Ken Yeang has become synonymous with the term "the green skyscraper". The Malaysian-born architect has changed our perception of the high-rise, questioning every premise on which it was founded. It has long been assumed that skyscrapers, as high consumers of energy and materials, cannot be sensitive to ecological and environmental issues.

Ken Yeang, Llewelyn Davies Yeang; Part 18, Q & A

Today, urbanization and the increasingly dense populations of the world's largest cities are pushing architects to reach for new heights in green skyscraper design. Because of the enormous energy needs of the traditional skyscraper, designing modern skyscrapers to be a little cleaner and more environmentally friendly is a big deal.
