The Harriet Lane Handbook Jones & Bartlett Learning  
A NEW YORK TIMES NOTABLE BOOK OF THE YEAR “[A]  
skillfully crafted gothic mystery . . . Johnson pulls off a great feat  
in this book.” —Financial Times “It reminded me, in its general  
refusal to play nice, of early Ian McEwan.” —The New York  
Times Book Review “Johnson crafts an aching thriller about the  
dangers of loving too intensely.” —Time From a Booker Prize  
finalist and international literary star: a blazing portrait of one  
darkly riveting sibling relationship, from the inside out. “One of

her generation’s most intriguing authors” (Entertainment  
Weekly), Daisy Johnson is the youngest writer to have been  
shortlisted for the Man Booker Prize. Now she returns with  
Sisters, a haunting story about two sisters caught in a powerful  
emotional web and wrestling to understand where one ends and  
the other begins. Born just ten months apart, July and  
September are thick as thieves, never needing anyone but each  
other. Now, following a case of school bullying, the teens have  
moved away with their single mother to a long-abandoned family  
home near the shore. In their new, isolated life, July finds that the  
deep bond she has always shared with September is shifting in  
ways she cannot entirely understand. A creeping sense of dread  
and unease descends inside the house. Meanwhile, outside, the  
sisters push boundaries of behavior—until a series of shocking  
encounters tests the limits of their shared experience, and forces  
shocking revelations about the girls’ past and future. Written with  
radically inventive language and imagery by an author whose

work has been described as “entrancing” (The New Yorker), “a force of nature” (The New York Times Book Review), and “weird and wild and wonderfully unsettling” (Celeste Ng), *Sisters* is a one-two punch of wild fury and heartache—a taut, powerful, and deeply moving account of sibling love and what happens when two sisters must face each other’s darkest impulses.

Most leaders of the U.S. expansion in the years before the Civil War were southern slaveholders. As Matthew Karp shows, they were nationalists, not separatists. When Lincoln's election broke their grip on foreign policy, these elites formed their own Confederacy not merely to preserve their property but to shape the future of the Atlantic world.

The book attempts to provide the essential information that postgraduates throughout India need to capture to effectively address the health problems that our children and youth may face in the times to come. Our objective is to be comprehensive yet concise and reader

friendly, embracing both the new advances in science as well as the time-honored art of pediatric practice. Both Indian and international experts in respective fields have provided the details which have been further scrutinized for exposition and usefulness to pediatric postgraduates by a chosen team of eminent academicians. We have liberally included tables, line diagrams, images, clinical photographs, illustrative figures, flowcharts and algorithms in the main text. The book is divided in 10 major Parts and further arranged into 51 Sections to cover all aspects of postgraduate pediatric curriculum. Themes which have major public health relevance for India are extensively covered. It is almost impossible to cover all pediatric problems with the same degree of detail and hence a careful balance has been made in the details of description of diseases and their management to the needs of the students, and to keep the book to a manageable size. Take-home messages are provided at the end of each chapter. Selected recent references, mostly leading articles, reviews and position statements, are provided for more detailed information if desired by the student or the teacher.

The Vaccine Handbook has a simple purpose- to draw together authoritative information about vaccines into a simple and concise resource that can be used in the office, clinic, and hospital. Not an encyclopedia or scientific textbook, The Vaccine Handbook gives practical advice and provides enough background for the practitioner to understand the recommendations and explain them to his or her patients. For each vaccine, the authors discuss the disease and its epidemiology, the vaccine's efficacy and safety, and the practical questions most frequently asked about the vaccine's use. The authors also discuss problems such as allergies, breastfeeding, dosing intervals and missed vaccines, and immunocompromised individuals. This
