A vital instrument of power, telecommunications is and has always been a political technology. In this book, Headrick examines the political history of telecommunications from the mid-nineteenth century to the end of World War II. He argues that this technology gave society new options. In times of peace, the telegraph and radio were, as many predicted, instruments of peace; in times of tension, they became instruments of politics, tools for rival interests, and weapons of war. Writing in a lively, accessible style, Headrick illuminates the

political aspects of information technology, showing how in both World Wars, the use of radio led to a shadowy war of disinformation, cryptography, and communications intelligence, with decisive consequences.

"In this ambitious novel, dense with perspectives and social commentary, Onyebuchi dreams up disparate lives in a crumbling future America—with gentrifiers returning to Earth from space colonies and laborers trying to make a precarious living—while leaving room for moments of beauty and humor."—The New York Times, Editors' Choice In his adult novel debut, Hugo, Nebula, Locus, and NAACP Image Award finalist and ALA Alex and New England Book Award winner Tochi Onyebuchi delivers a sweeping science fiction epic in the vein of Samuel R. Delany and Station Eleven. In the 2050s, Earth

has begun to empty. Those with the means and the privilege have departed the great cities of the United States for the more comfortable confines of space colonies. Those left behind salvage what they can from the collapsing infrastructure. As they eke out an existence, their neighborhoods are being cannibalized. Brick by brick, their houses are sent to the colonies, what was once a home now a quaint reminder for the colonists of the world that they wrecked. A primal biblical epic flung into the future, Goliath weaves together disparate narratives—a space-dweller looking at New Haven, Connecticut as a chance to reconnect with his spiraling lover; a group of laborers attempting to renew the promises of Earth’s crumbling cities; a journalist attempting to capture the violence of the streets; a marshal trying to solve a kidnapping—into a richly urgent mosaic about race, class, gentrification, and who is allowed to be the hero of any history. “ Every thinking American must read ” (The Washington Book Review) this startling and “ insightful ” (The New York Times) look at how concentrated financial power and consumerism has transformed American politics, and business. Going back to our country ’ s founding, Americans once had a coherent and clear understanding of political tyranny, one crafted by Thomas Jefferson and updated for the industrial age by Louis Brandeis. A concentration of power—whether by government or banks—was understood as autocratic and dangerous to individual liberty and democracy. In the 1930s, people observed that the Great Depression was caused by financial concentration in the hands of a few whose misuse of their power induced a financial collapse. They drew on this tradition to craft the New Deal. In Goliath, Matt Stoller explains how authoritarianism and populism have returned to American politics for the first time in eighty years, as the outcome of the 2016 election shook our faith in democratic institutions. It has brought to the fore dangerous forces that many modern Americans never even knew existed. Today ’ s bitter recriminations and panic represent more than just fear of the future, they reflect a basic confusion about what is happening and the historical backstory that brought us to this moment. The true effects of populism, a shrinking middle class, and concentrated financial wealth are only just beginning to manifest themselves under the current administrations. The lessons of Stoller ’ s study will only grow more relevant as time passes. “ An engaging call to arms, ” (Kirkus Reviews) Stoller illustrates here in rich detail how we arrived at this tenuous moment, and the steps we must take to create a new democracy.

In 1904 the city of Baltimore was almost destroyed by fire. Hundreds of firemen, policemen, soldiers, and citizens battled the blaze for three days. The disaster brings out the best in man and the bravest of deeds, but one hero stands head and shoulders above all...literally. Goliath is a fire horse assigned to Engine Company 15. He is massive in size and mighty in heart and steadfastness. To the men of Engine Company 15, Goliath is the ultimate fire horse. He is the lead horse for the team assigned to pulling the mammoth Hale Water Tower No. 1. When the fire alarm sounds, calling them to action, Goliath leads his team into the blaze.

Soon his lifesaving actions will lead him into the pages of history. Masterful artwork from acclaimed illustrator Troy Howell brings this true story to pulse-pounding life. Educator Claudia Friddell says of her work researching Goliath, "It was a privilege to meet and interview firefighters and fire historians about the Baltimore Fire of 1904." Goliath is her first children's book. Claudia lives in Baltimore, Maryland. Artist Troy Howell has had a prolific career as a children's book illustrator with countless books to his credit, including *The Secret Garden*, *The Ugly Duckling*, and *Favorite Greek Myths*. he second book in Number One bestselling author Jasper Fforde's phenomenally successful Thursday Next series. 'Fans of the late Douglas Adams, or, even, Monty Python, will feel at home with Fforde' - Herald Thursday Next, literary detective and newlywed is back to embark on an adventure that begins, quite literally on her own doorstep. It seems that Landen, her husband of four weeks, actually drowned in an accident when he was two years old. Someone, somewhere, sometime, is responsible. The sinister Goliath Corporation wants its operative Jack Schitt out of the poem in which Thursday trapped him, and it will do almost anything to achieve this - but bribing the ChronoGuard? Is that possible? Having barely caught her breath after The Eyre Affair, Thursday must battle corrupt politicians, try to save the world from extinction, and help the Neanderthals to species self-determination. Mastadon migrations, journeys into Just William, a chance meeting with the Flopsy Bunnies, and violent life-and-death struggles in the summer sales are all part of a greater plan. But whose? and why?

