unwavering light the forces driving human existence: sex, power, violence, passion, self-discovery, growing older. Profound, poignant, and brilliant, Krauss's stories are at once startling and deeply moving, but always revealing of all-too-human weakness and strength.

Discovering Geography of North America with Books Kids Love Bantam

Flaps, tabs, word balloons, and pop-ups illustrate the geography of the Earth and solar system. *The Geography of Love* Random House Digital, Inc.

After the fierce warnings and grim predictions of *The Weather Makers* and *An Inconvenient Truth*, acclaimed journalist and national bestselling author Chris Turner finds hope in the search for a sustainable future. Point of no return: The chilling phrase has become the ubiquitous mantra of ecological doomsayers, a troubling headline above stories of melting permafrost and receding ice caps, visions of catastrophe and fears of a problem with no solution. Daring to step beyond the rhetoric of panic and despair, *The Geography of Hope* points to the bright light at the end of this very dark tunnel. With a mix of front-line reporting, analysis and passionate argument, Chris Turner pieces together the glimmers of optimism amid the gloom and the solutions already at work around the world, from Canada's largest wind farm to Asia's greenest building and Europe's most eco-friendly communities. But *The Geography of Hope* goes far beyond mere technology. Turner seeks out the next generation of political, economic, social and spiritual institutions that could provide the global foundations for a sustainable future—from the green hills of northern Thailand to the parliament houses of Scandinavia, from the villages of southern India, where microcredit finance has remade the social fabric, to America's most forward-thinking think tanks. In this compelling first-person exploration, punctuated by the wonder and angst of a writer discovering the world's beacons of possibility, Chris Turner pieces together a dazzling map of the disparate landmarks in a geography of hope. While most of the world has been spinning in stagnant circles of recrimination and debate on the subject of climate change, paralyzed by visions of apocalypse both natural (if nothing of our way of life changes) and economic (if too much does), Denmark has simply marched off with steadfast resolve into the sustainable future, reaching the

zenith of its pioneering trek on the island of Samsø. And so if there's an encircled star on this patchwork map indicating hope's modest capital, then it should be properly placed on this island. Perhaps, for the sake of precision, at the geographic centre of Jørgen Tranberg's dairy farm. There are, I'm sure, any number of images called to mind by talk of ecological revolution and renewable energy and sustainable living, but I'm pretty certain they don't generally include a hearty fiftysomething Dane in rubber boots spotted with mud and cow shit. Which is why Samsø's transformation is not just revolutionary but inspiring, not just a huge change but a tantalizingly attainable one. And it was a change that seemed at its most workaday—near-effortless, no more remarkable than the cool October wind gusting across the island—down on Tranberg's farm. —from *The Geography of Hope*

The Geography of Childhood William Morrow & Company

Describes the landscapes, extreme weather, plants, animals, and famous explorers of the continent of Antarctica.

Geography of Loss Rowman & Littlefield

GRADES 3–6: With age-appropriate activities, this beginning social studies workbook helps children build knowledge and skills for a solid foundation in map skills and geography.

INCLUDES: This elementary workbook features easy-to-follow instructions and practice on key topics such as US geography, grid maps, US regions, global geography, North and South American geography, and more! **ENGAGING:** This geography and map workbook features colorful photographs and illustrations with fun, focused activities to entertain children while they grasp concepts and skills for success. **HOMESCHOOL FRIENDLY:** This elementary workbook for kids is a great learning resource for at home or in the classroom and allows parents to supplement their children's learning in the areas they need it most. **WHY CARSON DELLOSA:** Founded by two teachers more than 40 years ago, Carson Dellosa believes that education is everywhere and is passionate about making products that inspire life's learning moments.

The Amazing Pop-up Geography Book Simon and Schuster

Thomas Merton's final testament as a poet is his most ambitious long work and a remarkable poetic achievement.

Windfall Childrens Press

This clear and engaging text introduces undergraduate students to the vast and diverse subject of tourism through the lens of geography. Indeed, geography and tourism have always been interconnected, and Velvet Nelson draws on human and physical geography to interpret all facets of tourism—economic, social, and environmental. She shows how geography provides the tools and concepts to consider both the positive and negative factors that affect tourists and destinations, as well as the effects tourism has on both peoples and places. Her thematic approach uses real-world case studies, based on research and on the experiences of tourists themselves, to vividly illustrate key issues. This comprehensive introduction will enhance students' understanding of geographic concepts and how they can be used as a way of viewing and understanding the world.

