Saving Darwin BenBella Books, Inc.

On his popular science blog, Pharyngula, PZ Myers has entertained millions of readers with his infectious love of evolutionary science and his equally infectious disdain for creationism, biblical literalism, intelligent design theory, and other products of godly illogic. This funny and fearless book collects and expands on some of his most popular writings, giving the religious fanaticism of our times the gleeful disrespect it deserves by skewering the apocalyptic fantasies, magical thinking, hypocrisies, and pseudoscientific theories advanced by religious fundamentalists of all stripes. Forceful and articulate, scathing and funny, *The Happy Atheist* is a reaffirmation of the revelatory power of humor and the truth-revealing powers of science and reason.

The Irrational Atheist Atheist Republic

The story of a former Evangelical Christian turned openly gay atheist who now works to bridge the divide between atheists and the religious The stunning popularity of the “ New Atheist ” movement—whose most famous spokesmen include Richard Dawkins, Sam Harris, and the late Christopher Hitchens—speaks to both the growing ranks of atheists and the widespread, vehement disdain for religion among many of them. In *Faith*, Chris Stedman tells his own story to challenge the orthodoxies of this movement and make a passionate argument that atheists should engage religious diversity respectfully. Becoming aware of injustice, and craving community, Stedman became a “ born-again ” Christian in late childhood. The idea of a community bound by God ’ s love—a love that was undeserved, unending, and guaranteed—captivated him. It was, he writes, a place to belong and a framework for making sense of suffering. But Stedman ’ s religious community did not embody this idea of God ’ s love: they were staunchly homophobic at a time when he was slowly coming to realize that he was gay. The great suffering this caused him might have turned Stedman into a life-long New Atheist. But over time he came to know more open-minded Christians, and his interest in service work brought him into contact with people from a wide variety of religious backgrounds. His own religious beliefs might have fallen away, but his desire to change the world for the better remained. Disdain and hostility toward religion was holding him back from engaging in meaningful work with people of faith. And it was keeping him from full relationships with them—the kinds of relationships that break down intolerance and improve the world. In *Faith*, Stedman draws on his work organizing interfaith and secular communities, his academic study of religion, and his own experiences to argue for the necessity of bridging

the growing chasm between atheists and the religious. As someone who has stood on both sides of the divide, Stedman is uniquely positioned to present a way for atheists and the religious to find common ground and work together to make this world—the one world we can all agree on—a better place.

Seeking God in Science Haymarket Books

The New York Times bestseller – a “crystal-clear, constantly engaging” (Jared Diamond) exploration of the role that religious belief plays in our lives and our interactions For all the thousands of books that have been written about religion, few until this one have attempted to examine it scientifically: to ask why—and how—it has shaped so many lives so strongly. Is religion a product of blind evolutionary instinct or rational choice? Is it truly the best way to live a moral life? Ranging through biology, history, and psychology, Daniel C. Dennett charts religion’s evolution from “wild” folk belief to “domesticated” dogma. Not an antireligious screed but an unblinking look beneath the veil of orthodoxy, *Breaking the Spell* will be read and debated by believers and skeptics alike.

Finding Darwin's God Harper Collins

*Killing the Black Body* remains a rallying cry for education, awareness, and action on extending reproductive justice to all women. It is as crucial as ever, even two decades after its original publication. "A must-read for all those who claim to care about racial and gender justice in America." —Michelle Alexander, author of *The New Jim Crow* In 1997, this groundbreaking book made a powerful entrance into the national conversation on race. In a media landscape dominated by racially biased images of welfare queens and crack babies, *Killing the Black Body* exposed America’s systemic abuse of Black women’s bodies. From slave masters’ economic stake in bonded women’s fertility to government programs that coerced thousands of poor Black women into being sterilized as late as the 1970s, these abuses pointed to the degradation of Black motherhood—and the exclusion of Black women’s reproductive needs in mainstream feminist and civil rights agendas. “Compelling. . . . Deftly shows how distorted and racist constructions of black motherhood have affected politics, law, and policy in the United States.” —Ms.

