From the acclaimed author of *Imagine Wanting Only This*—a timely and moving meditation on isolation and longing, both as individuals and as a society There is a

silent epidemic in America: loneliness. Shameful to talk about and often misunderstood, loneliness is everywhere, from the most major of metropolises to the smallest of towns. In *Seek You*, Kristen Radtke's wide-ranging exploration of our inner lives and public selves, Radtke digs into the ways in which we attempt to feel closer to one another, and the distance that remains. Through the lenses of gender and violence, technology and art, Radtke ushers us through a history of loneliness and longing, and shares what feels impossible to share. Ranging from the invention of the laugh-track to the rise of Instagram, the bootstrap-pulling cowboy to the brutal experiments of Harry Harlow, Radtke investigates why we engage with each other, and what we risk when we turn away. With her distinctive, emotionally-charged drawings and deeply empathetic prose, Kristen Radtke masterfully shines a light on some of our most vulnerable and sublime moments, and asks how we might keep the spaces between us from splitting entirely.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was

so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

She's all Britton could ever ask for in a sister, or even a friend--but having survived without either for so long, Britton knows the way her heart races whenever Avery enters the room can only mean one thing... But Avery has a secret. Something that is eating away at her and stopping her letting anyone in, least of all Britton. When Sparks Fly Roaring Brook Press
Mesklin is a vast, inhospitable, disc-shaped planet, so cold that its oceans are liquid methane and its snows are frozen ammonia. It is a world spinning dizzily, a world where gravity can be a crushing 700 times greater than Earth's, a world too hostile for human explorers. But the planet holds secrets of inestimable value, and an unmanned probe that has crashed close to one of its poles must be recovered. Only the Mesklinites, the small creatures so bizarrely adapted to their harsh environment, can help. And so Barlennan, the resourceful and courageous captain of the Mesklinite ship *Bree*, sets out on an heroic and appalling journey into the terrible unknown. For him and his people, the prize to be gained is as great as that for mankind... Hal Clement's *MISSION OF GRAVITY* is universally regarded as one of the most important and best loved novels in the genre. The remarkable and sympathetic depiction of an alien species and the plausible and scientifically based realisation of the strange world they inhabit make it a major landmark in the history of hard SF.

New York, Los Angeles, and Washington, D.C., have been abandoned. The Bill of Rights has been revoked, and replaced with the Moral Statutes. There are no more police—instead, there are soldiers. There are no more fines for bad behavior—instead, there are

arrests, trials, and maybe worse. People who get arrested usually don't come back. Seventeen-year-old Ember Miller is old enough to remember that things weren't always this way. Living with her rebellious single mother, it's hard for her to forget that people weren't always arrested for reading the wrong books or staying out after dark. It's hard to forget that life in the United States used to be different. Ember has perfected the art of keeping a low profile. She knows how to get the things she needs, like food stamps and hand-me-down clothes, and how to pass the random home inspections by the military. Her life is as close to peaceful as circumstances allow. That is, until her mother is arrested for noncompliance with Article 5 of the Moral Statutes. And one of the arresting officers is none other than Chase Jennings...the only boy Ember has ever loved. “ A deeply thought, rigorously researched, and riveting history of human butts. Radke knows exactly when to approach her subject with levity and when with gravity.

A pitch perfect debut. ” —Melissa Febos, bestselling author of *Girlhood* and *Body Work* Whether we love them or hate them, think they 're sexy, think they 're strange, consider them too big, too small, or anywhere in between, humans have a complicated relationship with butts. It is a body part unique to humans, critical to our evolution and survival, and yet it has come to signify so much more: sex, desire, comedy, shame. A woman 's butt, in particular, is forever being assessed, criticized, and objectified, from anxious self-examinations trying on jeans in department store dressing rooms to enduring crass remarks while walking down a street or high school hallways. But why? In *Butts: A Backstory*, reporter, essayist, and RadioLab contributing editor Heather Radke is determined to find out. Spanning nearly two

centuries, this “ whip-smart ” (Publishers Weekly, starred review) cultural history takes us from the performance halls of 19th-century London to the aerobics studios of the 1980s, the music video set of Sir Mix-a-Lot 's

