Poignant and affectionate, *Geography of the Heart* is a moving portrait of Lambda Award winner Fenton Johnson, the son of a Kentucky whiskey brewer, and his fateful lover Larry Rose, who, three years into their intense relationship, died of AIDS. Rose had been upfront about his condition from the start of his relationship with Johnson, and the knowledge left their interactions fraught with the pain of anticipated loss. Though Johnson never contracted the virus himself, Rose's physical decline haunted him. He had come to depend on Rose for his care and understanding as much as Rose, increasingly fragile as their relationship progresses, depended on him. The vivid, poignant, and wise tribute to his soulmate that Johnson has distilled into *The Geography of the Heart* is a memoir like no other, a startling story of compassion, perseverance, and the acute wounds that can linger in the shadow of true love.

In this romantic road trip story perfect for fans of Sarah Dessen and Morgan Matson, a teen girl discovers the value of ordinary objects while learning to forgive her absent father. A lot can happen on the road from lost to found... Ali Collins doesn't have room in her life for clutter or complications. So when her estranged father passes away and leaves her his only prized possession—a 1968 Firebird convertible—Ali knows she won't keep it. Not when it reminds her too much of all her father's unfulfilled promises. And especially not when a buyer three hundred miles up the Pacific coast is offering enough money for the car to save her childhood home from foreclosure. There's only one problem, though. Ali has no idea how to drive a stick shift. But her ex-boyfriend, Nico, does. The road trip gets off to a horrible start, filled with unexpected detours, roadblocks, and all the uncomfortable tension that comes with being trapped in a car with your ex. But when Nico starts collecting items from the quirky strangers they meet along the way, Ali starts to sense that these objects aren't random. Somehow they seem to be leading her to an unknown truth about her father. A truth that will finally prove to Ali that some things—even broken things—are worth saving.

Award-winning poet Jeanne Murray Walker tells an extraordinarily wise, witty, and quietly wrenching tale of her mother's long passage into dementia. This powerful story explores parental love, profound grief, and the unexpected consolation of memory. While Walker does not flinch from the horrors of "the ugly twins, aging and death," her eye for the apt image provides a window into unexpected joy and humor even during the darkest days. This is a multi-layered narrative of generations, faith, and friendship. As Walker leans in to the task of caring for her mother, their relationship unexpectedly deepens and becomes life-giving. Her mother's memory, which more

and more dwells in the distant past, illuminates Walker's own childhood. She rediscovers and begins to understand her own past, as well as to enter more fully into her mother's final years. THE GEOGRAPHY OF MEMORY is not only a personal journey made public in the most engaging, funny, and revealing way possible, here is a story of redemption for anyone who is caring for or expecting to care for ill and aging parents—and for all the rest of us as well.

Lucy lives on the twenty-fourth floor. Owen lives in the basement. It's fitting, then, that they meet in the middle -- stuck between two floors of a New York City apartment building, on an elevator rendered useless by a citywide blackout. After they're rescued, Lucy and Owen spend the night wandering the darkened streets and marveling at the rare appearance of stars above Manhattan. But once the power is back, so is reality. Lucy soon moves abroad with her parents, while Owen heads out west with his father. The brief time they spend together leaves a mark. And as their lives take them to Edinburgh and to San Francisco, to Prague and to Portland, Lucy and Owen stay in touch through postcards, occasional e-mails, and phone calls. But can they -- despite the odds -- find a way to reunite? Smartly observed and wonderfully romantic, Jennifer E. Smith's new novel shows that the center of the world isn't necessarily a place. Sometimes, it can be a person.

This century has seen the costliest hurricanes in U.S. history—but who bears the brunt of these monster storms? Consider this: Five of the most expensive hurricanes in history have made landfall since 2005: Katrina (\$160 billion), Ike (\$40 billion), Sandy (\$72 billion), Harvey (\$125 billion), and Maria (\$90 billion). With more property than ever in harm's way, and the planet and oceans warming dangerously, it won't be long before we see a \$250 billion hurricane. Why? Because Americans have built \$3 trillion worth of property in some of the riskiest places on earth: barrier islands and coastal floodplains. And they have been encouraged to do so by what Gilbert M. Gaul reveals in *The Geography of Risk* to be a confounding array of federal subsidies, tax breaks, low-interest loans, grants, and government flood insurance that shift the risk of life at the beach from private investors to public taxpayers, radically distorting common notions of risk. These federal incentives, Gaul argues, have resulted in one of the worst planning failures in American history, and the costs to taxpayers are reaching unsustainable levels. We have become responsible for a shocking array of coastal amenities: new roads, bridges, buildings, streetlights, tennis courts, marinas, gazebos, and even spoiled food after hurricanes. *The Geography of Risk* will forever change the way you think about the coasts, from the clash between economic interests and nature, to the heated politics of regulators and developers.