"To earn a degree, every doctoral candidate should go out to Harvard Square, find an audience, and explain his [or her] dissertation". Everett Mendelsohn's worldly advice to successive generations of students, whether apocryphal or real, has for over forty years spoken both to the essence of his scholarship, and to the role of the scholar. Possibly no one has done more to establish the history of the life sciences as a recognized university discipline in the United States, and to inspire a critical

concern for the ways in which science and technology operate as central features of Western society. This book is both an act of homage and of commemoration to Professor Mendelsohn on his 70th birthday. As befits its subject, the work it presents is original, comparative, wide-ranging, and new. Since 1960, Everett Mendelsohn has been identified with Harvard University, and with its Department of the History of Science. Those that know him as a teacher, will also know him as a scholar. In 1968, he began- and after 30 years, has just bequeathed to others - the editorship of the *Journal of the History of Biology*, among the earliest and one of the most important publications in its field. At the same time, he has been a pioneer in the social history and sociology of science. He has formed particularly close working relationships with colleagues in Sweden and Germany - as witnessed by his editorial presence in the *Sociology of Science Yearbook*.

The Way to Brave John Wiley & Sons
How do the experts solve difficult problems in software development? In this unique and insightful book, leading computer scientists offer case studies that reveal how they found unusual, carefully designed solutions to high-profile projects. You will be able to look over the shoulder of major coding and design experts to see problems through their eyes. This is not simply another design patterns book, or another software engineering treatise on the right and wrong way to do

things. The authors think aloud as they work through their project's architecture, the tradeoffs made in its construction, and when it was important to break rules. This book contains 33 chapters contributed by Brian Kernighan, Karl Fogel, Jon Bentley, Tim Bray, Elliotte Rusty Harold, Michael Feathers, Alberto Savoia, Charles Petzold, Douglas Crockford, Henry S. Warren, Jr., Ashish Gulhati, Lincoln Stein, Jim Kent, Jack Dongarra and Piotr Luszczek, Adam Kolawa, Greg Kroah-Hartman, Diomidis Spinellis, Andrew Kuchling, Travis E. Oliphant, Ronald Mak, Rogerio Atem de Carvalho and Rafael Monnerat, Bryan Cantrill, Jeff Dean and Sanjay Ghemawat, Simon Peyton Jones, Kent Dybvig, William Otte and Douglas C. Schmidt, Andrew Patzer, Andreas Zeller, Yukihiro Matsumoto, Arun Mehta, TV Raman, Laura Wingerd and Christopher Seiwald, and Brian Hayes. *Beautiful Code* is an opportunity for master coders to tell their story. To Comfort A King Little, Brown
The inside story of how America's enemies launched a cyber war against us-and how we've learned to fight back With each passing year, the internet-linked attacks on America's interests have grown in both frequency and severity. Overmatched by our military, countries like North Korea, China, Iran, and Russia have found us vulnerable in cyberspace. The "Code War" is upon us. In this dramatic book, former Assistant Attorney General John P. Carlin takes readers to the front lines of a

global but little-understood fight as the Justice Department and the FBI chases down hackers, online terrorist recruiters, and spies. Today, as our entire economy goes digital, from banking to manufacturing to transportation, the potential targets for our enemies multiply. This firsthand account is both a remarkable untold story and a warning of dangers yet to come.

Dawn of the Code War Oxford University Press

One of New York Magazine's best books on Silicon Valley! The true, behind-the-scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O'Mara became one of our most consequential historians of the American-led digital revolution, she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet. There she saw firsthand how deeply intertwined Silicon Valley was with the federal government--and always had been--and how shallow the common understanding of the secrets of the Valley's success actually was. Now, after almost five years of pioneering research, O'Mara has produced the definitive history of Silicon Valley for our time, the story of mavericks and visionaries, but also of powerful institutions creating the framework for innovation, from the Pentagon to Stanford University. It is also a story of a community that started off remarkably homogeneous and tight-knit and stayed that way, and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second-order effects. Deploying a wonderfully rich and diverse cast of protagonists, from the justly famous to the unjustly obscure, across four generations of explosive growth in

the Valley, from the forties to the present, O'Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form. She is on the ground with all of the key tech companies, chronicling the evolution in their offerings through each successive era, and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years. Perhaps most impressive, O'Mara has penetrated the inner kingdom of tech venture capital firms, the insular and still remarkably old-boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market, or not. The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams--and, increasingly, our nightmares--can be understood, in Margaret O'Mara's masterful hands, as the story of one California valley. As her majestic history makes clear, its fate is the fate of us all.