“ Baby Got Back ” and the mountains of Arizona, where every year humans and horses race in a feat of gluteal endurance. Along the way, she meets evolutionary biologists who study how butts first developed; models whose measurements have defined jean sizing for millions of women; and the fitness gurus who created fads like “ Buns of Steel. ” She also examines the central importance of race through figures like Sarah Bartmann, once known as the “ Venus Hottentot, ” Josephine Baker, Jennifer Lopez, and other women of color whose butts have been idolized, envied, and despised. Part deep dive reportage, part personal journey, part cabinet of curiosities, *Butts* is an entertaining, illuminating, and thoughtful examination of why certain silhouettes come in and out of fashion—and how larger ideas about race, control, liberation, and power affect our most private feelings about ourselves and others.

The Summer I Wasn't Me Pantheon High school counselor Aislin Kennedy 's charisma and exuberance mask deep scars that prevent her from letting anyone too close. When Aislin agrees to help Susanna connect with her daughter, Cynt, surprising feelings awaken for both of them. But Aislin isn 't ready to trust again and Susanna 's track record is intimidating. If the past were to repeat itself, it could break Aislin for good.

"What's special about 'Cat Person,' and the rest of the stories in *You Know You Want This*, is the author's expert control of language, character, story—her ability to write stories that feel told, and yet so unpretentious and accessible that we think they must be true." —*The New York Times Book Review*

"Kristen Roupenian isn't just an uncannily great writer, she also knows things about the human psyche—things that I always supposed I would learn at some point, but

never did... The world has made a lot more sense since reading this book. ” —Miranda July, *New York Times* bestselling author “ If you think you know what this collection will be like, you ’ re wrong. These stories are sharp and perverse, dark and bizarre, unrelenting and utterly bananas. I love them so, so much. ” —Carmen Maria Machado, National Book Award Finalist and author of *Her Body and Other Parties* A compulsively readable collection of short stories that explore the complex—and often darkly funny—connections between gender, sex, and power across genres. Previously published as *You Know You Want This*, “ Cat Person ” and *Other Stories* brilliantly explores the ways in which women are horrifying as much as it captures the horrors that are done to them. Among its pages are a couple who becomes obsessed with their friend hearing them have sex, then seeing them have sex... until they can ’ t have sex without him; a ten-year-old whose birthday party takes a sinister turn when she wishes for “ something mean ” ; a woman who finds a book of spells half hidden at the library and summons her heart ’ s desire: a nameless, naked man; and a self-proclaimed “ biter ” who dreams of sneaking up behind and sinking her teeth into a green-eyed, long-haired, pink-cheeked coworker. Spanning a range of genres and topics—from the mundane to the murderous and supernatural—these are stories about sex and punishment, guilt and anger, the pleasure and terror of inflicting and experiencing pain. These stories fascinate and repel, revolt and arouse, scare and delight in equal measure. And, as a collection, they point a finger at you, daring you to feel uncomfortable—or worse, understood—as if to say, “ You want this, right? You know you want this. ”

The Art of Fear Llewellyn Worldwide

A revolutionary guide to acknowledging fear and developing the tools we need to build a healthy relationship with this confusing emotion—and use it as a positive force in our lives. We all feel fear. Yet we are often taught to ignore it, overcome it, push past it. But to what benefit? This is the essential question that guides Kristen Ulmer ’ s remarkable exploration of our most misunderstood emotion in *The Art of Fear*. Once recognized as the best extreme skier in the world (an honor she held for twelve years), Ulmer knows fear well. In this conversation-changing book, she argues that fear is not here to cause us problems—and that in fact, the only true issue we face with fear is our

misguided reaction to it (not the fear itself). Rebuilding our experience with fear from the ground up, Ulmer starts by exploring why we've come to view it as a negative. From here, she unpacks fear and shows it to be just one of 10,000 voices that make up our reality, here to help us come alive alongside joy, love, and gratitude. Introducing a mindfulness tool called "Shift," Ulmer teaches readers how to experience fear in a simpler, more authentic way, transforming our relationship with this emotion from that of a draining battle into one that's in line with our true nature. Influenced by Ulmer's own complicated relationship with fear and her over 15 years as a mindset facilitator, *The Art of Fear* will reconstruct the way we react to and experience fear—empowering us to easily and permanently address the underlying cause of our fear-based problems, and setting us on course to live a happier, more expansive future.