Magazine editor and single mother Amy Bickers was finally putting her life together after a long divorce when, on an August night in 2009, she witnessed the suicide of her ex-husband. In 2009, 36,909 suicides were reported in the United States. In the years since, that number has increased. In 2013, the most recent year for which statistics are available, there were 41,149 suicides reported in the U.S. Around the world, more than 800,000 people will die by suicide this year. It is said that each suicide intimately affects six friends and family members. A suicide every 13.7 minutes in the U.S. is tragically multiplied by six: six people who are called "survivors." *The Geography of You and Me* is a deeply personal and honest exploration of what came next: grief, post-traumatic stress, and healing. It is a journey filled with dark humor, rap songs by Ludacris, too much cursing, and a perfectly healthy fixation on George Clooney. *The Geography of You and Me* is ultimately a story of forgiveness and hope. Amy forgave her ex-husband almost immediately. The struggle after his death was to forgive herself and to find a way forward in an uncertain landscape. Every year, millions are faced with the complexities of grief and guilt in the wake of unexpected violence and death. This book is for anyone whose reality in the wake of tragedy has not matched up with the books, movies and television shows that tell us how we're supposed to feel and behave. This book is for anyone who is thrust by tragedy into a world they no longer recognize. *The Geography of You and Me* is for anyone who no longer knows where they stand when the world is turned upside down.

After the fierce warnings and grim predictions of *The Weather Makers* and *An Inconvenient Truth*, acclaimed journalist and national bestselling author Chris Turner finds hope in the search for a sustainable future. Point of no return: The chilling phrase has become the ubiquitous mantra of ecological doomsayers, a troubling headline above stories of melting permafrost and receding ice caps, visions of catastrophe and fears of a problem with no solution. Daring to step beyond the rhetoric of panic and despair, *The Geography of Hope* points to the bright light at the end of this very dark tunnel. With a mix of front-line reporting, analysis and passionate argument, Chris Turner pieces together the glimmers of optimism amid the gloom and the solutions already at work around the world, from Canada's largest wind farm to Asia's greenest building and Europe's most eco-friendly communities. But *The Geography of Hope* goes far beyond mere technology. Turner seeks out the next generation of political, economic, social and spiritual institutions that could provide the global foundations for a sustainable future — from the green hills of northern Thailand to the parliament houses of Scandinavia, from the villages of southern India, where microcredit finance has remade the social fabric, to America's most forward-thinking think tanks. In this compelling first-person exploration, punctuated by the wonder and angst of a writer discovering the world's beacons of possibility, Chris Turner pieces together a dazzling map of the disparate landmarks in a geography of hope. While most of the world has been spinning in stagnant circles of recrimination and debate on the subject of climate change, paralyzed by visions of apocalypse both natural (if nothing of our way of life changes) and economic (if too much does), Denmark has simply marched off with steadfast resolve into the sustainable future, reaching the zenith of its pioneering trek on the island of Samsø. And so if there's an encircled star on this patchwork map indicating hope's modest capital, then it should be properly placed on this island. Perhaps, for the sake of precision, at the geographic centre of Jørgen Tranberg's dairy farm. There are, I'm sure, any number of images called to mind by talk of ecological revolution and renewable energy and sustainable living, but I'm pretty certain they don't generally include a hearty fiftysomething Dane in rubber boots spotted with mud and cow shit. Which is why Samsø's transformation is not just revolutionary but inspiring, not just a huge change but a tantalizingly attainable one. And it was a change that seemed at its most workaday — near-effortless, no more remarkable than the cool October wind gusting across the island — down on Tranberg's farm. —from *The Geography of Hope*

Each story is masterfully crafted and deeply contemplative, barreling toward a shimmering, inevitable conclusion, proving once again that Krauss is one of our most formidable talents in fiction. ” —*Esquire* In one of her strongest works of fiction yet, Nicole Krauss plunges fearlessly into the struggle to understand what it is to be a man and what it is to be a woman, and the arising tensions that have existed from the very beginning of time. Set in our contemporary moment, and moving across the globe from Switzerland, Japan, and New York City to Tel Aviv, Los Angeles, and South America, the stories in *To Be a Man* feature male characters as fathers, lovers, friends, children, seducers, and even a lost husband who may never have been a husband at all. The way these stories mirror one other and resonate is beautiful, with a balance so finely tuned that the book almost feels like a novel. Echoes ring through stages of life: aging parents and new-born babies; young women ’ s coming of age and the newfound, somewhat bewildering sexual power that accompanies it; generational gaps and unexpected deliveries of strange new leases on life; mystery and wonder at a life lived or a future waiting to unfold. *To Be a Man* illuminates with a fierce, unwavering light the forces driving human existence: sex, power, violence, passion, self-discovery, growing older. Profound, poignant, and brilliant, Krauss ’ s stories are at once startling and deeply moving, but always revealing of all-too-human weakness and strength.

The author of the *New York Times* bestseller *Fire in the Belly* guides us on an enlightening journey across the emotional landscape of our own inner psyches. Using self-tests and practical advice, *Inward Bound* teaches us to master the art of emotional literacy—how to understand what our minds and bodies are really telling us through the ups and downs of our emotions. Paying special attention to “ negative ” emotions such as fatigue, depression, grief, and especially boredom—the undiagnosed disease from which most “ normal ” people suffer—Sam Keen shows us how the low periods in our lives can actually be the impetus for the most profound and lasting change. While most people deny emotional lows in the hopes that they will go away; eat, drink, or tranquilize themselves; take mood elevators; or otherwise fill their time with empty activities, Keen instead teaches us how to re-vision negative emotions as positive way stations on the path to self-discovery. In *Inward Bound*, Keen shows us how to recover the full spectrum of our feelings and points the reader on a journey to greater health, intimacy, vitality, and a renewed joy in life.