Standing Up to Goliath W. W. Norton & Company

As seen on Fox & Friends! Rebecca Friedrichs tells real-life stories that expose state and national teachers' unions as the money and muscle behind the degradation of America's schools and culture. In a book that's both accessible and enlightening, Rebecca Friedrichs recounts her thirty-year odyssey as an elementary school teacher who comes face-to-face with the forces dividing and corrupting our schools and culture—state and national teachers' unions. An exciting true story that features real life testimonies of teachers, parents, and kids, as well as political and social commentary, Rebecca's journey leads her to the realization that the only hope for America's schools and families is returning authority to parents and teachers while lessening the grip of state

and national unions that:

- Promote a culture of fear and bully teachers and parents into silence.
- Undermine parents' authority by sexually, socially, and politically indoctrinating kids.
- Use the apple-pie image of the PTA as a "front" to promote a partisan agenda.

These insights and more led Rebecca and nine other teachers to the US Supreme Court where their case, *Friedrichs v California Teachers Association, et al.*, sought to restore the First Amendment rights of all teachers and government employees. They argued no one should be forced to pay fees to abusive, politically driven unions, and were poised to change the very landscape of American education—until tragedy struck. Saddened but unbowed, Rebecca started a national movement, *For Kids and Country*, leading the charge of servant leaders who believe Judeo-Christian values (including kindness) and restoration of the teaching profession—possible only by rejecting state and national unions and forming "local only" associations—are the answers to America's woes. She invites you to join them. "America's teachers, parents, and kids deserve better," Rebecca writes. "If we want freedom, we're going to have to fight for it."

From one of the foremost authorities on education in the United States, *Slaying Goliath* is an impassioned, inspiring look at the ways in which parents, teachers, and activists are successfully fighting back to defeat the forces that are trying to privatize America's public schools. Diane Ravitch writes of a true grassroots movement sweeping the country, from cities and towns across America, a movement dedicated to protecting public schools from those who are funding privatization and who believe that America's schools should be run

like businesses and that children should be treated like customers or products. *Slaying Goliath* is about the power of democracy, about the dangers of plutocracy, and about the potential of ordinary people—armed like David with only a slingshot of ideas, energy, and dedication—to prevail against those who are trying to divert funding away from our historic system of democratically governed, nonsectarian public schools. Among the lessons learned from the global pandemic of 2020 is the importance of our public schools and their teachers and the fact that distance learning can never replace human interaction, the personal connection between teachers and students.

Defining the Sacred Songs To Comfort A King

Mildew and Sponge don't think much of Maudlin Towers, the blackened, gloom-laden, gargoyle-infested monstrosity that is their school. But when somebody steals the School Spoon and the teachers threaten to cancel their holiday break until the culprit is found, our heroes must spring into action and solve the crime! But what starts out as a classic bit of detectivating quickly becomes weirder than they could have imagined. Who is the ghost in the attic? What's their history teacher doing with a time machine? And why do a crazy bunch of Vikings seem to think Mildew is a werewolf? This brand-new series from Chris Priestley, full of delightfully original wit, is perfect for young readers who like their mysteries with a bit of bite.

When Abishag leaves her home to fulfill the commission to comfort King David during his final months of life, she leaves behind a deaf

sister, a small brother, and a father who is still grieving the death of his wife. Also left behind is Abishag's betrothed, Joseph, who has already waited many months to claim his bride. Now, he must wait until Israel's king no longer needs her. Torn from the comfort of her small village, Abishag is thrust into a world of unfamiliar customs, royal expectations, and palace intrigue. She is greeted suspiciously by the king's concubines, warmly by Queen Bathsheba, and reluctantly by King David himself. Adonijah, the king's son, is bitter over his father's choice of Solomon as Israel's next king. He determines to ruin Abishag to prevent her from being given as a prize to Solomon at their father's death. Suffering personal losses, as well as scorn from much of the royal court, Abishag begins to question God's goodness in placing her in the king's service. Can she find someone there who understands that one who comforts the king is in great need of comfort herself? Will Abishag's time with the king end in despair or joy?

The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. “Anyone interested in influencing others—to buy,

to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book. ” —The Washington Post Mark Twain once observed, “ A lie can get halfway around the world before the truth can even get its boots on. ” His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them “ stick. ” In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous “ kidney theft ring ” hoax to a coach ’ s lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. *Made to Stick* will transform the way you communicate. It ’ s a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, *Made to Stick* shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.

A masterpiece of contemporary Bible translation and commentary."—Los Angeles Times Book Review, Best Books of 1999 Acclaimed for its masterful new translation and insightful commentary, *The David Story* is a fresh, vivid rendition of one of the great works in Western literature. Robert Alter's brilliant translation gives us David, the beautiful, musical hero who slays Goliath and, through his struggles with Saul, advances to the kingship of Israel. But this David is also fully human: an ambitious, calculating man who navigates his life's course with a flawed moral vision. The consequences for him, his family, and his nation are tragic and bloody. Historical personage and full-blooded imagining, David is the creation of a literary artist comparable to the Shakespeare of the history plays.