**The Genesis of Science** Penguin

An inspiring and provocative exploration of an alternative to traditional religion Questions about the role of God and religion in today's world have never been more relevant or felt more powerfully. Many of us are searching for a place where we can find not only facts and scientific reason but also hope and moral courage. For some, answers are found in the divine. For others, including the New Atheists, religion is an "enemy." But in *Good Without God*, Greg Epstein presents another, more balanced and inclusive response: Humanism. He highlights humanity's potential for goodness and the ways in which Humanists lead lives of purpose and compassion. Humanism can offer the sense of community we want and often need in good times and bad—and it teaches us that we can lead good and moral lives without the supernatural, without higher powers . . . without God.

*Society Without God* St. Martin's Press

**The Genealogical Adam and Eve** Prometheus Books

“Identity politics” is everywhere, polarizing discourse from the campaign trail to the classroom and amplifying antagonisms in the media, both online and off. But the compulsively referenced phrase bears little resemblance to the concept as first introduced by the radical Black feminist Combahee River Collective. While the Collective articulated a political viewpoint grounded in

their own position as Black lesbians with the explicit aim of building solidarity across lines of difference, identity politics is now frequently weaponized as a means of closing ranks around ever-narrower conceptions of group interests. But the trouble, Olúfẹ́mi O. Táíwò deftly argues, is not with identity politics itself. Through a substantive engagement with the global Black radical tradition and a critical understanding of racial capitalism, Táíwò identifies the process by which a radical concept can be stripped of its political substance and liberatory potential by becoming the victim of elite capture—deployed by political, social, and economic elites in the service of their own interests. Táíwò’s crucial intervention both elucidates this complex process and helps us move beyond a binary of “class” vs. “race.” By rejecting elitist identity politics in favor of a constructive politics of radical solidarity, he advances the possibility of organizing across our differences in the urgent struggle for a better world.

*The True Account of Adam and Eve* Thule Ediciones

The doctrine of intelligent design is often the subject of acrimonious debate. Seeking God in Science cuts through the rhetoric that distorts the debates between religious and secular camps. Bradley Monton, a philosopher of science and an atheist, carefully considers the arguments for intelligent design and argues that intelligent design deserves serious consideration as a scientific theory. Monton also gives a lucid account of the debate surrounding the inclusion of intelligent design in public schools and presents reason why students’ science education could benefit from a careful consideration of the arguments for and against it.

**The Fallacy of Fine-Tuning** Wooden Shore L.L.C.

**Good Without God** New Leaf Publishing Group

On the one hand, Eagleton demolishes what he calls the "superstitious" view of God held by most atheists and agnostics and offers in its place a revolutionary account of the Christian Gospel. On the other hand, he launches a stinging assault on the betrayal of this revolution by institutional Christianity. There is little joy here, then, either for the anti-God brigade -- Richard Dawkins and Christopher Hitchens in particular -- nor for many conventional believers. --Résumé de l'éditeur.

**Faitheist** Harper Collins

Are lawyers, by their very nature, agents of the state, of capital, of institutions of power? Or are there ways in which they can work constructively or transformatively for the disempowered, the working class, the underprivileged? Lawyers in a Postmodern World explores how lawyers actively create the forms of power which they and others deploy. Through engaging case studies, the book examines how lawyers work within and for powerful institutions and provides suggestions--both general and practical--for ways in which the practice of law can be made to work with and for the powerless. Individuals chapters address such subjects as the contradictions of radical law practice; legal work in South Africa; the economics and politics of negotiating justice; feminist legal scholarship and women's gendered lives; the overlapping worlds of law, business, and politics; theories of legal practice; and how lawyers are constitutive of gender relations. Contributing to the book are Maureen Cain (University of West Indies), Yves Dezalay (Centre National de la Recherche Scientifique, France), Martha Fineman (Columbia University), Sue Lees (University of North London), Doreen McBarnet (Wolfson College, Oxford), Frank Munger (SUNY, Buffalo), Wilfried Scharf (University of Cape Town), Stuart Scheingold (University of Washington), David Sugarman (Lancaster University), and Sally Wheeler