The Geography of Lost Things Simon Pulse

Why do some men become convinced—despite what doctors tell them—that their penises have, simply, disappeared. Why do people across the world become convinced that they are cursed to die on a particular date—and then do? Why do people in Malaysia suddenly “run amok”? In *The Geography of Madness*, acclaimed magazine writer Frank Bures investigates these and other “culture-bound” syndromes, tracing each seemingly baffling phenomenon to its source. It's a fascinating, and at times rollicking, adventure that takes the reader around the world and deep into the oddities of the human psyche. What Bures uncovers along the way is a poignant and stirring story of the persistence of belief, fear, and hope.

The Geography of Madness Ravenio Books

This little book is confined to very simple “reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions.” The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning “the meaning of map,” and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child’s mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which “Geography” so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on “Place”—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

Europe Beacon Press

Dissecting a midlife affair, this perceptive, slyly comical debut explores how the spaces that limit our movements can be more exciting than the person we think we want. Ema and Paul are lovers. Like so many others before them, they met through work. Both are married with children, and they arrange hurried meetings away from prying eyes. Paul’s car, a corner of Ema’s house, a hotel room...But their relationship soon suffers from this too-restricted sphere, and Ema decides to put them both in danger, at the risk of losing everything. Cleverly attaching itself to the locations where passion plays out—whether domestic or professional, safe or transgressive—*Geography of an Adultery* casts a radical eye on anticipation and desire. With her deceptively cool, clinically precise style, Agnès Riva unravels the inner workings of a private life.

Elementary Geography Fulcrum Pub

This century has seen the costliest hurricanes in U.S. history—but who bears the brunt of these monster storms? Consider this: Five of the most expensive hurricanes in history have made landfall since 2005: Katrina (\$160 billion), Ike (\$40 billion), Sandy (\$72 billion), Harvey (\$125 billion), and Maria (\$90 billion). With more property than ever in harm’s way, and the planet and oceans warming dangerously, it won’t be long before we see a \$250 billion hurricane. Why? Because Americans have built \$3 trillion worth of property in some of the riskiest places on earth: barrier islands and coastal floodplains. And they have been encouraged to do so by what Gilbert M. Gaul reveals in *The Geography of Risk* to be a confounding array of federal subsidies, tax breaks, low-interest loans, grants, and government flood insurance that shift the risk of life at the beach from private investors to public taxpayers, radically distorting common notions of risk. These federal incentives, Gaul argues, have resulted in one of the worst planning failures in American history, and the costs to taxpayers are reaching unsustainable levels. We have become responsible for a shocking array of coastal amenities: new roads, bridges, buildings, streetlights, tennis courts, marinas, gazebos, and even spoiled food after hurricanes. *The Geography of Risk* will forever change the way you think about the coasts, from the clash between economic interests and nature, to the heated politics of regulators and developers.

Whole Earth Geography Book Vintage Canada

Poignant and affectionate, *Geography of the Heart* is a moving portrait of Lambda Award winner Fenton Johnson, the son of a Kentucky whiskey brewer, and his fateful lover Larry Rose, who, three years into their intense relationship, died of AIDS. Rose had been upfront about his condition from the start of his relationship with Johnson, and the knowledge left their interactions fraught with the pain of anticipated loss. Though Johnson never contracted the virus himself, Rose’s physical decline haunted him. He had come to depend on Rose for his care and understanding as much as Rose, increasingly fragile as their relationship progresses, depended on him. The vivid, poignant, and wise tribute to his soulmate that Johnson has distilled into *The Geography of the Heart* is a memoir like no other, a startling story of compassion, perseverance, and the acute wounds that can linger in the shadow of true love.

Geography Of Nowhere The Geography of Love

Twenty-eight-year-old Will, a teacher living in Montreal, has spent the last few months recovering from a breakup with his first serious boyfriend, Max. He has resumed his search for companionship, but has he truly moved on? Will's mother Katherine - one of the few people, perhaps the only one, who loves him unconditionally - is also in recovery, from a bout with colon cancer that haunts her body and mind with the possibility of relapse. Having experienced heartbreak, and fearful of tragedy, Will must come to terms with the rule of impermanence: to see past lost treasures and unwanted returns, to find hope and solace in the absolute certainty of change. In *The Geography of Pluto*, Christopher DiRaddo perfectly captures the ebb and flow of life through the insightful, exciting, and often playful story of a young man's day-to-day struggle with uncertainty.
